**Re: Michigan Public School Employees' Retirement System - Actuarial Valuation
as of September 30, 2018**

Dear Board Members:

The results of the September 30, 2018 annual actuarial valuation of the Michigan Public School Employees' Retirement System (MPERS) pension benefits are presented in this report. The purpose of the valuation was to measure the System's funding progress, to determine the employer contribution for the 2020-2021 fiscal year, and to provide actuarial information for the System's financial report. The report should not be relied upon for any other purpose. This report may be provided to parties other than the Office of Retirement Services only in its entirety and only with the permission of the Office of Retirement Services. GRS is not responsible for unauthorized use of this report.

The valuation was based upon information furnished by the Office of Retirement Services concerning Retirement System benefits, financial transactions, and active members, terminated members, retirees and beneficiaries. Data was checked for internal and year-to-year consistency, but was not audited by us. As a result, we are unable to assume responsibility for the accuracy or completeness of the data provided. Year 2005 and prior years' valuation results back to 1993 were not prepared by GRS and are presented for comparison with the current year's results.

The valuation summarized in this report involves actuarial calculations that require making assumptions about future events. We believe that the assumptions and methods used in this report are reasonable and appropriate. However, other assumptions and methods could also be reasonable and could result in materially different results. Some of the numbers in this report are rounded. The use of the rounded numbers for plan liabilities should not imply a lack of precision. In addition, because it is not possible or practical to consider every possible contingency, we may use summary information, estimates or simplifications or calculations to facilitate the modeling of future events. We may also exclude factors or data that we deem to be immaterial.

Future actuarial measurements may differ significantly from those presented in this report due to such factors as experience differing from that anticipated by actuarial assumptions, changes in plan provisions, actuarial assumptions/methods or applicable law. Due to the limited scope of this assignment, we did not perform an analysis of the potential range of future measurements. This valuation was based on the assumption that the plan sponsor will continue to be able to make any contribution necessary to fund the plan in the future. A determination of the plan sponsor's ability to make the necessary contributions in the future is beyond the scope of our expertise and was not performed by us.

To the best of our knowledge, this report is accurate and fairly presents the actuarial position of the Retirement System. The valuation was conducted in accordance with standards of practice prescribed by the Actuarial Standards Board and in compliance with the applicable State statutes. Mita D. Drazilov and Louise M. Gates are independent of the plan sponsor and are Members of the American Academy of Actuaries (MAAA) who meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein. It is our opinion that the actuarial assumptions used for the valuation produce results which are reasonable.

Sincerely,

Mita D. Drazilov, ASA, FCA, MAAA

Louise M. Gates, ASA, FCA, MAAA

Executive Summary/Board Summary

1. Required Employer Contributions to Support Retirement Benefits

The computed employer contribution for fiscal year 2021 is shown below. Computed contributions are shown as a percentage of active member payroll and as the projected fiscal year 2021 dollar amount.

	Total Computed Employer Contribution			
	Non-Hybrid Members	Hybrid Members		Weighted Average
		Pension Plus Plan (PPP)	Pension Plus 2 Plan (PPP2)	
As a Percentage of Active Member Payroll				
Normal Cost	6.39 %	3.43 %	6.20 %	5.94 %
UAAL Amortization Payment	26.70	26.70	26.70	26.70
As an Annual Dollar Amount				
Normal Cost	\$ 401,199,336	\$ 40,532,371	\$ 19,642,104	\$ 461,373,811
UAAL Amortization Payment	<u>1,706,027,472</u>	<u>315,514,372</u>	<u>377,239,976</u>	<u>2,398,781,820</u>
Total	\$ 2,107,226,808	\$ 356,046,743	\$ 396,882,080	\$ 2,860,155,631

This valuation report establishes the employer contribution for fiscal year 2021. As a result of Public Act 300 of 2012 and the introduction of the defined contribution (DC) plan option, the employer normal cost rate (i.e., 5.94%) is expressed as a percentage of the defined benefit (DB) plan payroll, while the Unfunded Actuarial Accrued Liability (UAAL) amortization payment rate (i.e., 26.70%) is expressed as a percentage of total payroll (i.e., including both DB and DC plan active member payroll).

2. Public Act 181 of 2018

A brief summary of the plan changes resulting from Public Act 181 of 2018 follows:

- (1) For purposes of amortizing the UAAL, the legislation requires a transition from level percentage of payroll amortization to level dollar amortization by reducing the payroll growth assumption for amortization purposes according to the following schedule: 3.50% for the September 30, 2017 and 2018 valuations, dropping 0.50% each subsequent year starting with the September 30, 2019 valuation, until an ultimate payroll growth assumption for amortization purposes of 0.00% is reached beginning with the September 30, 2025 valuation.
- (2) ORS is allowed to reduce the payroll growth assumption in 25 basis point increments, rather than in 50 basis point increments, if the cost of reducing the payroll growth assumption by 50 basis points would increase the amortization payment by more than 7% of the prior year's UAAL payment.
- (3) The basis over which the UAAL contribution rate will be applied is changing to payroll adjusted by the growth rate of "payroll plus purchased services." (Public Act 512 of 2018 later reversed this provision.)
- (4) The UAAL contribution floor is changing from a rate floor to a dollar floor starting with the employer contributions in fiscal year 2022.

Executive Summary/Board Summary

3. Public Act 92 of 2017

A brief summary of the plan changes resulting from Public Act 92 of 2017 follows:

- (1) Individuals that become members of MPSERS on or after February 1, 2018 (sometimes referred to as new hires) have the one-time choice between a DC plan and a new Hybrid plan referred to as the PPP2. The DC plan has an employer contribution of 4% of pay plus a 100% employer matching provision up to an additional 3% of a member's pay. The PPP2 is similar in nature to the Pension Plus Plan (PPP), with the following exceptions:
 - a. The employer and member normal cost contribution rates are based upon a 50/50 cost sharing arrangement.
 - b. The employer and member contribution rates associated with financing any UAAL are based upon a 50/50 cost sharing arrangement.
 - c. The MPSERS Board of Trustees has the ability to raise the normal retirement age (currently age 60) for active members if the life expectancy for a 65-year-old (based upon a unisex blend of 50/50) increases by a certain amount. The review of the age 65 life expectancy is based upon the mortality tables adopted as part of the normal 5-year Experience Study process. If a change to the normal retirement age is adopted, certain members who are near the then current retirement age would not be subject to the updated normal retirement age.
 - d. Changes to the UAAL are amortized over a 10-year period using level dollar amortization.
 - e. The discount rate for actuarial valuation purposes is 6%.
- (2) The default election for a new hire is the DC plan.
- (3) If the actuarial funded ratio of the PPP2 falls below 85% for two consecutive actuarial valuations, the PPP2 has the potential of being closed to new hires going forward. The actuarial funded ratio is based upon the actuarial value of assets (i.e., 5-year smoothing of investment returns).
- (4) Members hired on or after February 1, 2013 who selected the DC plan receive the enhanced employer contribution structure of the new DC plan. Members hired before February 1, 2013 who selected the DC plan as part of the Public Act 300 (PA 300) reform do not receive the enhanced employer contribution rate structure. (Public Act 169 of 2018 later extended the enhanced DC structure to members hired before February 1, 2013 who selected the DC plan as part of PA 300.)
- (5) Beginning with the State's fiscal year ending September 30, 2018:
 - a. The normal cost contribution rate must not be less than the normal cost contribution rate in the immediately preceding State fiscal year.
 - b. The contribution rate associated with financing the UAAL must not be less than the contribution rate associated with financing the UAAL in the immediately preceding State fiscal year. This provision is applicable until such time as the UAAL is "paid off."

Executive Summary/Board Summary

4. Public Act 300 of 2012

A brief summary of the plan changes resulting from Public Act 300 of 2012 follows:

Basic and Member Investment Plan (MIP) active members were given the following options to increase, maintain, or cease their contributions to the pension plan:

- (1) Increase their member contribution rate to the pension fund and maintain the 1.5% benefit multiplier in their pension formula for service accrued after the transition date (i.e., February 1, 2013). Basic member contributions increased to 4% (from 0%). MIP member contributions increased to a flat 7% (from 3.9% for MIP-Fixed, from a graded percentage up to 4.3% for MIP-Graded, and from a graded percentage up to 6.4% for MIP-Plus).
- (2) Increase their member contribution rate (as noted above) and maintain the 1.5% benefit multiplier in their pension formula for service accrued after the transition date until they reach 30 years of service. Upon reaching 30 years of service, their member contribution rate would return to their current level (pre-Public Act 300 of 2012), and their pension formula for service in excess of 30 years would be based upon a 1.25% benefit multiplier.
- (3) Maintain their current member contribution rate to the pension fund. The pension formula for years of service before the transition date is based upon a 1.5% benefit multiplier, while the pension formula for years of service after the transition date is based upon a 1.25% benefit multiplier.
- (4) Cease member contributions to the DB portion of the pension fund. In this circumstance, the member would no longer receive future benefit accruals in the DB plan and would become a participant in the DC plan. The pension formula for years of service before the transition date is based upon a 1.5% benefit multiplier. The member's final average compensation would be frozen as of the transition date.

