

Notes About the Data

Each year, the Michigan Incident Crime Reporting data is “frozen” on a specific date for purposes of publishing the annual *Crime in Michigan* report. The frozen set was created on March 11, 2020, for the 2019 *Crime in Michigan* publication. Any new crime data or updates to previous data submitted by agencies after the “frozen” date is not published in the report.

Users of these crime statistics must consider that agencies that were unable to submit complete data by the deadline date will show artificially low crime counts in this report. This may happen when an agency experiences a disruption to the submission of their crime data, for example during a period of transition between RMS systems or when programmatic/technical complications interrupt data transfer processes. Therefore, the Michigan Incident Crime Reporting Unit cautions users of the data against performing trend analysis or ranking agencies/cities on the basis of their crime data, especially for those agencies/cities that indicate a significant increase or decrease in crime counts from one year to the next.

Users should also note the following factors when analyzing changes in the volume and types of crimes: missing data, population density, urbanization, composition of the population, stability of the population, modes of transportation, economic conditions, cultural characteristics, family cohesiveness, climate, strength and policies of the criminal justice system, and crime reporting practices of the citizenry.

When used properly, the data provided in this report can significantly contribute to management and planning activities at local, state, and federal levels, especially by state officials, law enforcement agencies, the legislature, and nonprofit organizations. Questions on the proper use of Michigan Incident Crime Reporting statistics can be directed to the Michigan Incident Crime Reporting Unit of the Michigan State Police, Criminal Justice Information Center, at 517-284-3326.
