Notes About the Data

Each year, the Michigan Incident Crime Reporting data is “frozen” on a specific date for purposes of publishing the annual *Crime in Michigan* report. The frozen set was created on March 11, 2020, for the 2019 *Crime in Michigan* publication. Any new crime data or updates to previous data submitted by agencies after the “frozen” date is not published in the report.

It should be noted that agencies that were unable to submit complete data by March 11, 2020, will show artificially low crime counts in this report. This may happen when an agency experiences a disruption to the submission of their crime data, for example during a period of transition between records management systems or when programmatic/technical complications interrupt data transfer processes. Therefore, users are cautioned against performing trend analysis or ranking agencies/cities based on their crime data, especially for those agencies/cities that indicate a significant increase or decrease in crime counts from one year to the next.

Users should also take into account the following factors when analyzing changes in the volume and types of crimes: missing data, population density, urbanization, composition of the population, stability of the population, modes of transportation, economic conditions, cultural characteristics, family cohesiveness, climate, strength and policies of the criminal justice system, and crime reporting practices of the citizenry.

When used properly, the data provided in this report can significantly contribute to management and planning activities at local, state, and federal levels, especially by state officials, law enforcement agencies, the legislature, and nonprofit organizations. Questions on the proper use of Michigan Incident Crime Reporting statistics can be directed to the Michigan Incident Crime Reporting Unit of the Michigan State Police, Criminal Justice Information Center, at MICRMail@michigan.gov.

2019 Hate/Bias Crime in Michigan

DEFINITION - A Hate Crime is a criminal offense committed against a person or property which is motivated in whole or in part, by the offender's bias against a race, ethnic/national origin, religion, sexual orientation, or mental/physical disability group.

Michigan's Ethnic Intimidation Act, Act 328 of 1931, as amended, Section 750.147b, was written to allow for stricter penalties for hate crimes. Ethnic intimidation is a felony punishable by imprisonment for not more than two years, or by a fine of not more than \$5,000, or both.

Note: The Michigan Ethnic Intimidation Act, Act 328 of 1931 as amended, Section 750.147b, requires that all offenses be reported within an incident. Incidents where suspected bias motivation is Unknown or Other Bias are not published within this report.

Hate crime incidents are identified by the motivation of the offender(s). Law enforcement investigations determine the objective facts which lead to a reasonable conclusion that the offender's actions were motivated by bias against a race, ethnic/national origin, religion, sexual orientation, or mental/physical disability group. Accurate data collection of hate crimes depends heavily on effective training of law enforcement to recognize such incidents and the cooperation and desire of communities/victims to report these incidents to law enforcement.

Each year, the Michigan Incident Crime Reporting data is "frozen" on a specific date for purposes of publishing the annual *Crime in Michigan* report which includes the Hate/Bias crime trends. The frozen set was created on March 11, 2020, for the 2019 *Crime in Michigan* publication.

The Federal Bureau of Investigation, Hate/Bias Program, updates the incidents that have been previously reported by the Michigan Incident Crime Reporting Program until they publish their Hate/Bias report. The Federal Bureau of Investigation's report only counts the Group A incidents. The counts below include Group A & B incidents. Because of the difference in dates and what is counted, cross-comparisons between the two data sets would yield inaccurate trend analysis.

ANALYSIS

2019 Domestic Violence Information

Definition: "Domestic Violence" is the occurrence of any of the following acts by a person that is not an act of self-defense: causing or attempting to cause physical or mental harm to a family or household member; placing a family or household member in fear of physical or mental harm; causing or attempting to cause a family or household member to engage in involuntary sexual activity by force, threat of force, or duress; and/or engaging in activity toward a family or household member that would cause a reasonable person to feel terrorized, frightened, intimidated, harassed, or molested. **Domestic Violence incidents are determined solely on the Victim to Offender relationship and not by the type of crime committed against the victim.** This report is by hierarchy offense file class for victims of multiple offenses.