Executive Summary/Board Summary

Members who did not make an election before the deadline were deemed to have elected Option (3), maintain their current member contribution rate and receive future accruals based upon a 1.25% benefit multiplier. There was no change in pension benefits to Pension Plus Plan (PPP) members. As a result of Public Act 300 of 2012, new members were given the option of electing between the PPP and the DC plan. With the adoption of Public Act 92 of 2017, new members were given the option of electing between the Pension Plus 2 Plan (PPP2) and the DC plan. The current distribution of option elections for the total active membership (DB plus DC) as of September 30, 2018 is presented below:

Option 1 - Increase member contributions / 1.5% benefit multiplier after transition date	18 %
Option 2 - Increase member contributions and 1.5% benefit multiplier until 30 years of service	2
Option 3 - Current member contributions / 1.25% benefit multiplier after transition date	45
Option 4 - Cease DB member contributions / DC benefit after transition date	2
Option 5 - Not eligible to make an election or elected PPP	24
Option 6 - New hire who elected pure DC plan	8
Option 7 - New hire who elected PPP2	1

An additional provision of Public Act 300 of 2012 is that the impact of the Early Retirement Incentive (ERI) program of 2010 was re-amortized over a 10-year period, rather than a 5-year period.

It is our understanding that the plan changes first affected the fiscal year 2014 budgeted employer contribution rates.

5. Budgeting Process and Reconciliation Process

For the September 30, 2011 valuation and prior valuations, an Annual Required Contribution (ARC) for Governmental Accounting Standards Board (GASB) accounting purposes and the required employer contribution for funding purposes were established for the fiscal year following the valuation date. For example, the September 30, 2011 valuation established an ARC and the required employer contribution for funding purposes for fiscal year 2012. However, the 2011 valuation was used for fiscal year 2014 budgeting purposes. Any differences between the required and budgeted employer contribution were handled through a reconciliation process, as established through subsection 41(9) of the MPSERS statute.

Beginning with the September 30, 2012 valuation, it was reported to the actuary that the reconciliation process had been suspended. The September 30, 2012 valuation determined the required contribution for fiscal year 2015 for funding and accounting purposes. For the September 30, 2015 valuation, it was reported to the actuary that the reconciliation process had been reinstated with reconciliation payments beginning in fiscal year 2016. The September 30, 2018 valuation determines the required employer contribution for fiscal year 2021 for both funding and accounting purposes.

The contribution requirements calculated in this report are in addition to any reconciliation payments as required by subsection 41(9) of the MPSERS statute.

Executive Summary/Board Summary

6. Dedicated Gains Policy

In 2017, the Board adopted a Dedicated Gains Policy. The purpose of the Policy is to reduce the investment return assumption for actuarial valuation purposes if the fiscal year’s market value rate of return exceeds a certain amount. The immediate recognition of the market value return is expected to offset the increase in the computed employer contribution from where it otherwise would have been.

For MPSERS, the following is applicable:

- (1) The amount of excess investment return for MPSERS does not cover the increase in the normal cost contribution for any year.
- (2) It was assumed that the reduction in the investment return assumption would be applicable to the Non-Hybrid and PPP portions of the pension plan only.

For the September 30, 2018 valuation, the investment return assumption for the Non-Hybrid portion of the pension plan was reduced from 7.05% to 6.80% as a result of the Policy, while the investment return assumption for the PPP portion of the pension plan was reduced from 7.00% to 6.80% as a result of the Policy. Please see pages C-3 and C-5 for additional detail.

7. Contribution Comparison

The chart below compares the results of this valuation of the Retirement System with the results of the prior year’s valuation:

Valuation Date	9/30/2017	9/30/2018
Contribution Percentage		
Normal Cost	5.68 %	5.94 %
UAAL Amortization Payment	<u>24.07</u>	<u>26.70</u>
Total	N/A	N/A
As an Annual Dollar Amount		
Normal Cost	\$ 496,109,570	\$ 461,373,811
UAAL Amortization Payment	<u>2,187,972,761</u>	<u>2,398,781,820</u>
Total	\$ 2,684,082,331	\$ 2,860,155,631
Fiscal Year Computed For	2020	2021
Fiscal Year Budgeted For	2020	2021

The computed employer contribution rates presented throughout this report do not reflect the normal cost or UAAL “floor” provisions described in bullet (5) of PA 92 of 2017 on page 3 or bullet (4) of PA 181 of 2018 on page 2.

Executive Summary/Board Summary

8. Determination of Pension Plus 2 Plan Contribution Rates

The September 30, 2018 actuarial valuation is the first valuation that includes members participating in the PPP2. Given that limited experience is available for PPP2, it is our understanding that the 6.2% employer and member normal cost contribution rates will remain in effect until the next completed 5-year Experience Study. In addition, based upon the results of the September 30, 2018 valuation, no contribution is required to finance a UAAL for PPP2.

9. Reasons for Change

There are three general reasons why contribution rates change from one valuation to the next. The first is a change in the benefits or eligibility conditions of the plan. The second is a change in the valuation assumptions used to predict future occurrences and/or a change to the valuation methods. The third is the difference during the year between the plan's actual experience and what the assumptions predicted.

Assumption and method changes, based on the adoption of the findings of the recently completed 5-year Experience Study (2012-2017) increased the computed liabilities and contribution requirements. Additionally, in accordance with the Dedicated Gains Policy, the Non-Hybrid plan and the Pension Plus plan investment return assumptions were lowered from 7.05% and 7.00%, respectively, to 6.80%. This resulted in an increase in liabilities and employer contribution requirements. This was offset in part by plan experience for the year ended September 30, 2018 which was overall favorable and is described in more detail in Section B of this report.

SECTION A

INTRODUCTION

Contribution Requirements

Development of Employer Contributions for the Indicated Valuation Date

Contributions for	September 30				
	2017	2018			Total
	Total	Non-Hybrid	Hybrid		
			Pension Plus (PPP)	Pension Plus 2 (PPP2)	
(1) Fiscal Year Ending September 30,	2020	2021	2021	2021	2021
(2) Total Normal Cost of Benefits (as a % of member pay)	10.62%	11.14%	8.47%	12.40%	10.79%
(3) Member Contribution % (weighted average)	<u>4.94%</u>	<u>4.75%</u>	<u>5.04%</u>	<u>6.20%</u>	<u>4.85%</u>
(4) Employer Normal Cost % = (2) - (3)	5.68%	6.39%	3.43%	6.20%	5.94%
(5) Projected Active Member Payroll for Fiscal Year - Normal Cost \$	\$ 8,726,859,711	\$ 6,278,549,853	\$ 1,181,701,766	\$ 316,808,133	\$ 7,777,059,752
(6) Employer Normal Cost \$ = (4) x (5)	496,109,570	401,199,336	40,532,371	19,642,104	461,373,811
(7) Total Actuarial Accrued Liability	76,693,475,788				83,375,340,066
(8) Funding Value of Assets	<u>47,255,286,564</u>				<u>50,630,333,694</u>
(9) Unfunded Actuarial Accrued Liabilities (UAAL) = (7) - (8)	\$ 29,438,189,224				\$ 32,745,006,372
a. Present Value of Budgeted Early Retirement Incentive Payments	419,754,695				220,033,061
b. Present Value of Remaining Early Retirement Incentive Payments	104,264,881				-
c. Present Value of Future Reconciliation Payments	<u>470,625,169</u>				<u>426,395,961</u>
d. Net UAAL to be Amortized = (9) - (9a) - (9b) - (9c)	\$ 28,443,544,479				\$ 32,098,577,350
(10) Amortization Period (years)	19	18	18	18	18
(11) Amortization Factor (level percent of payroll payments)		13.51901439	13.51901439	14.38462622	
(12) Amortization Payment %	22.71%	26.70%	26.70%	26.70%	26.70%
(13) Early Retirement Incentive Amortization Payment %	1.36%	0.00%	0.00%	0.00%	0.00%
(14) Total Amortization Payment % = (12) + (13)	24.07%	26.70%	26.70%	26.70%	26.70%
(15) Projected Active Member Payroll for Fiscal Year - Amortization \$ ⁽¹⁾	\$ 9,090,040,556	\$ 6,389,615,999	\$ 1,181,701,766	\$ 1,412,883,804	\$ 8,984,201,569
(16) Amortization Payment \$ = (14) x (15) ⁽²⁾	2,187,972,761	1,706,027,472	315,514,372	377,239,976	2,398,781,820
(17) Total Computed Employer Contribution \$ = (6) + (16) ⁽³⁾	\$ 2,684,082,331	\$ 2,107,226,808	\$ 356,046,743	\$ 396,882,080	\$ 2,860,155,631

⁽¹⁾ The Non-Hybrid and PPP projected amortization payrolls include projected payroll for those members with a Non-Hybrid and PPP liability respectively, regardless of whether the active member is continuing to accrue benefits in the defined benefit plan. The PPP2 projected amortization payroll includes projected payroll for all PPP2 (i.e., \$316.8 million) and "pure" DC members (i.e., \$1,096.1 million).

