**Subject:** Notice to automobile testers: Driver Education school code blank on the Segment 2 certificate  
**Date:** Monday, November 18, 2019 10:02:11 AM

---

The Driver Education Section no longer issues Segment 2 school codes to new driver education providers. Automobile skills test examiners may encounter Segment 2 certificates with the school code blank. An examiner that is presented a certificate without the school code may accept it as proof of completion and should leave the school code section of the score sheet blank. Examiners are still required to record the school permit number and completion date on the score sheet.