Note: In 2013, the Michigan Incident Crime Reporting Unit implemented the Domestic Violence indicator field to improve the reporting accuracy of domestic violence victims. These statistics represent the incidents where the Victim to Offender relationship are one of the following: Spouse, Common-Law Spouse, Parent, Sibling, Child, Grandparent, Grandchild, In-law, Step-parent, Step-child, Step-sibling, Other Family Member, Child in Common, Dating (Boyfriend/Girlfriend), Child of Boyfriend/Girlfriend, Homosexual Relationship, Ex-spouse, Former Dating (Boyfriend/Girlfriend), Resident (Boyfriend/Girlfriend), and Former Resident (Boyfriend/Girlfriend) and the Domestic Violence field indicator is equal to Yes.

***Detroit Police Department** - Sgt. Rasheen McClain was shot and killed while responding to a domestic violence call in which a woman's boyfriend had broken into her home and threatened the occupants with a firearm. When responding officers arrived on the scene, they encountered the victims outside. They informed Sergeant McClain that the man was inside the home and armed. Sergeant McClain and other officers began clearing the home to locate the subject. They had cleared the main level and second floor before they began to clear the basement.

As they made their way down the basement stairs, the man emerged at the bottom and opened fire with a semi-automatic rifle, striking Sergeant McClain in the neck and another officer in the leg. The subject was wounded by additional officers after running outside of the home. He was taken into custody one block away as he attempted to flee on foot.

Sergeant McClain had served with the Detroit Police Department for 16 years and was assigned to the 12th Precinct. He is survived by his wife and three stepchildren.

Data Use

REPORTING DATES

Each year, the Michigan Incident Crime Reporting data is “frozen” on a specific date for purposes of publishing the annual *Crime in Michigan* report. The frozen set was created on March 11, 2020, for the 2019 *Crime in Michigan* publication. Any new crime data or updates to previous data submitted by agencies after the “frozen” date is not published in the report.

MICHIGAN LAW ENFORCEMENT AGENCIES - Total number of active police agencies: 572

Agency Type:

Sheriff = 83

Michigan State Police = 1

Police Departments = 488

PROPER USE OF DATA

It should be noted that agencies that were unable to submit complete data by March 11, 2020, will show artificially low crime counts in this report. This may happen when an agency experiences a disruption to the submission of their crime data, for example during a period of transition between records management systems or when programmatic/technical complications interrupt data transfer processes. Therefore, users are cautioned against performing trend analysis or ranking agencies/cities based on their crime data, especially for those agencies/cities that indicate a significant increase or decrease in crime counts from one year to the next.

Users should also take into account the following factors when analyzing changes in the volume and types of crimes: missing data, population density, urbanization, composition of the population, stability of the population, modes of transportation, economic conditions, cultural characteristics, family cohesiveness, climate, strength and policies of the criminal justice system, and crime reporting practices of the citizenry.

When used properly, the data provided in this report can significantly contribute to management and planning activities at local, state, and federal levels, especially by state officials, law enforcement agencies, the legislature, and nonprofit organizations. Questions on the proper use of Michigan Incident Crime Reporting statistics can be directed to the Michigan Incident Crime Reporting Unit of the Michigan State Police, Criminal Justice Information Center, at MICRMail@michigan.gov.

MONTHS REPORTED

The *months reported* figure indicates the number of months that an agency submitted data to the state program. Data users should view this with caution, since a month of data does not necessarily indicate that an agency has reported all activity for that month. It should not be assumed that changes in data indicate an actual change in crime; it may be a change in reporting. Users should check with the individual departments or with the state program before assuming that changes are indicative of actual trends.

HATE CRIME STATISTICS

A Hate/Bias crime is a criminal offense committed against a person or property which is motivated, in whole or in part, by the offender's bias against a race, religion, ethnic/national origin, sexual orientation, or disability group. Hate Crimes are not separate, distinct crimes, but rather traditional offenses motivated by the offender's bias. The Hate Crime statistics reported to the MICR program may have some reporting inconsistencies. The decision to classify an offense as a hate crime is left to the discretion of the responding law enforcement officer. It is believed that different interpretations of this definition have led to over-reporting by some agencies and under-reporting by others. For this reason, Hate Crime statistics should be used cautiously. In addition, the Other Bias category cannot be verified and consequently all incidents reported as Other Bias have been removed.

