9-1-1 GIS GRANT PROJECT

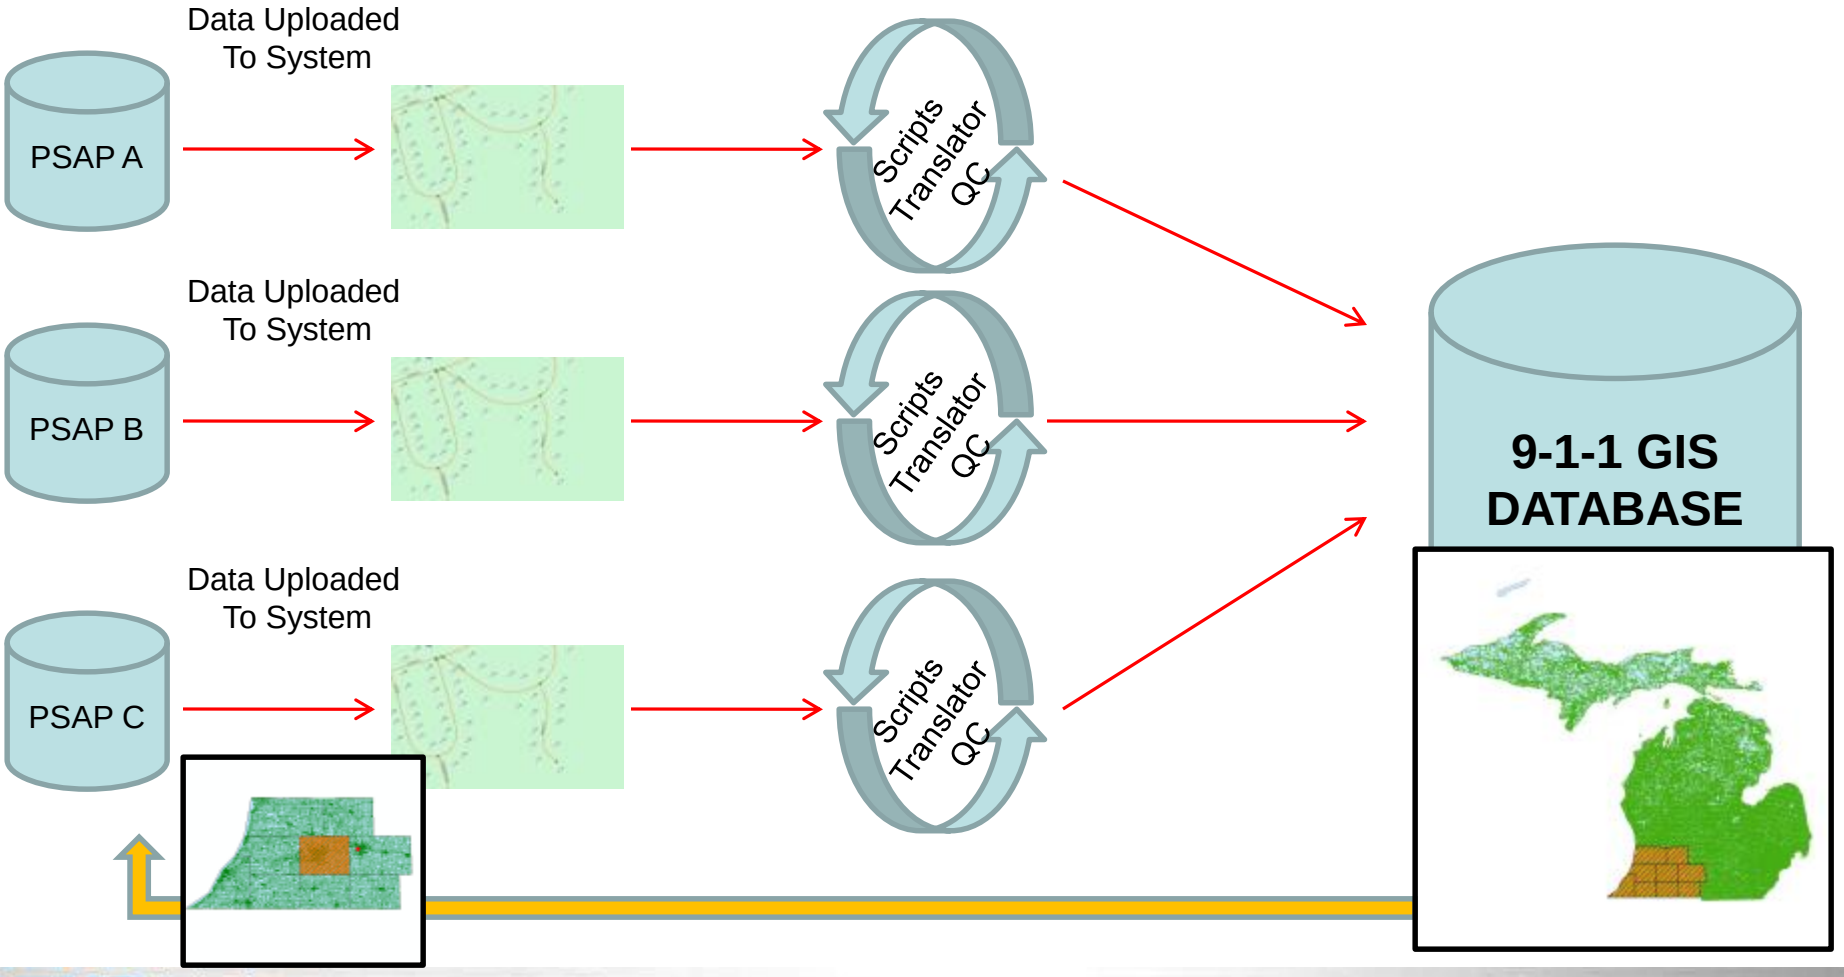
Today's Agenda

- Background
- Region Administration Tool
- Data Viewer
- Import Data Utility
- Export Data Utility
- Red Line Edit Tools
- Questions

ENHANCE 911 Act Grant Project

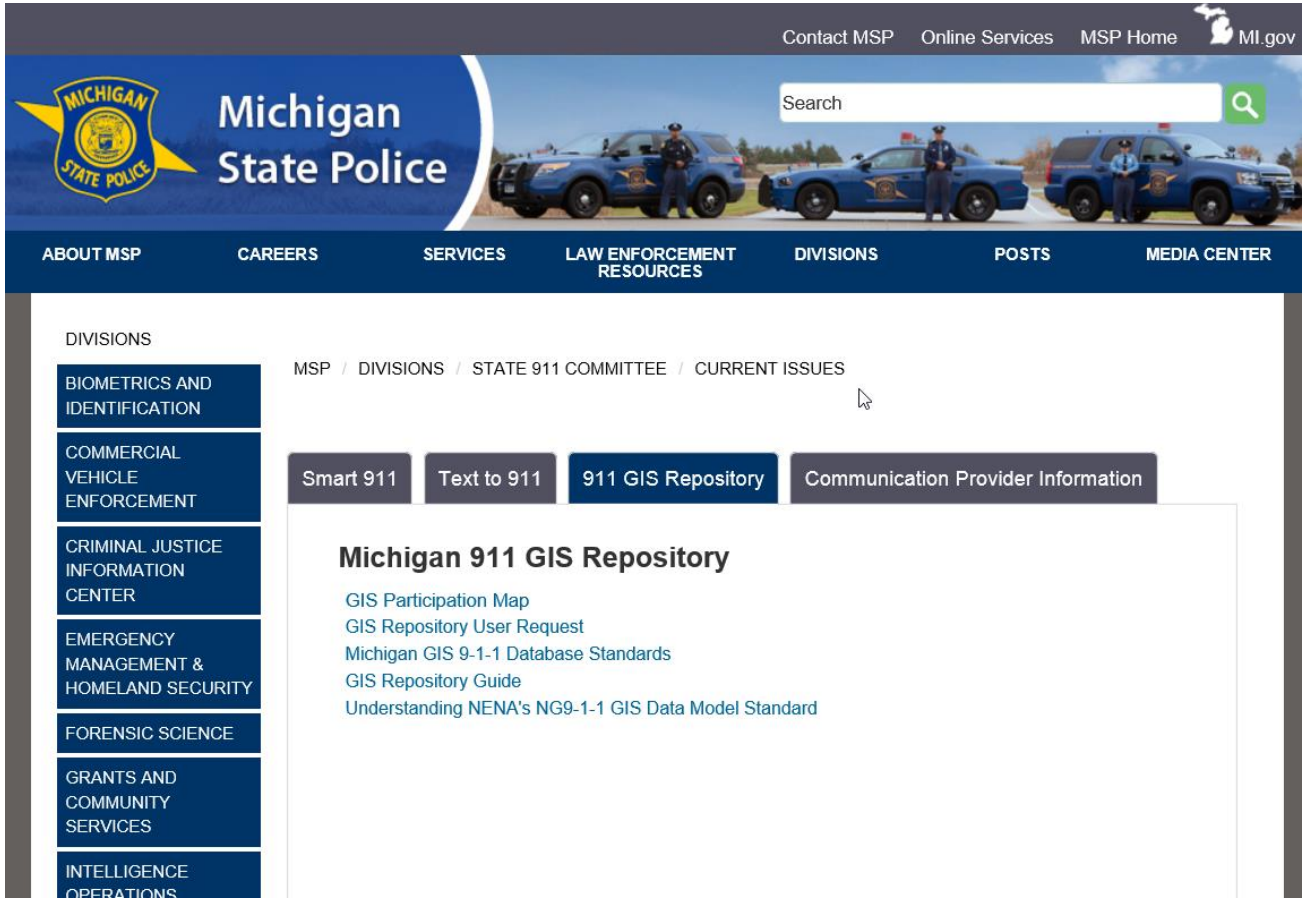
- Created a central 9-1-1 GIS Repository
  - Enabling PSAPs to share GIS information
  - Establishing MOAs
  - Setting standards for GIS data entry
  - Future framework for NG9-1-1 database
- Statewide Public Safety Answering Point (PSAP) Boundary Layer
- Statewide Road Centerline Layer