⁽²⁾ See page A-3 for a description of how to allocate the Amortization Payment dollars amongst the Non-Hybrid, the PPP, and the PPP2 assets.

⁽³⁾ The contribution requirements above are in addition to any reconciliation payments as required by subsection 41(9) of MPSERS statute and do not reflect any normal cost or UAAL floors as described in Public Act 92 and Public Act 181.

Contribution Requirements

Computed Employer Contributions

Based on the assumptions outlined in Section E, as more of the active membership becomes Pension Plus 2 Plan members and the System pays off its unfunded actuarial accrued liability (UAAL), the long term employer contribution rate for the Michigan Public School Employees' Retirement System is expected to be the long term employer normal cost rate for the Pension Plus 2 Plan. However, for the current total defined benefit MPSERS active member population, the weighted average normal cost rate is 5.94%. Also, for the current year, there is a contribution needed to fund the UAAL. As the normal cost rate and the UAAL amortization payment rate are applied to different payrolls, the two contribution rates cannot be summed to get a total computed employer contribution rate.

Effect of 2010 Early Retirement Incentive Program

For fiscal year 2021, the amortization payment does not include 1.36% of total fiscal year payroll, attributable to the Early Retirement Incentive Program (as shown on page A-1). This is due to the fact that the September 30, 2017 valuation reflected an additional \$200 million contributed by the employer in October 2017 to eliminate the fiscal year 2021 and fiscal year 2022 scheduled Early Retirement Incentive Program contributions. (Please see line items 9a and 9b on page A-1.)

Determining Employer Dollar Contributions

For any period of time, the percent-of-payroll contribution rate needs to be converted to dollars, then promptly contributed to the System. Please note, the normal cost rates and the UAAL amortization payment rates apply to two different types of payroll. The normal cost rates should be applied to the fiscal year 2021 payroll for those active employees who elected to maintain future benefit accruals in the defined benefit plan, while the UAAL amortization payment rates should be applied to the fiscal year 2021 payroll for the entire MPSERS active employee group.

For the Non-Hybrid Plan members, the employer normal cost rate (expressed as a % of Non-Hybrid payroll) is 6.39%. Applying the employer normal cost rate of 6.39% to the projected payroll for MPSERS active employees participating in the Non-Hybrid portion of the defined benefit plan for fiscal year 2021 produces annual employer normal cost contributions of \$401,199,336.

For the PPP members, the employer normal cost rate (expressed as a % of PPP payroll) is 3.43%. Applying the employer normal cost rate of 3.43% to the projected payroll for MPSERS active employees participating in the PPP portion of the defined benefit plan for fiscal year 2021 produces annual employer normal cost contributions of \$40,532,371.

For the PPP2 members, the employer normal cost rate (expressed as a % of PPP2 payroll) is 6.20%. Applying the employer normal cost rate of 6.20% to the projected payroll for MPSERS active employees participating in the PPP2 portion of the defined benefit plan for fiscal year 2021 produces annual employer normal cost contributions of \$19,642,104.

Contribution Requirements

The amortization payment for funding the UAAL (expressed as a % of the total MPSERS active member payroll reported for this valuation) is 26.70%. Applying the amortization payment rate of 26.70% to the projected payroll for the total MPSERS active employees for fiscal year 2021 produces an annual amortization payment of \$2,398,781,820.

The sum of the three normal cost contributions and the amortization payment yields an expected total employer contribution of \$2,860,155,631 for fiscal year 2021. Currently, the non-investment cash flow is tracked separately in the assets for the Non-Hybrid, PPP, and PPP2 groups. The normal cost contributions should be allocated to each of the respective groups as expected, based on the actual payroll amounts. For the amortization payment of the UAAL, (\$1,198,562) should be allocated to the PPP group, (\$15,577) should be allocated to the PPP2 group, and the remainder should be allocated to the Non-Hybrid group.

Reconciliation Payments

Starting with the September 30, 2015 valuation, it was reported to the actuary that the reconciliation process has been reinstated. The contribution requirements shown on page A-1 for fiscal year 2021 are needed in addition to the reconciliation payments required by subsection 41(9) of the MPSERS statute. The scheduled reconciliation payments were prepared and reported by the Office of Retirement Services (ORS) and are presented on page E-13.

Summary of Plan Changes - Public Act 300 of 2012

A brief summary of the plan changes resulting from Public Act 300 of 2012 follows:

Basic and MIP active members were given the following options to increase, maintain, or cease their contributions to the pension plan:

- (1) Increase their member contribution rate to the pension fund and maintain the 1.5% benefit multiplier in their pension formula for service accrued after the transition date (i.e., February 1, 2013). Basic member contributions increased to 4% (from 0%). MIP member contributions increased to a flat 7% (from 3.9% for MIP-Fixed, from a graded percentage up to 4.3% for MIP-Graded, and from a graded percentage up to 6.4% for MIP-Plus).
- (2) Increase their member contribution rate (as noted above) and maintain the 1.5% benefit multiplier in their pension formula for service accrued after the transition date until they reach 30 years of service. Upon reaching 30 years of service, their member contribution rate would return to their current level (pre-Public Act 300 of 2012), and their pension formula for service in excess of 30 years would be based upon a 1.25% benefit multiplier.
- (3) Maintain their current member contribution rate to the pension fund. The pension formula for years of service before the transition date is based upon a 1.5% benefit multiplier, while the pension formula for years of service after the transition date is based upon a 1.25% benefit multiplier.
- (4) Cease member contributions to the DB portion of the pension fund. In this circumstance, the member would no longer receive future benefit accruals in the DB plan and would become a participant in the DC plan. The pension formula for years of service before the transition date is based upon a 1.5% benefit multiplier. The member's final average compensation would be frozen as of the transition date.

Members who did not make an election before the deadline were deemed to have elected Option (3), maintain their current member contribution rate and receive future accruals based upon a 1.25% benefit multiplier. There was no change in pension benefits to Pension Plus Plan (PPP) members. New members were given the option of electing between the PPP and the DC plan.

An additional provision of Public Act 300 of 2012 is that the impact of the Early Retirement Incentive (ERI) program of 2010 was re-amortized over a 10-year period, rather than a 5-year period. It is our understanding that the plan changes first affect the fiscal year 2014 budgeted employer contribution rates.

Summary of Plan Changes - Public Act 92 of 2017

A brief summary of the plan changes resulting from Public Act 92 of 2017 follows:

- (1) Individuals that become members of MPSERS on or after February 1, 2018 (sometimes referred to as new hires) have the one-time choice between a Defined Contribution (DC) plan and a new Hybrid plan referred to as the Pension Plus 2 Plan (PPP2). The DC plan has an employer contribution of 4% of pay plus a 100% employer matching provision up to an additional 3% of a member's pay. The PPP2 is similar in nature to the Pension Plus Plan (PPP), with the following exceptions:
 - a. The employer and member normal cost contribution rates are based upon a 50/50 cost sharing arrangement.
 - b. The employer and member contribution rates associated with financing any unfunded actuarial accrued liabilities (UAAL) are based upon a 50/50 cost sharing arrangement.
 - c. The MPSERS Board of Trustees has the ability to raise the normal retirement age (currently age 60) for active members if the life expectancy for a 65-year-old (based upon a unisex blend of 50/50) increases by a certain amount. The review of the age 65 life expectancy is based upon the mortality tables adopted as part of the normal 5-year Experience Study process. If a change to the normal retirement age is adopted, certain members who are near the then current retirement age would not be subject to the updated normal retirement age.
 - d. Changes to the UAAL are amortized over a 10-year period using level dollar amortization.
 - e. The discount rate for actuarial valuation purposes is 6%.
- (2) The default election for a new hire is the DC plan.
- (3) If the actuarial funded ratio of the PPP2 falls below 85% for two consecutive actuarial valuations, the PPP2 has the potential of being closed to new hires going forward. The actuarial funded ratio is based upon the actuarial value of assets (i.e., 5-year smoothing of investment returns).
- (4) Members hired on or after February 1, 2013 who selected the DC plan receive the enhanced employer contribution structure of the new DC plan. Members hired before February 1, 2013 who selected the DC plan as part of the Public Act 300 (PA 300) reform do not receive the enhanced employer contribution rate structure. (Public Act 169 of 2018 later extended the enhanced DC structure to members hired before February 1, 2013 who selected the DC plan as part of PA 300.)
- (5) Beginning with the State's fiscal year ending September 30, 2018 (applicable to Non-Hybrid and PPP only):
 - a. The normal cost contribution rate must not be less than the normal cost contribution rate in the immediately preceding State fiscal year.
 - b. The contribution rate associated with financing the UAAL must not be less than the contribution rate associated with financing the UAAL in the immediately preceding State fiscal year. This provision is applicable until such time as the UAAL is "paid off."

