RE: Notification of Mass Layoff affecting Ryder Operations at Chrysler (FCA) Trenton Engine Plant

Dear Director Quinn:

In accordance with the Worker Adjustment and Retraining Notification Act (WARN), I am informing you of the anticipated mass layoff affecting Ryder operations within the Chrysler (FCA) Trenton Engine Plant located at 2300 Van Horn Road, Trenton, Michigan 48183. The layoff is expected to be permanent. There are no bumping rights applicable to employees terminated as a result of this mass layoff.

We currently anticipate that the first separation of employees will occur during a 14-day period commencing on June 27, 2016. We anticipate that approximately 40 employees will be laid off during that period. A listing of the job titles of the positions to be affected and the number of affected employees in each job classification is maintained on-site in the Human Resources Office and can be provided upon request. The affected employees are represented by the UAW. The President of Local 372 is Mr. Gabe Solano, 4571 Division Street, Trenton, Michigan 48183.

If you have any questions, please contact Christopher W. Lewis, Senior Manager, Human Resources at (517) 610-9388. Thank you for your cooperation during this difficult time.

Respectfully,

CHRISTOPHER W. LEWIS  
Senior Manager  
Human Resources