How does it work?



Relevance in the NG911 environment

911 User Request
michigan.gov/snc



Form is located under “Current Issues”

PSAP Administration Tools

- Each PSAP (with MOU in place) will have primary designated PSAP Administrator
- Each PSAP (with MOU in place) can assign alternate PSAP Administrators
- Internal communication for approval processes needs to be determined locally
  - For example, approving PSAP boundary changes

Roles

PSAP Administrator	This role is established for the person who will be managing the accounts for the users within a specific PSAP jurisdiction. This role will typically be assigned to the 911 Director. This access is limited to PSAPs that are a branch of the entity that is party to the 'memorandum of understanding' for the 911 GIS Repository.
Alternate PSAP Administrator(s)	This role is established for a person to provide a backup role to the PSAP Administrator for assigning logins or accounts. This role will have the same permissions level in the system as the PSAP Administrator.
Data Importer(s)	This role is established for a person who will be providing GIS data updates to the repository system. This role can be assigned to a PSAP staff member, county GIS department staff member or a vendor. This role is typically assigned to the person who is maintaining the GIS data.
Data Exporter(s)	This role is established for a person who will be extracting GIS data from the repository for 911 purposes on a regular basis. For example, the data exporter might be the person who typically integrates GIS data with existing CAD systems.
Restricted Administrator	This role is established as a 'view only' for PSAPs that are not a branch of the government which is party to the 'memorandum of understanding' for the 911 GIS Repository.

911 User Request

STATE OF MICHIGAN
GIS REPOSITORY USER REQUEST

To register application users, the PSAP Director must provide the information in this table and return it via e-mail to armitagem@michigan.gov or fax it to (517) 241-0387, Attn: Mr. Michael Armitage. A description of each role is provided below the table.

911 Repository Role	Name	Organization	Email and phone #
PSAP Administrator			
Alternate PSAP Administrator(s) (Optional)			
Data Importer(s)			
Data Exporter(s)			
Restricted Administrator			

Name:_____ Signature: _____

If you have any questions or concerns about this process, please contact:
Mr. Michael Armitage, armitagem@michigan.gov at MSP at (517) 241-2809, fax (517) 241-0387 or
Mr. Mark Holmes, holmesm3@michigan.gov at CSS at (517) 373-7910, fax (517) 373-2939.

PSAP Administrator – This role is established for the person who will be managing the accounts for the users within a specific PSAP jurisdiction. This role will typically be assigned to the 911 Director. This access is limited to PSAPs that are a branch of the entity that is party to the 'memorandum of understanding' for the 911 GIS Repository.

Alternate PSAP Administrator(s) (optional) – This role is established for a person to provide a backup role to the PSAP Administrator for assigning logins or accounts. This role will have the same permissions level in the system as the PSAP Administrator.

Data Importer(s) – This role is established for a person who will be providing GIS data updates to the repository system. This role can be assigned to a PSAP staff member, county GIS department staff member or a vendor. This role is typically assigned to the person who is maintaining the GIS data.

Data Exporter(s) – This role is established for a person who will be extracting GIS data from the repository for 911 purposes on a regular basis. For example, the data exporter might be the person who typically integrates GIS data with existing CAD systems.

Restricted Administrator- This role is established as a 'view only' for PSAPs that are not a branch of the government which is party to the 'memorandum of understanding' for the 911 GIS Repository.

