

MICHIGAN STRATEGIC FUND

MEMORANDUM

DATE: November 7, 2018

TO: The Honorable Dave Hildenbrand, Chair Senate Appropriations Committee
The Honorable Jim Stamas, Chair Senate Appropriations Subcommittee on General Government

The Honorable Laura Cox, Chair House Appropriations Committee
The Honorable Rob VerHeulen, Chair House Appropriations Subcommittee on General Government

FROM: Jeff Mason, President Michigan Strategic Fund
Nick A. Khouri, State Treasurer Michigan Department of Treasury

SUBJECT: MEGA and other Certificated Credits 2018 Annual Report

Sections 941 and 1043 of Public Act 207 of 2018, the General Government Omnibus Budget, require the Michigan Strategic Fund and the Department of Treasury to report the annual cost of the Michigan Economic Growth Authority (MEGA) tax credits. The report shall include for each year the board-approved credit amount, adjusted for credit amendments where applicable, and the actual and projected value of tax credits for each year from 1995 to the expiration of the credit program. For years for which credit claims are complete, the report shall include the total of actual certificated credit amounts. For years for which claims are still pending or not yet submitted, the report shall include a combination of actual credits where available and projected credits. Credit projections shall be based on updated estimates of employees, wages, and benefits for eligible companies.

Additionally, these sections require reporting on the annual cost of all other certificated credits by program, for each year until the credits expire or can no longer be collected. Pursuant to this requirement, attached is the 2018 Annual Report.

Should you have any questions, please contact the MEDC Office of Government Relations at 517.335.1847 or the Department of Treasury at 517.373.2697.

FY 2018 Legislative Report MEGA and other Certificated Credits Annual Cost

As required by Sections 941 and 1043 of Public Act 207 of 2018, the attached tables address the certificated credits annual cost reporting requirements for the Michigan Strategic Fund (MSF) and the Michigan Department of Treasury for Fiscal Year (FY) 2018 beginning October 1, 2017 and ending September 30, 2018.

With the repeal of the Michigan Business Tax (MBT) for most businesses beginning in 2012, no new Michigan Economic Growth Authority (MEGA) tax credits have been awarded since 2011. Table 1 contains the actual number and value of MEGA tax credit certificates issued since the program began, as well as the remaining projected liability of these credits through the end of the agreement terms and are presented by Company Tax Year. The certificates issued information is comprised of actual certificates issued by the MSF through September 30, 2018. These credits may not yet have been submitted to the Department of Treasury for processing as companies have up to 4 years after the date in which the original tax return is due to file an amended return and receive the benefit of the MEGA credit.

The estimated remaining liability is calculated using number of qualified jobs, wage and healthcare costs obtained from the most recent annual certificate application submitted by an eligible business. Growth factors provided by the Department of Treasury are used to project the credit value through the end of the MEGA term defined in each individual company agreement. These costs are then multiplied by the personal income tax rate factor resulting in the remaining estimated liability to the State of Michigan.

Table 2 contains the projected liability by Tax Year in which the MEGA tax credits described above will be earned. In addition, it contains the annual estimated cost by Tax Year, by program, for Brownfield Redevelopment Credits, film credits, MEGA polycrystalline silicon manufacturing credits, MEGA vehicle battery credits and other certificated credits, as required in Sections 941(2) and 1043(2).

Table 3 reflects estimates by the Fiscal Year in which the certificated credits will be submitted to Treasury and refunded. Note, the MEGA photovoltaic and anchor credits are not anticipated to be submitted.

The Tax Year table (Table 2) begins with Tax Year 2016 and has total credits of \$7.732 billion, whereas the Fiscal Year table (Table 3) begins with Fiscal Year 2016 and has total credits of \$9.401 billion. The difference in certificated credits between these two tables is due to differences in the timing of the credits on a tax-year versus a fiscal-year basis. The Tax Year table breaks down the outstanding credits by the year in which the business activity that qualifies for the credit will occur and the Fiscal Year table breaks down the credits by the Fiscal Year in which the credits will be filed with the Department of Treasury and the refunds will be paid. Certificated credits are not earned and refunded in the same year. Once business activity is completed that qualifies for a credit, the business must apply for the credit with the MSF and the MSF must approve the credit and issue a credit certificate. The business must then file the certificate with the Department of Treasury to claim the credit and receive a refund or reduce their tax liability.

The Brownfield Redevelopment Tax Credit program was eliminated on December 31, 2011. There have been no new credits issued since that time. As of September 30, 2018, total outstanding unclaimed credit liability is approximately \$343 million, which also includes unclaimed credits from fiscal years 2016 and 2017. There was \$60.1 million for brownfield certificate of completions claimed in FY 2018. A certificate of completion is issued by Michigan Economic Development Corporation staff on behalf of the MSF upon verification of eligible investment and project completion. A certificate of completion is utilized by the qualified taxpayer to file with the Department of Treasury to claim the Brownfield Redevelopment Tax Credit.

There is a potential for Brownfield credits to be amended to extend their approved timeframe from 5 years to 10 years. A timeframe extension to 10 years does not increase the overall liability. Outstanding liability accounts for both single phase and multi-phase credits within the 10 year statutory time frame. There is a total of 31 multi-phase credit projects. If a multi-phase credit project is not completed in its entirety for all approved phases, any previously claimed credit is repayable as a penalty to the Department of Treasury. Statutorily, outside of multi-phase credits, there is not a legal timeframe for a qualified taxpayer to request their credit, therefore, it is possible not all Brownfield credits will be claimed upon final expiration of all credits which occurs in early 2022.

The Film Credit program was eliminated in 2011 and no new credits have been issued since. There is \$27.4 million in outstanding film credits that have yet to be claimed; however, it is estimated that these credits will not be claimed because the projects were not pursued for various reasons. There is no expiration date for these credits.

Estimated MEGA Tax Credit Liability

9/30/2018 Table !

Company Tax year	Proposed Value at time of Approval	# of Certificates Issued	Value of Certificates Issued	Estimated # of Certificates	Estimated Remaining Liability
1996	\$1,360,000	4	\$ 955,674

Total	\$259.7	\$343.0	\$28.9	\$5.1	\$72.4	\$8,259.4	\$286.8	\$146.3	\$9,401.6

Source: Michigan Economic Development Corporation and Michigan Department of Treasury based on best information available on current agreements.

Notes: The total certificated credits on a fiscal year basis, as presented in this table, are greater than the certificated credits on a tax year basis, as presented in Table 2 due to the difference in the timing of when the credit-qualifying activity occurs in a particular tax year and when the business actually files a credit certificate with the Department of Treasury. As a result of these timing differences, the credits on a fiscal year basis presented in this table includes some credits that were earned prior to tax year 2016.

Anchor and Photovoltaic credits have zero values for the time period of this report.

(1) Excluded from this estimate are \$27.4 million in film credits for approved projects. The projects are not yet successfully completed and not expected to claim approved credits.