The normal cost and UAAL floors described in bullet (5) are not reflected in the contribution requirements shown in this valuation report.

Discussion of Changes

Revisions in Benefits

There have been no material revisions in benefits since the last annual actuarial valuation.

Revisions in Actuarial Assumptions or Methods

Assumption and method changes, based on the adoption of the findings of the recently completed 5-year Experience Study (2012-2017) increased the computed liabilities and contribution requirements. The Experience Study assumptions increased the Actuarial Accrued Liability by \$3.3 billion as of the valuation date.

Additionally, in accordance with the Dedicated Gains Policy, the Non-Hybrid and PPP plan investment return assumptions were lowered from 7.05% and 7.00%, respectively, to 6.80% effective with this valuation of MPSERS. This assumption change increased the Actuarial Accrued Liability by \$2.2 billion as of the valuation date.

A brief summary of the plan changes resulting from Public Act 181 of 2018 follows:

- (1) For purposes of amortizing the unfunded actuarial accrued liability (UAAL), the legislation requires a transition from level percentage of payroll amortization to level dollar amortization by reducing the payroll growth assumption for amortization purposes according to the following schedule: 3.50% for the September 30, 2017 and 2018 valuations, dropping 0.50% each subsequent year starting with the September 30, 2019 valuation, until an ultimate payroll growth assumption of 0.00% is reached beginning with the September 30, 2025 valuation.
- (2) ORS is allowed to reduce the payroll growth assumption in 25 basis point increments, rather than in 50 basis point increments, if the cost of reducing the payroll growth assumption by 50 basis points would increase the amortization payment by more than 7% of the prior year's UAAL payment.
- (3) The basis over which UAAL contribution rate will be applied is changing to payroll adjusted by the growth rate of "payroll plus purchased services." (Public Act 512 of 2018 later reversed this provision.)
- (4) The UAAL contribution floor is changing from a rate floor to a dollar floor starting with the employer contributions in fiscal year 2022.

Actuarial Experience

Actuarial Experience was more favorable than that anticipated by the actuarial assumptions. The total actuarial gain was \$1.9 billion. The gain was due primarily to favorable investment experience.

Discussion of Changes

Comment on the Investment Markets

Investment markets continue to be volatile. The actuarial value of assets (funding value), used to determine both the funded status and the required employer contribution, is based on a 5-year smoothed value of assets. This reduces the volatility of the valuation results.

As of September 30, 2018, the actuarial value of assets was 101% of market value. This means that meeting the actuarial investment return assumption in the next few years will require average future market returns which exceed the 6.80% investment return assumption.

If the September 30, 2018 valuation results were based on the market value of assets instead of the actuarial value of assets, the funded percent of the plan would be 60.4% (instead of 60.7%), and the UAAL amortization payment would be 26.96% of payroll (instead of 26.70%).

Measures of Financial Soundness

The purpose of this section of the report is to provide certain measures which indicate the financial soundness of the program. These measures relate to long term solvency and level funding.

The various percentages listed in this section as of a single valuation date are not overly significant standing alone. What is more significant is the trend of the rates over a period of years. It is also important to keep in mind that each time benefits or assumptions are revised, actuarial liabilities are created or diminished. Any newly created liabilities are financed systematically over a period of future years. All actuarially computed values in this analysis are based on the actuarial assumptions utilized in the respective years' actuarial valuations.

Long Term Solvency

Over the longer term, the solvency of an ongoing plan can be measured by comparing the actuarial value of assets to an amount known as the Actuarial Accrued Liability (AAL) under the Entry-Age actuarial cost method. This item has often been called the "past service liability." The AAL is affected immediately by any revisions in benefits or assumptions. The accumulation of assets to equal the AAL can be considered a long range funding goal. Largely because of periodic benefit increases and poor investment experience since the early 2000's, very few retirement programs have attained this goal.

Valuation Date	Actuarial Value of Assets	Actuarial Accrued Liability	% of AAL Covered by Assets
9/30/2018 ¹	\$50,630,333,694	\$83,375,340,066	60.7 %
9/30/2018	49,313,273,133	77,864,953,851	63.3
9/30/2017 ¹	47,255,286,564	76,693,475,788	61.6
9/30/2017	45,396,962,957	73,327,132,063	61.9

¹ Revised actuarial assumptions and/or methods.

The chart above illustrates the change in the total System funding percent since the prior year. Page B-7 shows the funded percent in greater detail and for a longer period of time. In particular, the funded percent for current benefit recipients is 75.9% as of September 30, 2018.

Measures of Financial Soundness

Level Contributions

The actuarial assumptions and cost method have been chosen with the intent of producing required total contributions which are expected to remain fairly level as a percentage of active member payroll. The following chart shows a brief history of contribution rates:

Valuation Date	Fiscal Year Budgeted For	Normal Cost ⁴	Amortization Payment	Total Contribution
9/30/2018 ¹	2021	5.94 %	26.70 %	N/A ³
9/30/2018	2021	5.58	22.77	N/A ³
9/30/2017 ²	2020	5.68	24.07	N/A ³
9/30/2017 ¹	2020	5.29	24.07	N/A ³
9/30/2017	2020	4.41	23.67	N/A ³

¹ Revised actuarial assumptions and/or methods.

² Change in plan provisions.

³ Effective with Public Act 300 of 2012, the normal cost rate and the amortization payment rate are applied to different payrolls and can no longer be added together for a total contribution rate.

⁴ Normal cost is a weighted average rate of the Non-Hybrid, PPP, and PPP2 normal cost rates.

A major factor affecting the stability of the contribution requirements just shown is how well the actual plan experience compares to the actuarial assumptions. The value of the difference between what actually occurred and what was assumed to occur is called the actuarial gain or loss. Gains tend to lower the subsequent contribution requirements of the program while losses tend to cause subsequent contribution requirements to rise.

Year Ending	Actuarial Gain/(Loss)	G/(L) Percent
9/30/2018	\$ 1,862,920,147	2.43%
9/30/2017	3,076,844,994	4.26%

G/(L) percent represents actuarial gain/(loss) calculated as a percentage of the beginning of year actuarial accrued liability.

Analysis of all the benchmarks noted, over a period of years, will provide an indication of whether the program is becoming financially stronger or weaker.

Other Observations

General Implications of Contribution Allocation Procedure or Funding Policy on Future Expected Plan Contributions and Funded Status

Given the plan's contribution allocation procedure, if all actuarial assumptions are met (including the assumption of the plan earning 6.80% on the Non-Hybrid and PPP actuarial values of assets and 6.00% on the PPP2 actuarial value of assets), it is expected that:

- (1) The employer normal cost as a percentage of pay will trend to the level of the PPP2 normal cost rate as the Non-Hybrid and PPP populations decline and are replaced by PPP2 members,
- (2) In the absence of any applicable payroll growth floor, the amortization payments are expected to increase as the amortization payroll growth assumption declines to 0% by the September 30, 2025 valuation,
- (3) The unfunded actuarial accrued liability is expected to be fully amortized no later than the end of fiscal year 2038, and
- (4) The funded status of the plan will generally increase gradually towards a 100% funded ratio.

When selecting a contribution allocation procedure, the following three items should be considered, including the balance amongst the three items:

- (1) Benefit security,
- (2) Intergenerational equity, and
- (3) Contribution stability and predictability.

Generally, given the nature of public employee retirement systems (e.g., level contribution financing objective and perceived ongoing nature of the plan or plan sponsor), intergenerational equity and contribution stability and predictability have received more consideration than benefit security when contribution allocation procedures are selected. However, given the importance of benefit security to any retirement system, we suggest that contributions to the System in excess of those presented in this report be considered.

Other Observations (Concluded)

Limitations of Funded Status Measurements

Unless otherwise indicated, a funded status measurement presented in this report is based upon the actuarial accrued liability and the actuarial value of assets. Unless otherwise indicated, with regards to any funded status measurements presented in this report:

- (1) The measurement is inappropriate for assessing the sufficiency of plan assets to cover the estimated cost of settling the plan's benefit obligations. In addition, the measurement is inappropriate for assessing benefit security for the membership.
- (2) The measurement is dependent upon the actuarial cost method which, in combination with the plan's amortization policy and asset valuation method, affects the timing and amounts of future contributions. The amounts of future contributions will most certainly differ from those assumed in this report due to future actual experience differing from assumed experience based upon the actuarial assumptions. A funded status measurement in this report of 100% is not synonymous with no required future contributions. If the funded status were 100%, the plan would still require future normal cost contributions (i.e., contributions to cover the cost of the active membership accruing an additional year of service credit).
- (3) The measurement would produce a different result if the market value of assets were used instead of the actuarial value of assets, unless the market value of assets is used in the measurement.