9-1-1 GIS GRANT PROJECT

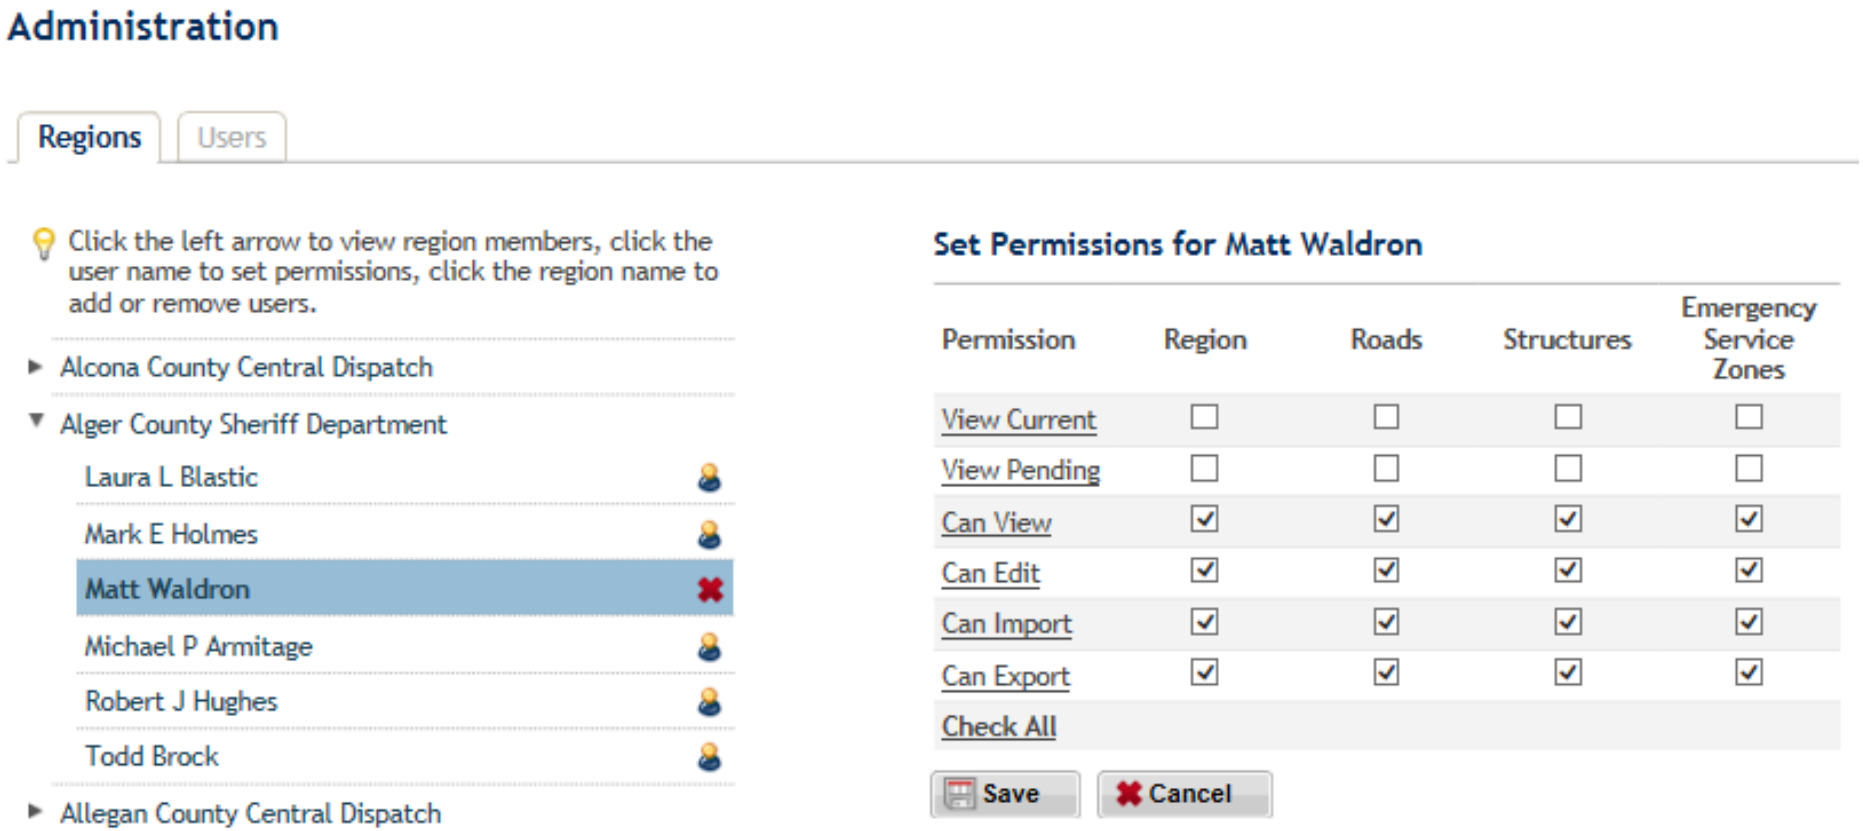
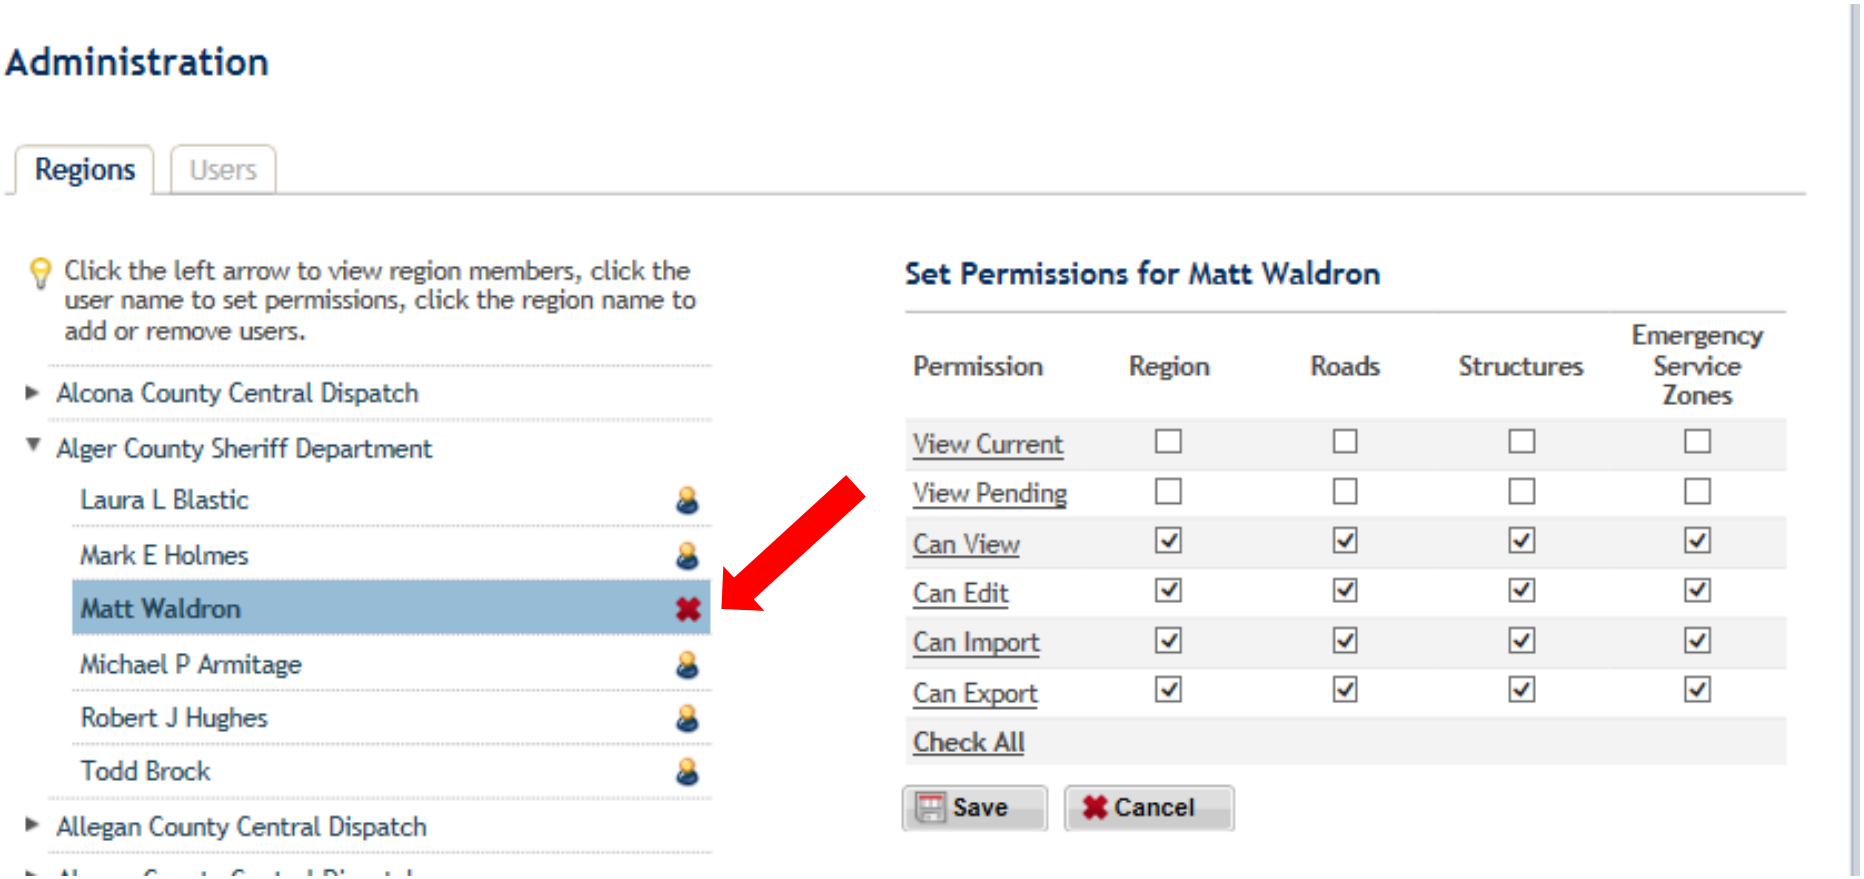
Region Administration Tools: Permissions



