PROCEDURES

DTMB Warehouse Services

- Provides for the storage, inventory control and distribution of agency forms, publications, and materials.

Agency

- Reviews forms management requirements and uses services provided by Warehouse Services.
 - Requests service by submitting a list of all items by form number, description, quantity to be stocked and unit of issue by which items are disbursed.
 - Provides the name and telephone number of a single contact person responsible for communicating information between the agency and Warehouse Services. The agency will be notified of procedures for the receipt, storage and distribution of forms, publications, and materials once approval has been provided.

Other Information

- Requests for agency forms and publication will be processed by using the Warehouse Order Form (DTMB-0595).
- Forms, publications and materials which are not available at the time orders are processed will be back ordered. Through this system, material will be processed and shipped as soon as the merchandise is received.
- Departments will have access to an electronic report listing each commodity stored and the balance on hand.
- Charges for services are pre-determined based on square footage used and services provided. These costs can be obtained from the service provider upon request. Postage, freight or shipping expenses are the responsibility of the agency and charged separately to each user.
- Charges for the warehousing of forms, publications, and materials are established by conducting a square footage inventory of the items being stored. These charges will be adjusted monthly based on the volume of commodities stored.
