

Water Cabinet

Michigan Water Strategy

The Water Strategy is a collaboratively-developed, 30-year plan for the sustainable use, management and protection of Michigan’s water resources. More information is available at www.michigan.gov/waterstrategy.

About the Water Cabinet

Development of the Water Strategy involved a substantive advisory process. The final plan was greatly enhanced by advice received from an ad-hoc external advisory council known as the Water Cabinet, convened to provide experience and knowledge in a variety of subject areas. The group was invited to continue to meet to discuss Water Strategy implementation and priorities.