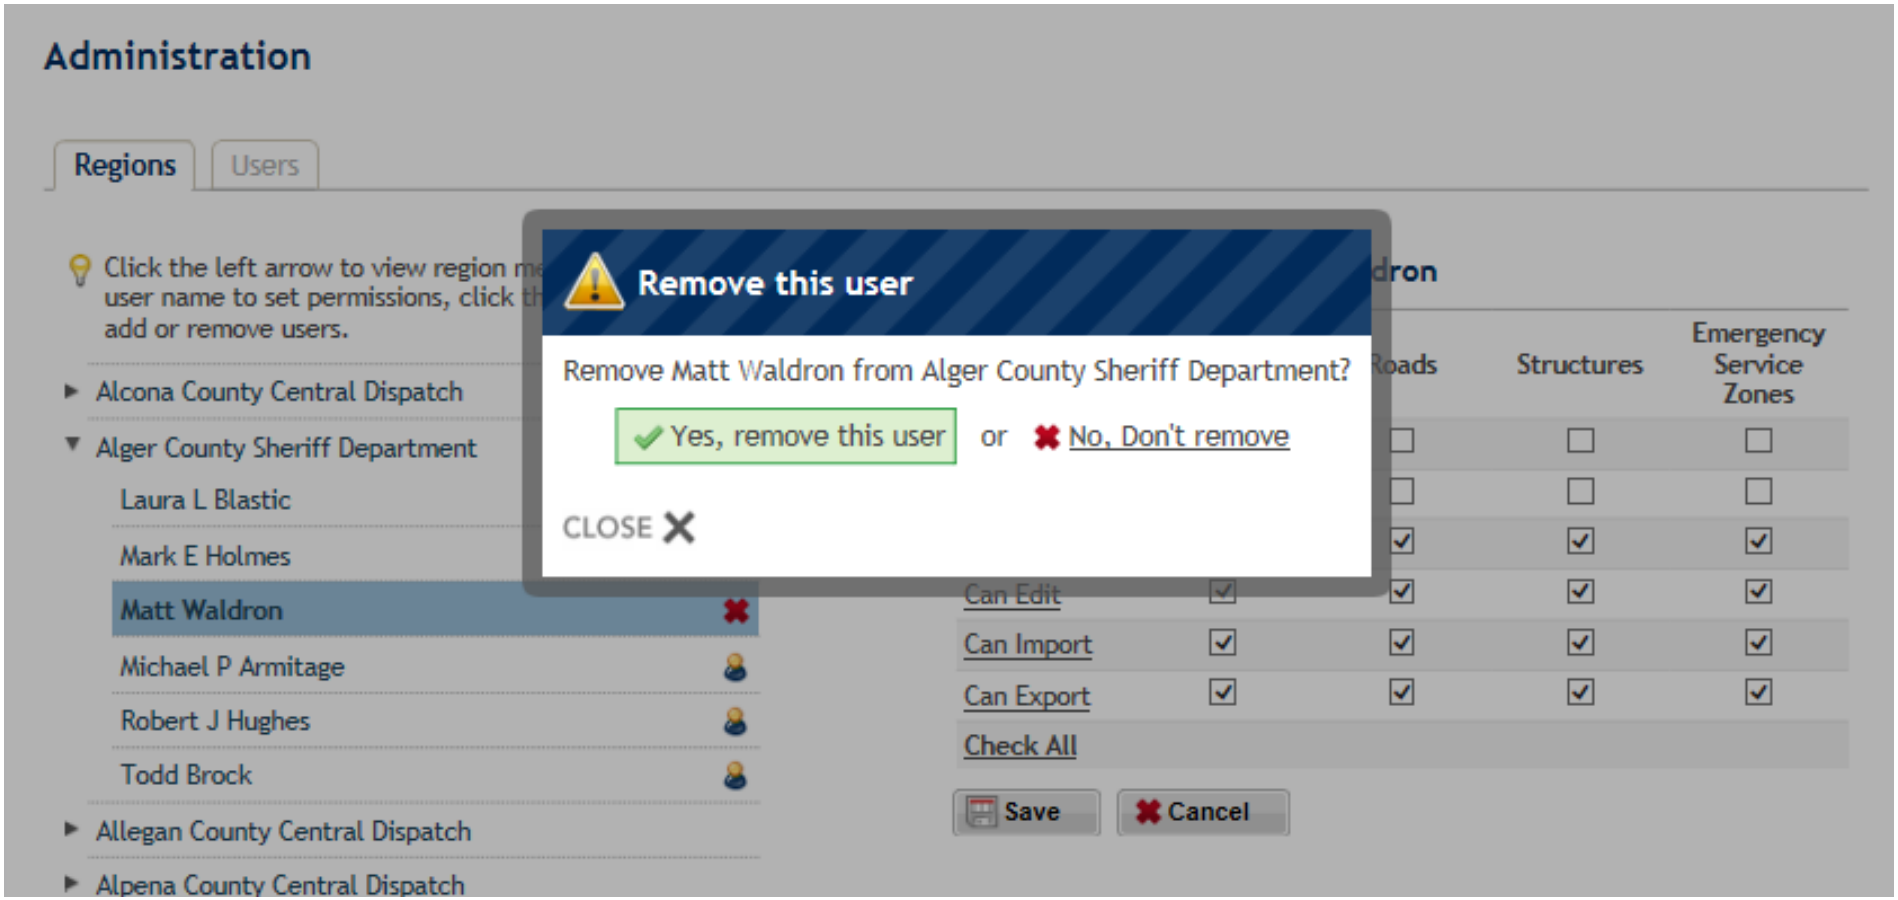
PSAP Administration: Remove User from PSAP

- Removing User Accounts
  - Rights are removed by PSAP Administrator
  - Account is Disabled by System Administrator – request needs to be submitted by PSAP Administrator
  - Can be Re-Enabled If User Goes to Work at Another PSAP

Removing User Accounts



Removing User Accounts



PSAP Administration Tools

- Requesting Data Export Rights for User

PSAP A

PSAP Administrator Sends Request for CAD Administrator to have Export Rights for Neighboring County

