

Pandemic Influenza Safe Work Practices

- **[Model Pandemic Influenza Safe Work Practice](#)**
The objective of this model and guideline is to assist departments in the developing and implementing their own PISWP for respiratory illness outbreaks.
- **[Pandemic Influenza Job Safety Analysis and Trigger Point Matrix Procedure at http://www.michigan.gov/documents/ose/Pandemic_Influenza_Job_Safety_Analysis_and_Trigger_Point_Matri_287130_7.pdf](http://www.michigan.gov/documents/ose/Pandemic_Influenza_Job_Safety_Analysis_and_Trigger_Point_Matri_287130_7.pdf)**
A Pandemic Influenza Job Safety Analysis (JSA) is an assessment of the work activities. A Trigger Point Matrix lists the appropriate types safe work practices and measures suitable to meet the unique needs of each department.