SECTION B

FUNDING RESULTS

Present Value of Future Benefits and Accrued Liability

Determination of Unfunded Accrued Liability as of September 30, 2018

	Non-Hybrid	PPP	PPP2	Total
A. Accrued Liability				
1. For retirees and beneficiaries	\$ 56,834,074,544	\$ 110,506	\$ 0	\$ 56,834,185,050
2. For vested and other terminated members ¹	2,371,110,990	42,428,220	0	2,413,539,210
3. For other inactive members ²	111,042,080	0	0	111,042,080
4. For present active members				
a. Value of expected future benefit payments	29,499,333,139	1,827,827,247	59,590,608	31,386,750,994
b. Value of future normal costs	5,931,357,865	1,381,456,031	57,363,372	7,370,177,268
c. Active member accrued liability: (a) - (b)	23,567,975,274	446,371,216	2,227,236	24,016,573,726
5. Total accrued liability	82,884,202,888	488,909,942	2,227,236	83,375,340,066
B. Present Valuation Assets (Funding Value)	50,124,791,376	503,115,658	2,426,660	50,630,333,694
C. Unfunded Accrued Liability: (A.5) - (B)	32,759,411,512	(14,205,716)	(199,424)	32,745,006,372
D. Funding Ratio: (B) / (A.5)	60.5%	102.9%	109.0%	60.7%

¹ Starting with the September 30, 2015 valuation, pending refunds of employee contributions for former employees who terminated without a vested benefit will be summarized with the vested and other terminated members. Prior to the September 30, 2015 valuation, these liabilities were summarized with the active liability.

² Includes liabilities for employees who transferred to the DC pension plan in connection with PA 300.

Experience Gain/(Loss)

A. Derivation of Actuarial Gain/(Loss):	
1. Unfunded Actuarial Accrued Liability (UAAL) - Previous Valuation	\$ 29,438,189,224
2. Total Normal Cost (employer plus member) for Year Ending 9/30/2018	850,771,151
3. Total Contributions (employer plus member) for Year Ending 9/30/2018	3,184,568,036
4. Interest on:	
a. UAAL: Discount Rate* x (1)	2,075,395,170
b. Normal Cost and Contributions: Discount Rate* / 2 x [(2) - (3)]	(82,247,205)
c. Net Total: (a) + (b)	1,993,147,965
5. Change in UAAL due to Benefit Changes	-
6. Change in UAAL due to Assumption Changes	5,510,386,215
7. Expected UAAL Current Year:	
(1) + (2) - (3) + (4c) + (5) + (6)	34,607,926,519
8. Actual UAAL Current Year	32,745,006,372
9. Experience Gain/(Loss): (7) - (8)	1,862,920,147
B. Approximate Portion of Gain/(Loss) due to Investments	1,884,670,238
C. Approximate Portion of Gain/(Loss) due to Liabilities: (A.9) - (B)	(21,750,091)

* Discount rate is 7.05% for Non-Hybrid group, 7.00% for the PPP group, and 6.00% for the PPP2 group.

The schedule above shows the net, aggregate experience for the System. The next page shows this experience in detail. Please note that row B above includes the accelerated recognition of investment gains associated with the Dedicated Gains Policy, if applicable.

Detailed Experience Gain/(Loss)

Gains/(Losses) During the Year Ended September 30, 2018 Resulting from Differences Between Assumed and Actual Experience

Type of Activity	Gain/(Loss)
1. Retirements (including disability retirement). If members retire at older ages or with lower final average pay than assumed, there is a gain. If younger ages or higher average pays, a loss.	\$ 24,768,963
2. Withdrawal from Employment (including death-in-service). If more liabilities are released by withdrawals and deaths than assumed, there is a gain. If smaller releases, a loss.	(73,025,810)
3. Pay Increases . If there are smaller pay increases than assumed, there is a gain. If greater increases, a loss.	241,624,566
4. Investment Income . If there is greater investment income than assumed, there is a gain. If less income, a loss.	1,884,670,238
5. Death After Retirement . If retirants and inactive vested members live longer than assumed, there is a loss. If not as long, a gain.	(80,881,851)
6. Rehires .	7,180,546
7. Refund of University Employer Contributions .	0
8. Other . Miscellaneous gains and losses resulting from data adjustments, timing of financial transactions, etc.	(141,416,505)
9. Composite Gain/(Loss) During Year .	\$ 1,862,920,147

Gain/loss for the year ended September 30, 2018 is measured on pre-Experience Study assumptions. The impact of the Experience Study assumptions on the detailed gain/(loss) will first be reflected in the September 30, 2019 valuation.

Experience Gain/(Loss)

Five-Year History (Amounts Shown in Millions)

<u>Plan Year Ending September 30¹</u>	<u>Experience Gain/(Loss)</u>	<u>Gain/(Loss) Due to Investments</u>	<u>Actuarial Value of Investments</u>	<u>Investment Gain/(Loss) as % of Assets</u>
2018	\$ 1,863	\$ 1,885	\$ 50,630	3.72%

Average Returns:				
Last five years:	9.82 %	11.27 %	9.18 %	7.02 %
Last ten years:	8.38 %	6.44 %	8.70 %	7.02 %

¹ Approximate return based on ratio of total investment return to average asset value, using an assumed beginning-of-year timing of audit adjustments (if any) and an assumed mid-year timing of other asset flows, unless otherwise noted.

Please note, starting in fiscal year 2017, the return on the actuarial value of assets may be impacted by the accelerated recognition of investment return under the Dedicated Gains Policy.

¹ Includes miscellaneous income and other changes in net assets/reserves/fund balances and net of investment expenses.

² Includes University employer contribution refund.

Note: Data for the year 2007 and prior years was provided by the State of Michigan Department of Technology, Management and Budget - Financial Services.

SECTION D

CENSUS DATA

Summary of Participant Data by Category

	As of September 30	
	2017	2018
Retirees and beneficiaries currently receiving benefits:		
Regular benefits	189,960	192,296
Survivor benefits	17,878	18,252
Disability benefits	6,151	6,070
Total	213,989	216,618
Current Employees:		
Vested	100,135	97,429
Non-Vested	87,600	85,501
Total	187,735	182,930
Inactive employees entitled to benefits and not yet receiving them:	22,234	22,447
Total Participants	423,958	421,995

The September 30, 2017 inactive counts include 4,230 people who elected not to continue future accruals (after the transition date of February 1, 2013) in the defined benefit plan as a result of PA 300. All counts exclude 12,016 people hired after PA 300 who elected to participate in the pure defined contribution plan and 3,756 active records with both \$0 salary and 0 service provided in the September 30, 2017 valuation data.

The September 30, 2018 inactive counts include 3,849 people who elected not to continue future accruals (after the transition date of February 1, 2013) in the defined benefit plan as a result of PA 300. All counts exclude 15,680 people hired after PA 300 who elected to participate in the pure defined contribution plan and 5,273 active records with both \$0 salary and 0 service provided in the September 30, 2018 valuation data.

UAAL contributions are expected to continue to be collected on the payroll of these members in the future.

Average Annual Pay	\$ 41,974	\$ 43,101

The above active statistics exclude active members hired after PA 300 who elected the pure defined contribution plan (12,016 as of September 30, 2017 and 15,680 as of September 30, 2018). The above active statistics exclude active members who elected not to continue future accruals (after the transition date of February 1, 2013) in the defined benefit plan as a result of PA 300 (4,230 as of September 30, 2017 and 3,849 as of September 30, 2018). The above active statistics exclude people provided in the valuation with both \$0 salary and 0 service (3,756 as of September 30, 2017 and 5,273 as of September 30, 2018). Annual reported payroll for those employees excluded from the active statistics (above) are \$415.5 million as of September 30, 2018 (\$340.7 million as of September 30, 2017).

UAAL contributions are expected to continue to be collected on the payroll of all of these excluded members in the future.

Active Members (Defined Benefit Only)

Members in Active Service as of September 30, 2018 by Age and Years of Service

Age	Years of Service							Total Count	Total Pay	Average Pay
	0 - 4	5 - 9	10 - 14	15 - 19	20 - 24	25 - 29	30 & up

Total	57,724	27,777	19,172	23,134	27,250	17,729	10,144	182,930	\$ 7,884,549,991	\$ 43,101

The September 30, 2018 active statistics exclude: (1) 3,849 people who elected not to continue future accruals (after the transition date of February 1, 2013) in the defined benefit plan as a result PA 300, (2) 15,680 people hired after PA 300 who elected the pure defined contribution plan, and (3) 5,273 people provided in the valuation with both \$0 salary and 0 service. UAAL contributions are expected to continue to be collected on the payroll of these members in the future.

Active and Inactive Members Reported for Valuation Historical Comparison

Valuation Date September 30	Number of Inactive Vested Members	Active Members ²					
		Number	Reported Payroll ¹	Average			Years of Service

* Not available.

¹ Reported payroll in thousands. Beginning with the September 30, 2006 valuation, the payroll is no longer adjusted, and the payroll is the sum of the actual pays reported for each active member.

² Active members hired after PA 300 who elected the pure defined contribution plan are excluded from the statistics above. Beginning with the September 30, 2014 valuation, active members who elected not to continue future accruals in the defined benefit plan as a result of PA 300 are included in the number of inactive vested members.