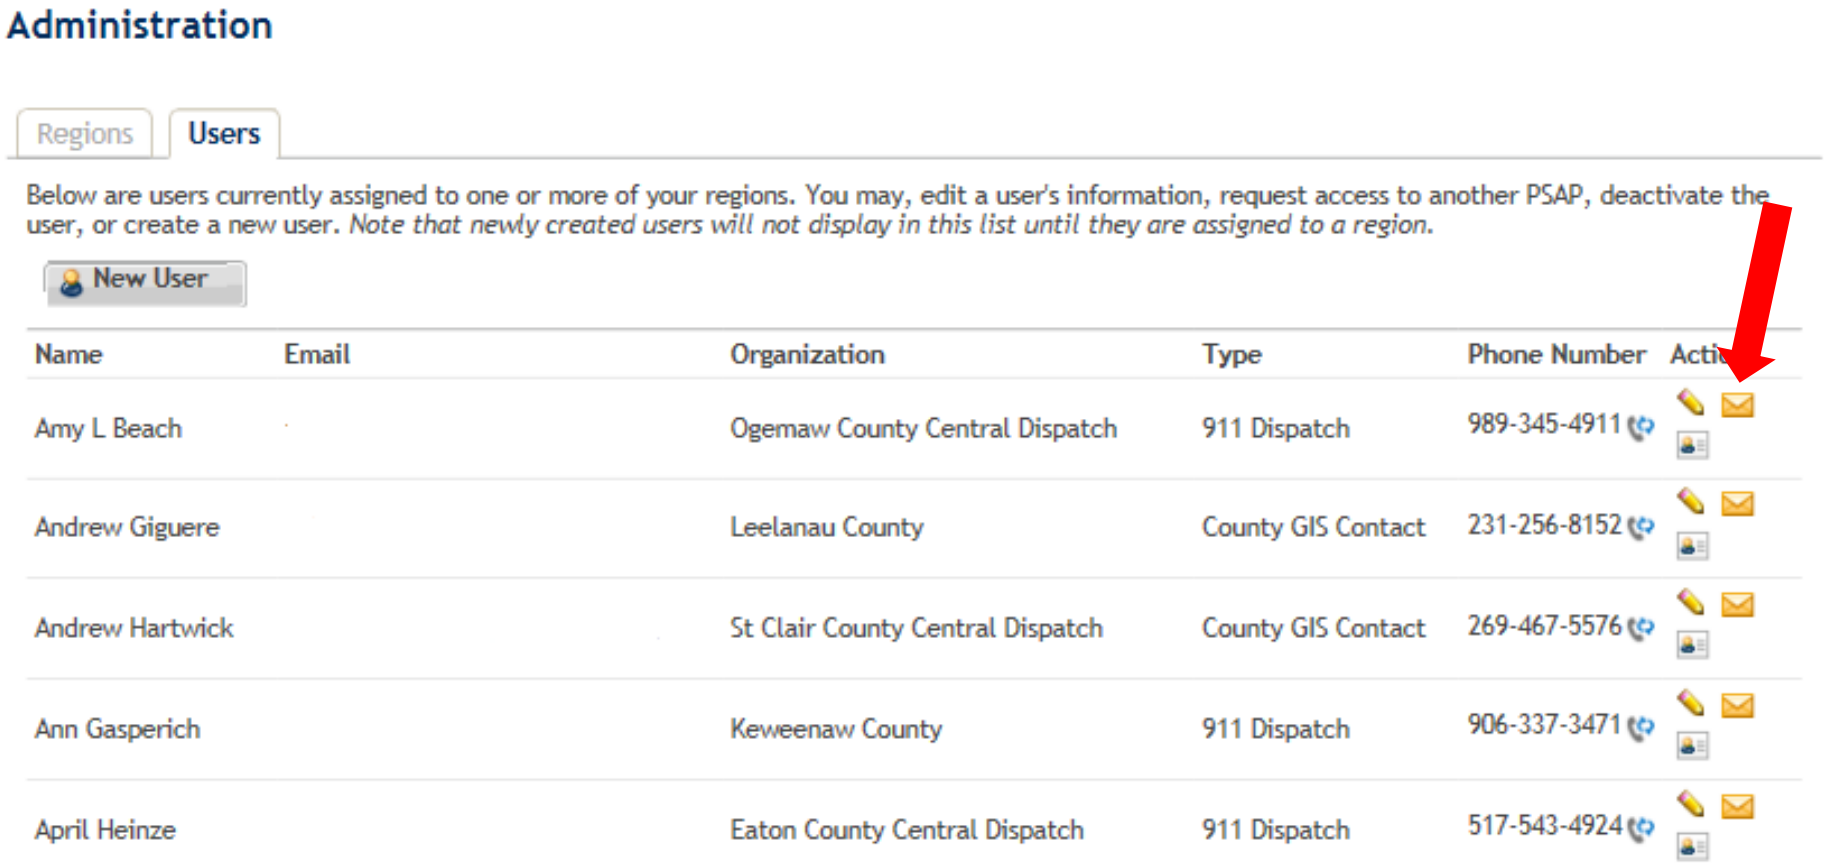
PSAP B

PSAP Administrator Receives Email to Log into System and Grant User Export Rights to PSAPs Data

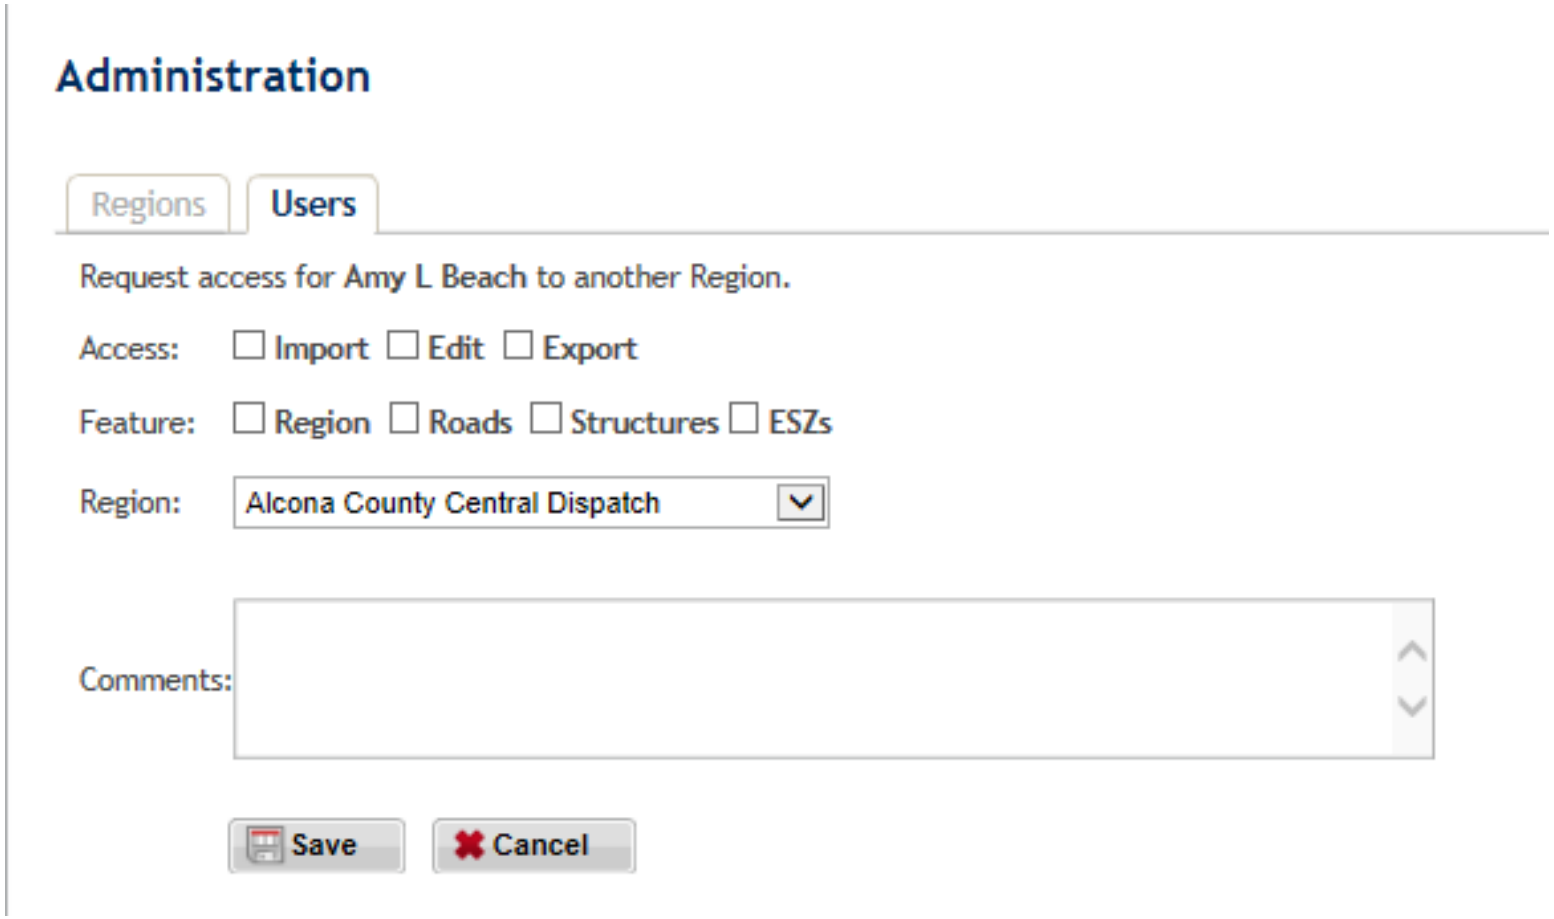
PSAP Administrator and CAD Administrator Receive Status Email

