

Come train with us on a
**NEW PORTABLE
HAZMAT TANKER
SIMULATOR**

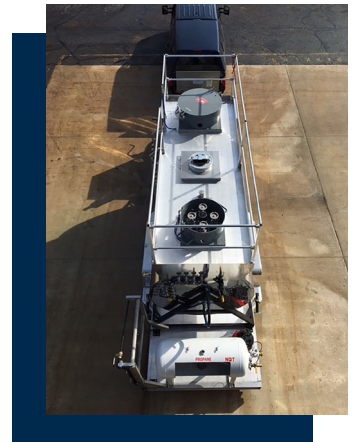

The Portable Hazmat Tanker Simulator S-10 was uniquely designed for training response personnel statewide in rail car, confined space, and roadway tanker hazmat emergencies. Multiple simulations allow for single objective, as well as more complex multi-objective scenarios. The Portable Hazmat Tanker is extremely versatile, allowing users the ability to produce many hazmat scenarios, such as: a chlorine dome leak, a gasoline dome leak, multiple tank fuel leaks, bonding and grounding simulation, and 90-degree rolled tank car simulation, chlorine kits A, B, C, MC 331 overview, Betts valve application, just to name a few.

Option 1: Base Price \$900* per day statewide

This prop is delivered to your location along with a knowledgeable staff member to assist with hands-on training and to ensure all safety measures are followed.

Option 2: Base Price \$1,400* per day statewide

You select specific scenarios for your team to be evaluated on by knowledgeable staff and then a post evaluation report is created. Team training may also be provided to meet the needs of the team. Hazardous Materials refresher training certificates will be provided.

*Pricing for public sector departments