³ The September 30, 2018 inactive vested statistic includes 3,849 people who elected not to continue future accruals (after the transition date of February 1, 2013) in the defined benefit plan as a result PA 300. The September 30, 2018 active statistics exclude these members as well as 15,680 people hired after PA 300 who elected the pure defined contribution plan and 5,273 people provided in the valuation with both \$0 salary and 0 service. UAAL contributions are expected to continue to be collected on the payroll of these members in the future.

SECTION E

METHODS AND ASSUMPTIONS

Valuation Methods

Actuarial Cost Method - Normal cost and the allocation of benefit values between service rendered before and after the valuation date was determined using an Individual Entry-Age Actuarial Cost Method having the following characteristics:

- (i) the annual normal cost for each individual active member, payable from the date of employment to the date of retirement, is sufficient to accumulate the value of the member's benefit at the time of retirement;
- (ii) each annual normal cost is a constant percentage of the member's year by year projected covered pay.

Actuarial gains (losses), as they occur, reduce (increase) the Unfunded Actuarial Accrued Liability (UAAL).

Financing of Unfunded Actuarial Accrued Liabilities - Unfunded actuarial accrued liabilities (full funding credit if assets exceed liabilities) were amortized by level (principal and interest combined) percent-of-payroll contributions over a reasonable period of future years. It is expected that the unfunded actuarial accrued liabilities will be fully amortized by the end of fiscal year 2038. For amortization purposes only, the payroll growth assumption is based upon the following schedule outlined in Public Act 181 of 2018 (PA 181): 3.50% for the September 30, 2017 and 2018 valuations, dropping 0.50% each subsequent year starting with the September 30, 2019 valuation, until an ultimate payroll growth assumption of 0.00% is reached beginning with the September 30, 2025 valuation.

Valuation Methods

Present value of future reconciliation payments – Subsection 41(9) of the MPSERS statute provides for a process to reconcile actual employer contributions to the actuarially computed contribution requirements. In order to avoid duplication of the employer contributions, the present value of future reconciliation payments is subtracted from the unfunded actuarial accrued liability (UAAL) to determine the remaining UAAL contribution. Please refer to pages A-1 and E-13.

Amortization of UAAL resulting from the Early Retirement Incentive (ERI) program of 2010 – It has been reported that 1.36% of payroll will be contributed beginning in fiscal year 2013 for a 10-year period to amortize the UAAL associated with the ERI program of 2010. In order to avoid duplication of the employer contributions, the present value of future ERI amortization payments is subtracted from the unfunded actuarial accrued liability (UAAL) to determine the remaining UAAL contribution. Please refer to page A-1. The September 30, 2017 valuation reflected that the employer contributed \$200 million in October 2017 to eliminate the fiscal year 2021 and fiscal year 2022 scheduled ERI payments.

Actuarial Value of System Assets - The actuarial value of assets recognizes assumed investment income fully each year. Differences between actual and assumed investment income are phased in over a closed five-year period. During periods when investment performance exceeds the assumed rate, actuarial value of assets will tend to be less than market value. During periods when investment performance is less than the assumed rate, actuarial value of assets will tend to be greater than market value. The actuarial value of assets was reset to market value as of September 30, 2006, with five-year smoothing restarted at that time. The actuarial value of assets is developed separately for the Non-Hybrid, the PPP, and the PPP2 portions of the System. The total actuarial value of assets is the sum of these three components. The actuarial value of assets is not permitted to deviate from the market value of assets by more than 30%.

Valuation Assumptions

In accordance with Section 41(1) of the MPSERS statute (Act 300 of the Public Acts of 1980, as amended), the actuarial assumptions are adopted by the Retirement Board and the Department of Technology, Management and Budget after consultation with the actuary and the State Treasurer. The actuarial assumptions were based upon the results of an Experience Study for MPSERS covering the period October 1, 2012 through September 30, 2017. A report dated May 15, 2018 presented the results of the Experience Study. The investment return assumptions for the Non-Hybrid and PPP groups were updated beginning with the September 30, 2018 valuation in accordance with the Dedicated Gains Policy adopted by the Board of Trustees. The actuarial assumptions represent estimates of future experience.

The rate of investment return was 6.80% a year, compounded annually net of investment expenses for the Non-Hybrid and PPP groups (6.00% for the PPP2 group). This assumption was first used for the September 30, 2018 funding valuation of the System.

The assumed real rate of investment return is the rate of investment return in excess of either wage inflation or price inflation. Considering a wage inflation assumption of 2.75% and a price inflation assumption of 2.25%, the 6.80% nominal rate of investment return translates into a real rate of investment return of 4.05% over wage inflation and 4.55% over price inflation for the Non-Hybrid and PPP groups. Considering a wage inflation assumption of 2.75% and a price inflation assumption of 2.25%, the 6.00% nominal rate of investment return translates into a real rate of investment return of 3.25% over wage inflation and 3.75% over price inflation for the PPP2 group.

Valuation Assumptions

The rates of salary increase used for individual members are in accordance with the table below. This assumption is used to project a member’s current pay to the pay upon which System benefits will be based. The current assumption was first used for the September 30, 2018 valuation of the System.

Sample Ages	Salary Increase Assumptions For an Individual Member		
	Merit & Seniority	Base (Economy)	Increase Next Year
20	8.80 %	2.75 %	11.55 %
25	8.80	2.75	11.55
30	4.96	2.75	7.71
35	3.10	2.75	5.85
40	1.90	2.75	4.65
45	1.14	2.75	3.89
50	0.54	2.75	3.29
55	0.18	2.75	2.93
60	0.00	2.75	2.75
65	0.00	2.75	2.75
Ref	510		

The charts shown in this section may include a reference number (for example, 510 is used above). These reference numbers are used by GRS to track and identify assumption tables.

Valuation Assumptions

The healthy life post-retirement mortality table is used to measure the probabilities of each benefit payment being made after retirement for healthy lives.

Healthy Male Retirees: RP-2014 Male Healthy Annuitant Mortality Table scaled by 82% and adjusted for mortality improvements using projection scale MP-2017 from 2006.

Healthy Female Retirees: RP-2014 Female Healthy Annuitant Mortality Table scaled by 78% and adjusted for mortality improvements using projection scale MP-2017 from 2006.

This assumption was first used for the September 30, 2018 valuation of the System. Sample rates of mortality and years of life expectancy are shown below.

Sample Attained Ages	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	0.33 %	0.21 %	36.35	39.37
55	0.48	0.30	31.52	34.36
60	0.67	0.45	26.86	29.50
65	0.96	0.66	22.43	24.84
70	1.42	1.02	18.22	20.36
75	2.27	1.68	14.29	16.15
80	3.84	2.88	10.75	12.33

Applicable to calendar year 2018. Rates and life expectancies in future years are determined by the fully generational MP-2017 projection scale.

For active members, the probabilities of dying before retirement are as follows:

Male Active Members: RP-2014 Male Employee Mortality Table scaled by 100% and adjusted for mortality improvements using projection scale MP-2017 from 2006.

Female Active Members: RP-2014 Female Employee Mortality Table scaled by 100% and adjusted for mortality improvements using projection scale MP-2017 from 2006.

This assumption was first used for the September 30, 2018 valuation of the System. Sample rates of mortality and years of life expectancy are shown on the next page.

Valuation Assumptions

Sample Attained Ages	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
20	0.04 %	0.02 %	67.92	72.16
25	0.05	0.02	62.59	66.83
30	0.05	0.02	57.26	61.50
35	0.06	0.03	51.95	56.20
40	0.07	0.05	46.66	50.91
45	0.10	0.07	41.38	45.66
50	0.17	0.11	36.17	40.46
55	0.28	0.18	31.08	35.34
60	0.49	0.27	26.16	30.34
65	0.88	0.39	21.54	25.45

Applicable to calendar year 2018. Rates and life expectancies in future years are determined by the fully generational MP-2017 projection scale. Active member deaths are assumed to be non-duty related.

The disabled life mortality table is used to measure the probabilities of each benefit payment being made after retirement to disabled lives.

Disabled Male Retirees: RP-2014 Male Disabled Annuitant Mortality Table scaled by 100% and adjusted for mortality improvements using projection scale MP-2017 from 2006.

Disabled Female Retirees: RP-2014 Female Disabled Annuitant Mortality Table scaled by 100% and adjusted for mortality improvements using projection scale MP-2017 from 2006.

This assumption was first used for the September 30, 2018 valuation of the System. Sample rates of mortality and years of life expectancy are shown on the next page.

Sample Attained Ages	Probability of Dying Next Year		Future Life Expectancy (years)	
	Men	Women	Men	Women
50	2.04 %	1.18 %	24.23	28.67
55	2.37	1.54	21.11	24.86
60	2.80	1.88	18.11	21.36
65	3.37	2.20	15.28	17.97
70	4.17	2.88	12.55	14.59
75	5.61	4.23	9.93	11.44
80	8.01	6.47	7.56	8.71

Applicable to calendar year 2018. Rates and life expectancies in future years are determined by the fully generational MP-2017 projection scale. Active member deaths are assumed to be non-duty related.