PSAP Administrator Approves or Denies Export Privileges

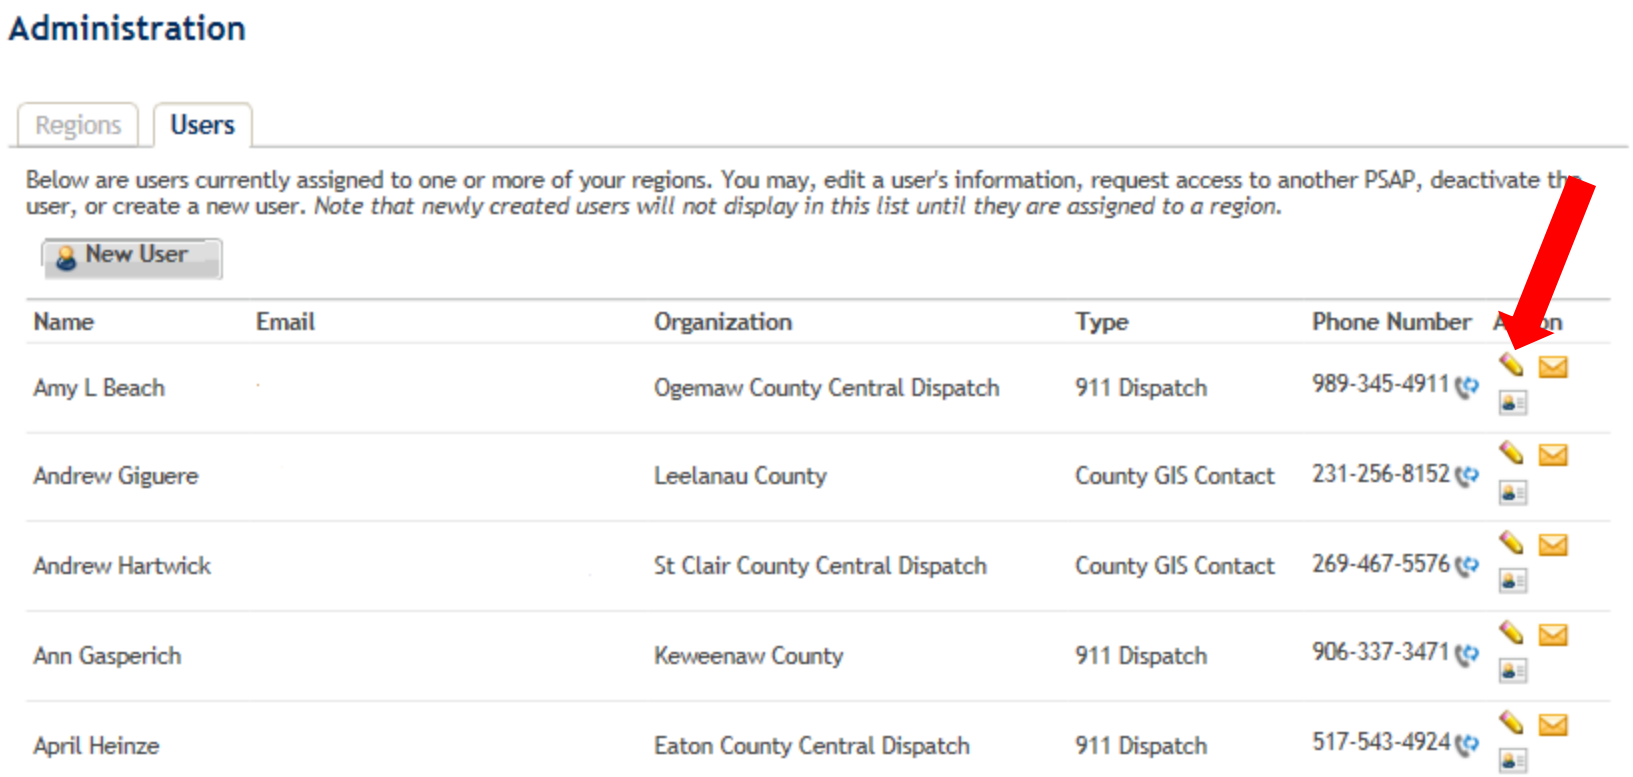
PSAP Administration: Requesting Permission



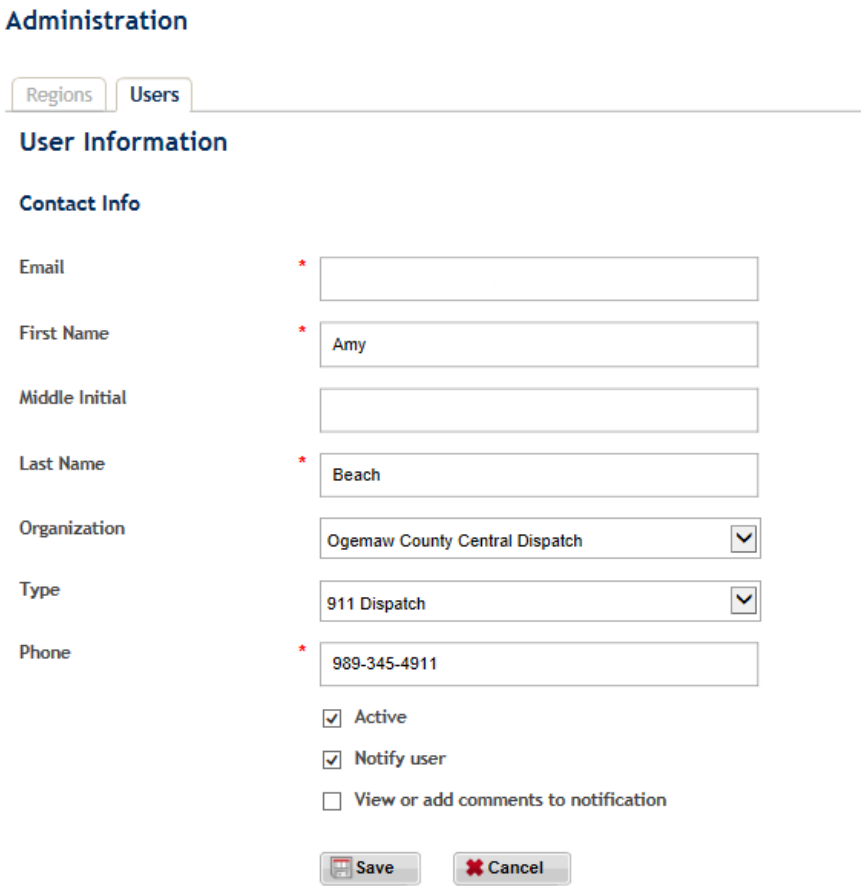
PSAP Administration: Requesting Permission



PSAP Administration: USERS



PSAP Administration: USERS



Data Sharing and Agreements

- Enhanced Access to Public Records Act
  - DTMB Policy Developed Specific to Project
    - Local Participant Will Need a Local Enhance Access to Public Records Act Policy
    - Project Can Provide Examples of Enhance Access to Public Records Act Policies – If Local Participant Does Not Have One in Place
- Memorandum of Agreement Between CSSTP and Each Participating Entity
    - Outlines Roles and Responsibilities of CSSTP and Participants
    - Established Disclaimers for Data Sharing
    - Signed Agreement

Data Sharing and Agreements

- Exported Data Can Only Be Used for 9-1-1 and Public Safety Purposes

The purpose of this MOA is to establish a mutual framework governing the respective organizational relationships, responsibilities, and activities between the parties. This agreement is for the utilization of GIS data for 9-1-1 and public safety purposes within a statewide 9-1-1 GIS repository developed by CSSTP (9-1-1 GIS Program).

Data Requests - FOIA

- Third Party Requests Data From CSSTP

Third Party Makes a FOIA Request for Data Covering 6 jurisdictions

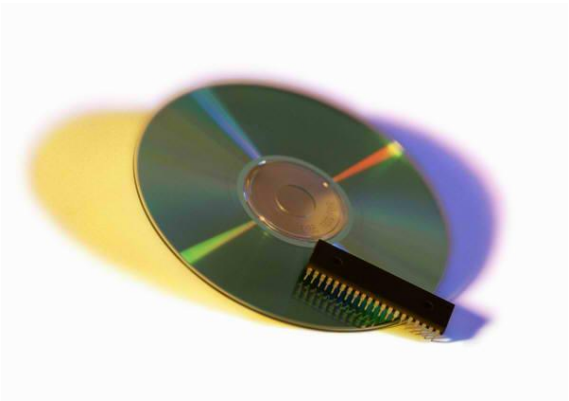
CSSTP

CSSTP References Local Enhanced Access to Public Records Policy For GIS Data Fee Schedules

Fees are totaled for all 6 jurisdictions plus any administration fees and third party must pay CSSTP to receive data extract

Data Requests - FOIA

- Third Party Requests Data From CSSTP



Once third party pays costs
CSSTP releases data to third party

Local fees are reimbursed by
CSSTP to each local jurisdiction

Data Requests - FOIA

- Third Party Requests Data From a Local Jurisdiction

Third party makes a FOIA request for data covering 6 other jurisdictions that the local jurisdiction has downloaded into its local systems

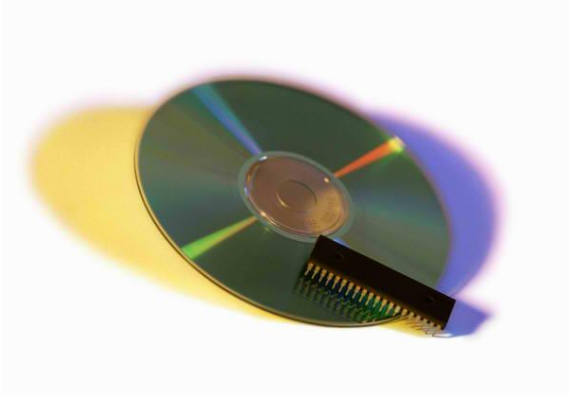
Local Jurisdiction

Local Jurisdiction References Local Enhanced Access to Public Records Policy For GIS Data Fee Schedules