MICHIGAN INCIDENT CRIME REPORTING STATUS

Michigan Incident Crime Reporting is Michigan’s incident-based reporting system in which data is collected on each single crime occurrence. The National Incident Based Reporting System is the result of efforts by the Federal Bureau of Investigation and various law enforcement organizations to improve and modernize the Uniform Crime Reporting program. In 2005, all Michigan law enforcement agencies were required to start submitting their crimes using the Michigan Incident Crime Reporting system. Additional information on this program can be obtained by contacting the Michigan Incident Crime Reporting Unit at MICRMail@michigan.gov.

Offense File Class Mapping

The Federal Bureau of Investigation has defined “Group A” offenses using the following criteria:

1. The seriousness or significance of the offense.
2. The frequency or volume of its occurrence.
3. The prevalence of the offense nationwide.
4. The probability of the offense being brought to law enforcement’s attention.
5. The likelihood that law enforcement is the best channel for collecting data regarding the offense.
6. The burden placed on law enforcement in collecting data on the offense.
7. The national statistical validity and usefulness of the collected data.
8. The national UCR Program’s responsibility to make crime data available not only to law enforcement but to others having a legitimate interest in it.

“Group B” offenses have been defined as being less serious or significant.

Counting Crime

Every law enforcement agency (LEA) in the state of Michigan is required by Public Act 319 of 1968, as amended, to submit statistical data on specific crimes occurring within their jurisdiction to the Michigan State Police (MSP), Michigan Incident Crime Reporting (MICR) program. MICR compiles the data to create the *Crime in Michigan* publication, and provides the data to the Federal Bureau of Investigation's (FBI) National Incident Based Reporting System (NIBRS). The FBI then publishes the data in the annual *Crime in the United States*. All statistics produced by the MSP, including the *Crime in Michigan* publication, follow the FBI's counting guidelines based on whether the request is for Summary/Uniform Crime Reporting (UCR) or Incident Based data.

There are two types of reporting methods for crime statistics: **Incident Based Reporting** and **Summary/UCR**. Individuals are cautioned against making comparisons between the two types of reporting methods as the data will not yield the same results.

Incident Based Reporting (IBR/NIBRS) – The FBI uses NIBRS to collect IBR. NIBRS requires states to report the details of an individual criminal **incident** from a LEA by: reporting all **offenses** for the criminal incident only once (even if the offense occurred multiple times for that single incident or had multiple offenders). For example: an incident contains two offenses of sexual assault against two individuals (one offense each) and a drug offense. The sexual assault offense would be reported to NIBRS once and the drug offense would be reported once; both would be counted only once for a total of two offenses. NIBRS collects offense and arrest information on 24 offense categories made up of 52 **Group A** offenses. It collects up to 10 offenses for each incident. On **Group B** offenses, only the arrest information is collected. IBR indicates whether the crime was attempted or completed.

Summary/UCR – The FBI UCR program collects crime information for only nine **Part 1** crimes. Summary/UCR reporting counts one offense per incident using a **hierarchy** rule. The hierarchy is determined by the most serious offense in an incident. For example, if an incident contains an offense of homicide and an offense for drug possession, only the homicide would be counted. Summary/UCR reporting collects crimes that are attempted or completed; however, it does not distinguish between the two in its reporting.

MICR is the MSP application created to collect and report to the FBI Michigan LEA's crime for NIBRS. MICR is an IBR system. The MICR program collects **104 offenses** which are divided into Group A and B crime categories based on the FBI's NIBRS classifications. MICR also submits the arrest data to the FBI for Group B incidents.

	OFFENSES	GROUP A VS. GROUP B	COMPLETED/ ATTEMPTED
IBR/NIBRS	Collects offenses in 24 categories (see page 2).	Collects all data* only on Group A offense (up to 10 offenses); collects only arrest data on Group B offenses	Counts attempted and completed
Summary/UCR	Collects only 9 Part 1 crimes (see page 2)	Collects only a single (most serious) offense of the 9 offenses based on the hierarchy rule	Does not distinguish between attempted and completed
MICR	Collects 104 criminal offenses	Collects all data** on both Group A and Group B offenses (up to 4 offenses).	Counts attempted and completed

* including victim, offender, arrest, offense, and property data.

** including victim, offender, arrest, offense, property, and incident address data.

MICR Offense File Classes to Summary/UCR Conversion

For summary/UCR reporting, a **victim** is counted once using the hierarchy rule and the lesser offense(s) are suppressed when the victim has had multiple offenses committed against them.