Valuation Assumptions

The rates of retirement used to measure the probability of eligible members retiring during the next year are shown below. These assumptions were first used for the September 30, 2018 valuation of the System.

A Basic member is eligible for normal retirement after attaining age 55 with 30 or more years of credited service, or after attaining age 60 with 10 or more years of credited service.

A MIP member is eligible for normal retirement after 30 years of service, or after attaining age 60 with 5 or more years of service.

A Basic or MIP member is eligible for early retirement after attaining age 55 with 15 but less than 30 years of credited service.

A Pension Plus member is eligible for normal retirement after attaining age 60 with 10 or more years of credited service. Pension Plus members are not eligible for early retirement. Currently, Pension Plus 2 members have the same retirement eligibility and retirement rates as Pension Plus members.

Normal Retirement

Retirement Ages	Percent of Eligible Members Retiring

Valuation Assumptions

Rates of separation from active membership used in the valuation are shown below (rates do not apply to members eligible to retire and do not include separation on account of death or disability). This assumption measures the probabilities of members remaining in employment, and was first used for the September 30, 2018 valuation of the System.

Sample Ages	Years of Service	Percent Separating Within Next Year			
		Pay More Than \$20,000		Pay Less Than \$20,000	
		Teachers	Non-Teachers	Teachers	Non-Teachers
All	0	15.00 %	35.00 %	30.00 %	40.00 %
	1	10.00	14.00	25.00	26.00
	2	6.50	8.20	22.00	19.00
	3	6.00	6.80	22.00	16.00
	4	4.50	5.70	22.00	14.00

Age Ref		1453	1454	1450	1451

Pension Plus 2 members are assumed to experience 50% of the assumed withdrawal rates above.

Valuation Assumptions

Rates of disability among active members used in the valuation are shown below, and were first used in the September 30, 2010 valuation of the System. Disabilities are assumed to be non-duty related.

Sample Ages	Percent Becoming Disabled Within Next Year
20	0.00 %
25	0.01
30	0.01
35	0.02
40	0.05
45	0.10
50	0.18
55	0.26
60	0.36
Ref.	393 x 0.80

Service Credit Accrual Rates: Members were assumed to accrue service credit each year as described in the table below:

	Assumed Average Service Credit Accrued Each Year
Teachers with Pay Over \$20,000	0.93 years
Non-Teachers with Pay Over \$20,000	0.93
Teachers with Pay Under \$20,000	0.60
Non-Teachers with Pay Under \$20,000	0.65

These accrual rates were first used for the September 30, 2014 valuation of the System.

Valuation Assumptions

Unknown Data:

- Members with unknown gender were assumed to be female.
- Members with unknown dates of birth were assumed to have an entry-age equal to 32 for Basic members, 33 for MIP members, and 35 for PPP/PPP2 members.
- Active members with non-zero service who were reported without any annual pay were assumed to have pay equal to the average pay of the corresponding active group.
- Retired members with unknown benefit plan codes were assumed to be MIP.
- Active members with unknown pre-PA 300 benefit plan codes were assumed to be MIP Graded.
- Allocations of total credited service before and after the PA 300 transition date were approximated when not supplied.
- Frozen defined benefit amounts were estimated for active members who elected to participate in the DC Plan prospectively as a result of PA 300, when not supplied.
- Accrued benefits were estimated for inactive participants based upon the service and final average compensation provided in the data.

Miscellaneous and Technical Assumptions

<i>Administrative Expenses</i>	The normal cost contribution includes 0.30% payroll load for administrative expenses.
<i>Benefit Service</i>	Exact fractional service is used to determine the amount of benefit payable.
<i>Cost-of-Living Assumption</i>	MIP members are assumed to receive 3.0% cost-of-living increases. Basic members who retired on or before January 1, 1987 are assumed to receive 3.8% cost-of-living increases. All other members are assumed not to receive cost-of-living increases.
<i>Decrement Operation</i>	Disability and withdrawal decrements do not operate during retirement eligibility.
<i>Decrement Timing</i>	Retirement decrements are assumed to occur on July 1. All other decrements are assumed to occur mid-year.
<i>Eligibility Testing</i>	Eligibility for benefits is determined based upon the age nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
<i>Employee Contribution Interest Crediting</i>	Employee contributions to the pension plan are assumed to be credited at the investment return assumption for each group.
<i>Forfeitures</i>	For vested separations from service, it is assumed that 0% of members separating will withdraw their contributions and forfeit an employer financed benefit. It was further assumed that the liability at termination is the greater of the vested deferred benefit (if any) or the member's accumulated contributions.
<i>Incidence of Contributions</i>	Contributions are assumed to be received continuously throughout the year.
<i>Liability Adjustments</i>	Inactive vested member liabilities were increased by 2% to reflect the value of the death benefit provision.
<i>Marriage Assumption</i>	75% of males and 65% of females are assumed to be married for purposes of death-in-service benefits. Male spouses are assumed to be three years older than female spouses for active member valuation purposes.
<i>Normal Form of Benefit</i>	A straight life benefit is the normal form of benefit.

Miscellaneous and Technical Assumptions

- OPEB Contribution Refunds*** For purposes of valuing the liabilities associated with OPEB contribution refunds (that are paid out of the pension plan), the Non-Hybrid investment return is used for Non-Hybrid members and the PPP investment return assumption is used for PPP members.
- PPP2 Accrued Liability Load*** The PPP2 accrued liability includes \$1.3 million for employee and employer contribution amounts collected and included in the plan's reported assets attributable to participants not yet included in the pension valuation due to PPP2/DC election waiting periods. ORS reported that contributions (12.4% of payroll) had been collected on payroll totaling approximately \$10.4 million.
- PPP/PPP2 Normal Cost Load*** We anticipate that as the PPP and PPP2 populations mature, they will take on a pay structure (i.e., an evolution of full-time / part-time membership composition) similar to the current Non-Hybrid population. We have developed a load of 0.35% of payroll for the PPP group and 2.37% of payroll for the PPP2 group to be applied to their respective normal costs to account for this expectation.
- Procedure for Estimating Fiscal Year Employer Dollar Contributions*** For purposes of determining the dollar contribution amounts, it is assumed that the total payroll will increase by 2.75% per year through fiscal year 2021. For purposes of amortizing the UAAL, a 3.50% payroll growth assumption is used, consistent with the payroll growth schedule as outlined in Public Act 181 of 2018. For people active as of September 30, 2018, projected payroll through fiscal year 2021 is based upon valuation demographic and salary increase assumptions. The remainder of the projected payroll in fiscal year 2021 (due to new hires after September 30, 2018) is allocated as follows: 26% to PPP2 members and 74% to DC members. The allocation of new entrants between PPP2 members and DC members was supplied by ORS in conjunction with the 30-year contribution projection for MPSERS as of September 30, 2017 and issued in September 2018.

Miscellaneous and Technical Assumptions

Reconciliation Payments

ORS provided the following schedule of reconciliation payments. For purposes of determining the present value of the reconciliation payments, it was assumed that payments occur in the middle of the fiscal period.

Fiscal Year	Reconciliation Payment
2019	\$ 144,256,307
2020	157,010,933
2021	101,569,259
2022	40,292,090
2023	18,900,186
2024	17,695,155

Salary Increase Timing

Salary increases were assumed to be at the beginning of the fiscal year. This is equivalent to assuming that reported pays represent amounts paid to members during the year ended on the valuation date.

Service Purchase Loads

The following two loads have been included in the accrued liability to account for service purchases:

\$56.4 million for amounts included in the plan's reported assets for purchased service that has not been paid for yet by the members. This amount is provided by ORS for each valuation.

\$17.5 million estimated for purchased service paid for, but not reported in the valuation. We have estimated this amount based on supplemental data reported for the September 30, 2018 valuation.

SECTION F

PLAN PROVISIONS

Plan Provisions as of September 30, 2018

Our actuarial valuation of the System is based on the present provisions of the Public School Employees' Retirement Act (Act 300 of 1980, as amended).

Regular Retirement (no reduction factor for age):

Eligibility – For Basic members, age 55 with 30 years credited service; or age 60 with 10 years credited service. For Member Investment Plan (MIP) members, any age with 30 years credited service; or age 60 with 10 years credited service; or age 60 with 5 years of credited service provided member worked through 60th birthday and has credited service in each of the last 5 years. For Pension Plus Plan (PPP) and Pension Plus 2 Plan (PPP2) members, age 60 with 10 years of credited service.

Mandatory Retirement Age - None.

Annual Amount

Basic and MIP – Credited Service as of the Transition Date (i.e., February 1, 2013) times 1.5% times Final Average Compensation (FAC),

Plus

An amount determined by the member's election of Option 1, 2, 3 or 4 described below:

Option 1 – Credited Service after the Transition Date times 1.5% times FAC.

Option 2 – Credited Service after the Transition Date (until total service reaches 30 years) times 1.5% times FAC, PLUS Credited Service after the Transition Date and over 30 years times 1.25% times FAC.