Fees are totaled for all 6 jurisdictions plus any administration fees and third party must pay local jurisdiction to receive data extract

Data Requests - FOIA

- Third Party Requests Data From Local Jurisdictions



Once third party pays costs local jurisdiction releases data to third party

Local fees are reimbursed by local jurisdiction that received the request to each of the 6 other local jurisdictions

Data Viewer

- Potential Uses
  - Only available for public safety via secure log in
  - The data viewer could benefit PSAPs where mapping does not currently exist for dispatch
  - The data viewer can be used to search addresses in other jurisdictions
  - Supplemental map to existing systems
  - Accessible via wireless in field or mobile command
  - Can be accessed in an EOC during large incident crossing multiple jurisdictions

Import Data

- Exception Field
  - Add a field called EXCEPTION to your local data – Long Integer Data Type

Exception Code	Exception Description
1	Limited Access Highway Features
2	Driveways or Non-Addressable Feature
3	Legacy Addressing Scenario
4	Local Road Naming Convention
5	Value Falls Outside of Jurisdiction
6	Correction Pending Local Review
7	Overlapping Segment Is Valid

Import Data

- RCLIDs – Need to be populated and unique
  - Can use any local unique ID locally needs to be compatible for upload into alphanumeric field type with a 50 character limit
  - Populate using OBJECTID or FID during import process or calculate that field to OBJECTID or FID in your local data

Import Data

- QA/QC check similar to data assessments that were run as part of grant project
- Additional field checks during import
  - Jurisdiction values
  - Source and date of update
- Critical Errors – That would prevent loading of data – no projection file, no RCLID, data types

Export Data

- User needs to have been assigned export rights to export any other jurisdiction's dataset
- PSAP Administrator must initiate request for one of their users to have export rights to neighboring jurisdiction's data
- PSAP Administrators have export rights to all dataset as a system setting
  - Allows for access to datasets in case of large emergency event

Terms and Conditions: As a data exporter you are agreeing to abide by the terms and conditions outlined in the Memorandum of Agreement for this 9-1-1 GIS data repository. The terms of the memorandum of agreement (MOA) outlines that the signed agreement is for the utilization of GIS data for 9-1-1 and public safety purposes within a statewide 9-1-1 GIS repository developed by CSSTP (9-1-1 GIS Program). All terms of GIS data use outlined in your agency's MOA with CSSTP must be adhered to. These include but are not limited to the following requirements:
Data originators participating in the 9-1-1 GIS repository authorize their 9-1-1 GIS data to be used by other PSAPs that are participating in the 9-1-1 GIS Program and who may request regional datasets to be used in their 9-1-1 systems.
In the event that a third party requests data, one of the following three scenarios will also apply:
1) If your agency receives a request for your own data, that request shall be subject to your Enhanced Access to Public Records policy. There is no need for the request to go through or be approved by DTMB/CSSTP.

Export Data

- CAD profiles
- Working with your CAD vendor to integrate regional maps
- Review edge-match, when possible and coordinate with neighboring jurisdictions where larger discrepancies exist
- Data layers – road centerlines, PSAP boundaries, emergency services zones*, structure points* (* incomplete statewide layers)

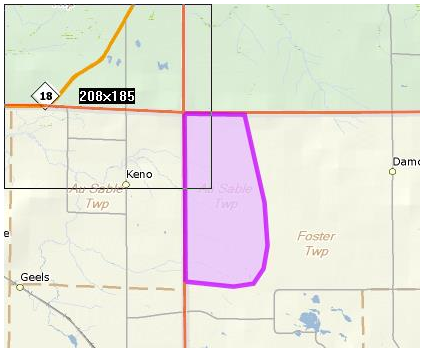
Red Line Edits- PSAP Boundary

- PSAP Boundary Change Requests
  - Internal communication must be established at local level for approval process
  - Jurisdictions where Michigan Geographic Framework road centerlines are being use have opportunity to use the PSAP Boundary Change tools to make requests or approve changes since PSAP layer developed for the project is statewide

Red Line Tools – PSAP Boundary

- Requesting PSAP Boundary Change

PSAP A



PSAP B

PSAP Administrator
Makes Red Line Edit and Starts Approval Workflow

PSAP Administrator
Receives Email to Log into System and Approve PSAP Boundary Change

PSAP Administrator Receives Status Email

PSAP Administrator
Approves or Denies
PSAP Boundary Change

Red Line Tools – PSAP Boundary

- Requesting PSAP Boundary Change

CSSTP

If Approved by All Affected PSAPs. CSSTP Staff Make Boundary Change and Workflow Sent for Final Approval By All PSAPS Affected By Change

PSAP Administrator Receives Status Email

Affected PSAPs

PSAP Administrators Receive Email to Log into System and Review Final Boundary Edits And Make Final Approval

