

Sample Winter Driving Posts:

1. Myth: The lower the temperature, the more slippery the road. Fact: Roads are most slippery when the thermometer hovers around freezing. Black ice is deadly! Do you know the myths and facts about winter driving?
2. The primary cause of most winter crashes is drivers traveling too fast for the roadway conditions. Drive slow on ice and snow.
3. Myth: "When it starts snowing, all I need is an extra car length to stop." Fact: It can take up to 10 times longer to stop in snowy or icy weather.
4. It can take up to 10 times longer to stop in snowy or icy weather. Driving slow on snowy and icy roads allows the driver a longer reaction time.
5. Myth: "Using cruise control during the winter is no big deal." Fact: A sudden loss of traction could cause wheels to slip, making the car skid. In winter months, keep cruise control off. Do you know the myths and facts about winter driving?

- 6.
7. Myth: Anti-lock brakes stop you faster on snow and ice. Fact: This isn't always true. Anti-lock brakes help you to steer while braking, giving you better control in panic situations. But don't think they are better in all situations.