Option 3 – Credited Service after the Transition Date times 1.25% times FAC.

Option 4 – None (Member will receive a benefit through a Defined Contribution plan).

PPP and PPP2 – Credited Service times 1.5% times FAC.

Final Average Compensation (FAC) - Average of highest 60 consecutive months. (36 months for MIP members). FAC is calculated as of the last day worked unless the member elected Option 4, in which case FAC is calculated as of the Transition Date.

Plan Provisions as of September 30, 2018

Early Retirement (age reduction factor used):

Eligibility - Age 55 with 15 or more (but less than 30) years of credited service and earned credited service in each of the last 5 years. At least 10 of the 15 years of credited service has to be earned service. PPP members are not eligible for early retirement benefits.

Annual Amount - Regular retirement benefit, reduced by 1/2% for each month by which the commencement age is less than 60.

Deferred Retirement (vested benefit):

Eligibility - 10 years of credited service. Benefit commences at the time age qualification is met.

Annual Amount - Regular retirement benefit based on service and final average compensation at time of termination.

Duty Disability Retirement:

Eligibility - No age or service requirement; in receipt of workers' disability compensation.

Annual Amount - Computed as regular retirement benefit with minimum benefit based on 10 years credited service. Additional limitation such that disability benefits plus authorized outside earnings limited to 100% of final average compensation (increased by 2% each year retired).

Non-Duty Disability Retirement:

Eligibility - 10 years of credited service.

Annual Amount - Computed as regular retirement benefit based on credited service and final average compensation at time of disability. Additional limitation such that disability benefits plus authorized outside earnings limited to 100% of final average compensation (increased by 2% each year retired).

Duty Death Before Retirement:

Eligibility – No age or service requirement. Beneficiary is in receipt of workers' compensation. Also applies to "duty disability" retirees during first three years of disability.

Annual Amount – Spouse benefit computed as regular retirement benefit with minimum benefit based on 10 years of credited service, reduced for 100% Survivor election. If no surviving spouse, children under 18 share in benefit; if no spouse or children, a disabled and dependent parent is eligible.

Plan Provisions as of September 30, 2018

Non-Duty Death Before Retirement:

Eligibility – For Basic members, 15 years of credited service, or age 60 and 10 years of credited service. For MIP members, 10 years of credited service, or age 60 and 5 years of credited service. For PPP members, 10 years of credited service.

Annual Amount - Computed as regular retirement benefit, reduced in accordance with a 100% Survivor election, with payments commencing the first of month following death. For the beneficiary of a deferred member, benefit commences at time member would have attained the minimum age qualification.

Member Contributions:

Basic and MIP Members

Before Transition Date (February 1, 2013)

Basic members – None.

MIP members hired before January 1, 1990 - 3.9% of pay.

MIP members hired on or after January 1, 1990 and before July 1, 2008 - 3.0% of first \$5,000 of pay, plus 3.6% of next \$10,000 of pay, plus 4.3% of pay in excess of \$15,000.

MIP members hired on or after July 1, 2008 - 3.0% of first \$5,000 of pay, plus 3.6% of next \$10,000 of pay, plus 6.4% of pay in excess of \$15,000.

On or After Transition Date (February 1, 2013)

Contributions depend on member election of Option 1, 2, 3, or 4.

Option 1 – Basic Members – 4%
All MIP Members – 7%

Option 2 – Contribution as in Option 1 until member reaches 30 years of service. At 30 years of service, contribution reverts to pre-transition date level.

Option 3 – Post transition date contribution is the same as the pre-transition date contribution.

Option 4 – None (Member will receive a benefit through a Defined Contribution plan).

Plan Provisions as of September 30, 2018

PPP Members – 3.0% of first \$5,000 of pay, plus 3.6% of next \$10,000 of pay, plus 6.4% of pay in excess of \$15,000.

PPP2 Members – The member contribution rate will be based upon a 50/50 cost sharing arrangement with the employer with respect to the normal cost and the financing of any unfunded actuarial accrued liabilities associated with PPP2 participants.

Post-Retirement Cost-of-Living Adjustments:

One-time upward adjustments have been made in 1972, 1974, 1976, and 1977 for members retired on or after July 1, 1956 and prior to July 1, 1976 for members who were eligible for Social Security benefits. For members who retired prior to July 1, 1956 and were not eligible for Social Security benefits based upon membership service, the minimum base pension was increased in 1965, 1971, 1972, 1974, and 1981, and in 1976 and 1977 one-time upward adjustment were made.

Beginning in 1983 some benefit recipients received an annual distribution of investment earnings in excess of 8% (supplemental payment). On January 1, 1986, all members who retired prior to January 1, 1986 were given a permanent 8% increase. On January 1, 1990 a one-time upward adjustment for members who retired prior to October 1, 1981 was made.

Currently members receive annual increases based on the following schedule:

Retired before January 1, 1987 - Greater of supplemental payment or automatic 3% increases.

Retired on or after January 1, 1987 under MIP - Automatic 3% increases only.

Retired on or after January 1, 1987 under Basic plan - Supplemental payment only.

Retired under PPP or PPP2 – No increases.

Optional Forms of Payment:

The normal form of payment for a member who retires is a straight life annuity.

Section 85 of the MPSERS statute allows the member to choose from the following optional forms of payment: 100% joint and survivor annuity with pop-up, 75% joint and survivor annuity with pop-up, or 50% joint and survivor annuity with pop-up. Additionally, the straight life benefit and the joint and survivor optional forms can be paired with a Social Security equated option at age 62.

The optional forms of payment are actuarially equivalent to the straight life annuity. Option factors are based upon the following: (1) investment return assumption of 6.75%, (2) valuation mortality assumptions for healthy retirees, (3) unisex percent of 30% and (4) calculation year of 2021. The pop-up provision and any applicable COLA are reflected in the factors.

Plan Provisions as of September 30, 2018

Member Contributions Attributable to the Retiree Health Plan:

Under Public Act 300 of 2012, members were given the choice between i. and ii. below:

- i. Maintaining eligibility for premium subsidy retiree medical coverage, and contributing 3% of their compensation while still working, or
- ii. Entering the Personal Healthcare Fund (PHF).

Members not making an election will default into the premium subsidy arrangement.

If a member who elected the subsidy terminates prior to becoming eligible for the subsidy, dies before the total value of the subsidy received equals the total value of contributions made, or retires and declines coverage, the member or beneficiary may request a refund of unused funds. Refunds of member contributions to the healthcare funding account are issued as a supplemental pension benefit (payable at age 60 and payable from the pension plan) paid out over a 60-month period.

SECTION G

GLOSSARY

Glossary

<i>Actuarial Accrued Liability</i>	The difference between (i) the actuarial present value of future plan benefits, and (ii) the actuarial present value of future normal cost. Sometimes referred to as “accrued liability” or “past service liability.”
<i>Accrued Service</i>	The service credited under the plan which was rendered before the date of the actuarial valuation.
<i>Actuarial Assumptions</i>	Estimates of future plan experience with respect to rates of mortality, disability, turnover, retirement, rate or rates of investment income and salary increases. Decrement assumptions (rates of mortality, disability, turnover and retirement) are generally based on past experience, often modified for projected changes in conditions. Economic assumptions (salary increases and investment income) consist of an underlying rate in an inflation-free environment plus a provision for a long-term average rate of inflation.
<i>Actuarial Cost Method</i>	A mathematical budgeting procedure for allocating the dollar amount of the “actuarial present value of future plan benefits” between the actuarial present value of future normal cost and the actuarial accrued liability. Sometimes referred to as the “actuarial funding method.”
<i>Actuarial Equivalent</i>	A single amount or series of amounts of equal value to another single amount or series of amounts, computed on the basis of the rate(s) of interest and mortality tables used by the plan.
<i>Actuarial Present Value</i>	The amount of funds presently required to provide a payment or series of payments in the future. It is determined by discounting the future payments at a predetermined rate of interest, taking into account the probability of payment.
<i>Amortization</i>	Paying off an interest-bearing liability by means of periodic payments of interest and principal, as opposed to paying it off with a lump sum payment.
<i>Experience Gain/(Loss)</i>	A measure of the difference between actual experience and that expected based upon a set of actuarial assumptions during the period between two actuarial valuation dates, in accordance with the actuarial cost method being used.

Glossary

<i>Normal Cost</i>	The annual cost assigned, under the actuarial funding method, to current and subsequent plan years. Sometimes referred to as “current service cost.” Any payment toward the unfunded actuarial accrued liability is not part of the normal cost.
<i>Reserve Account</i>	An account used to indicate that funds have been set aside for a specific purpose and is not generally available for other uses.
<i>Unfunded Actuarial Accrued Liability</i>	The difference between the actuarial accrued liability and valuation assets. Sometimes referred to as “unfunded accrued liability.”
<i>Valuation Assets</i>	The value of current plan assets recognized for valuation purposes. Generally based on market value plus a portion of unrealized appreciation or depreciation.