PSAP Administrator Approves or Denies PSAP Boundary Change

Red Line Edits- PSAP Boundary

Demonstration

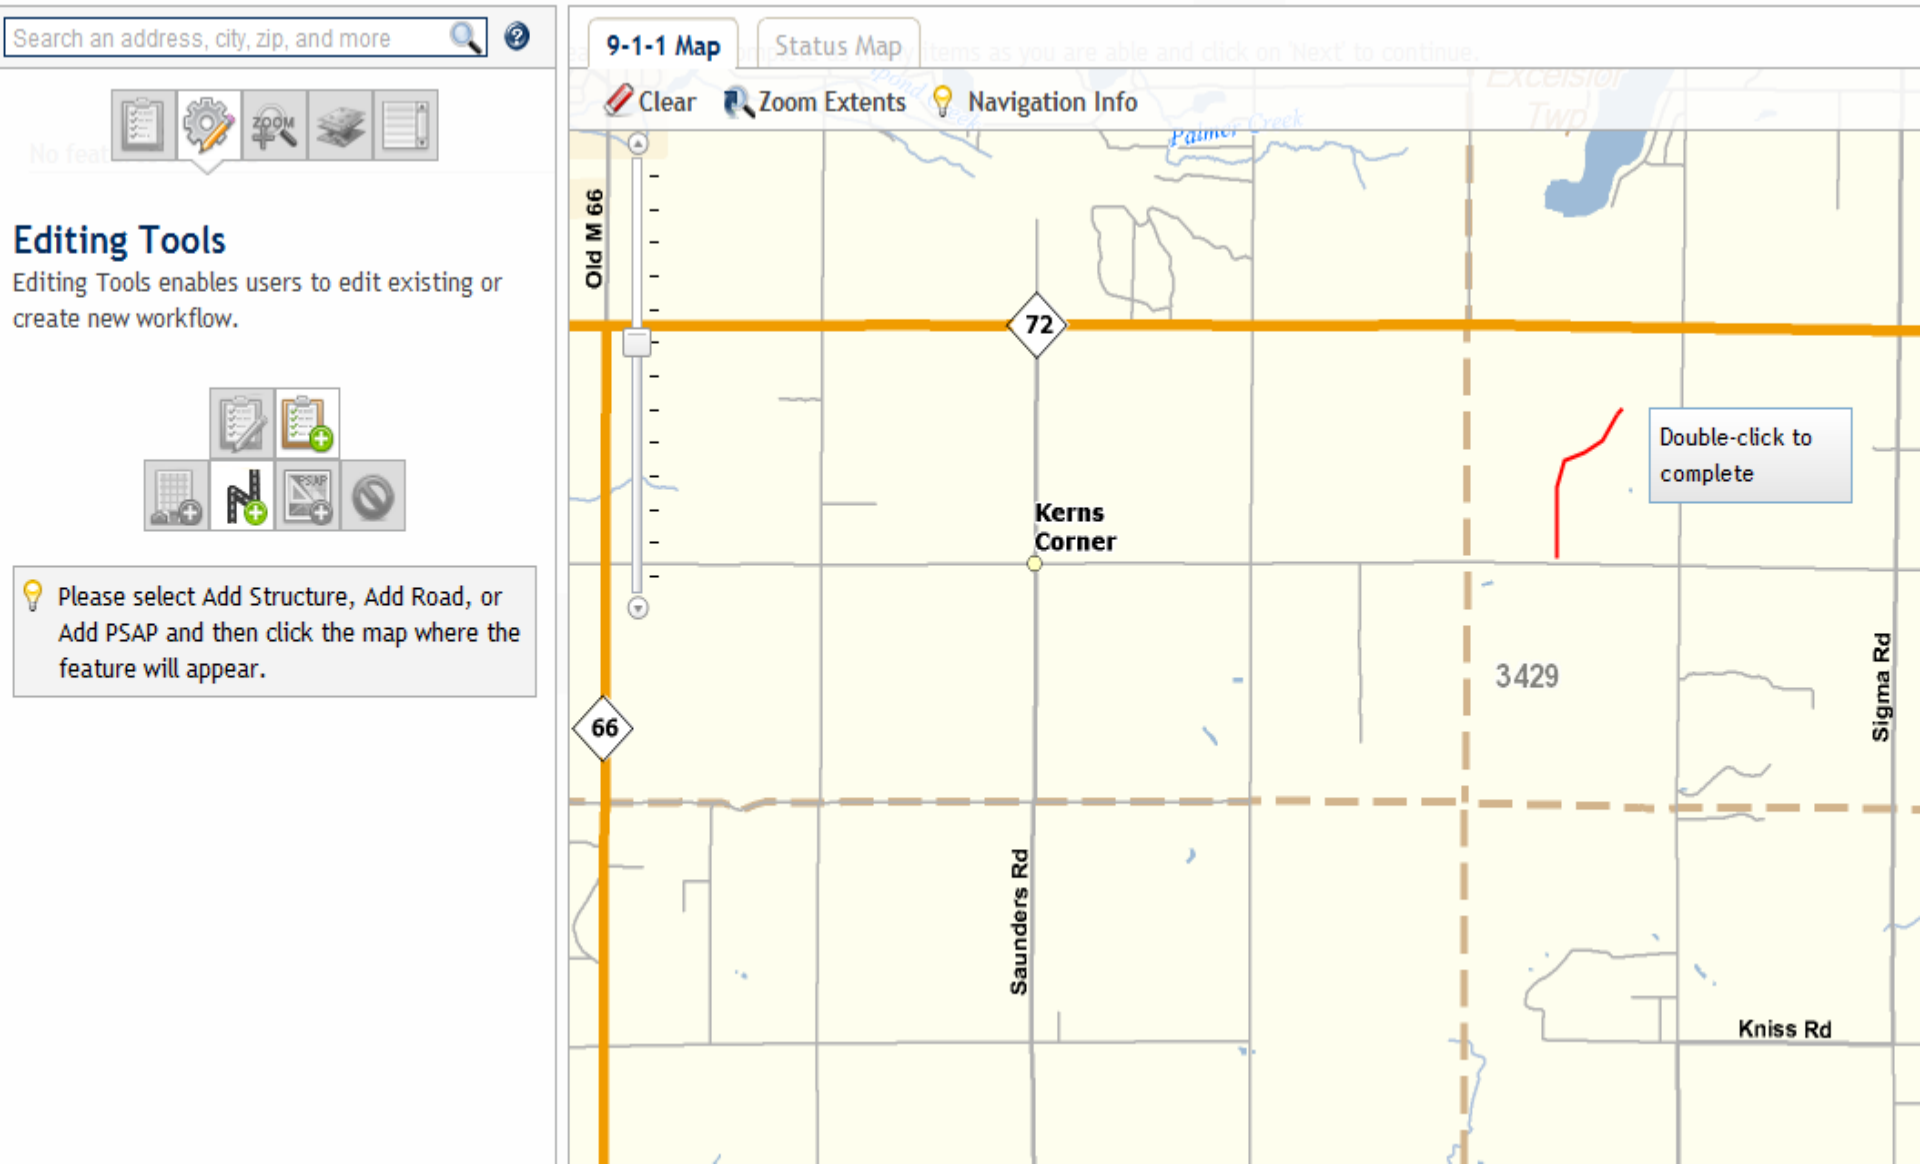
Red Line Edits – Roads or Points

- All users can add red line edits for road or structure points
  - Internal protocol for who red lines can be established, if necessary
  - Notification email goes to PSAP admin and GIS importer for the jurisdiction that the red line is drawn
  - If road is drawn across multiple PSAP jurisdictions, PSAP admin and GIS importer from both jurisdictions get notifications

Red Line Edits – Roads or Points

Demonstration

Red Line Edits – Roads or Points

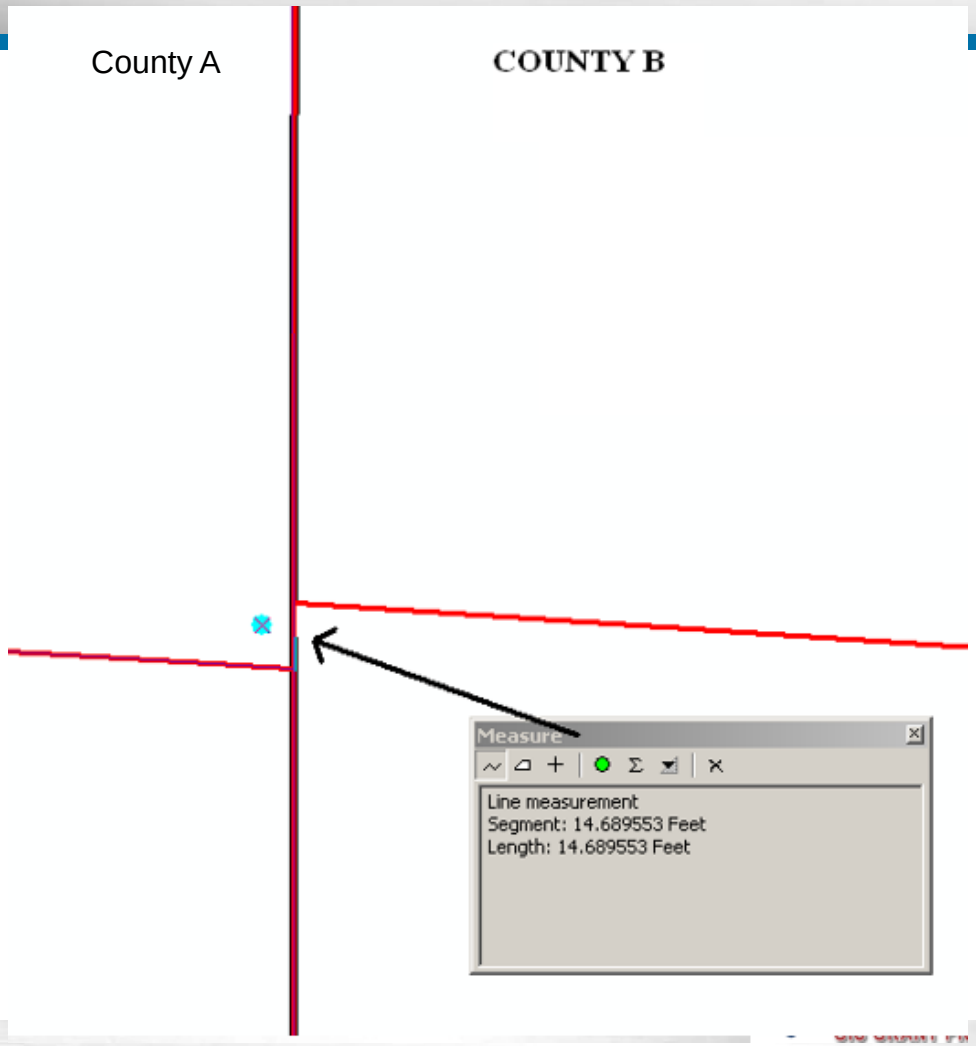


Edge-matching

- Edge-matching is run during import. Roads are snapped to PSAP boundary layer
- Continued coordination between jurisdictions for edge-matching and addressing attributes along boundaries is also a NENA recommendation for sustaining long-term 9-1-1 GIS data integrity in preparation for NG9-1-1

Edge-matching

Edge-matching



Addressing Guide

- Guidelines for addressing techniques
- Continue to incorporate standardization
- Road naming guidelines
- Addressing scenarios
- There will be unique local addressing scenarios
- GIS and MSAG synchronization
