# LIQUIDSYSTEMS

Designed to withstand the harshest winter conditions

LIQUID | PRE-WET

LIQUID | ANTI-ICE

LIQUID | DUST CONTROL

[municipal.monroetruck.com](http://municipal.monroetruck.com)

**MONROE**  
MUNICIPAL TRUCK EQUIPMENT

# Liquid | Pre-wet Systems

Pre-wet - Application of a liquid chemical ie. Salt brine, calcium chloride, magnesium chloride, etc. to a granular material.

## Why Pre-wet?

1. Faster reaction time to start the brine process.
  - In order for the rock salt to break down, it must have moisture.
2. More material stays on road surface where spread.
  - Test results from many states show that on average, 30% of dry salt is lost off the road surface upon application.
3. Allows you to use less product.
  - Salt that has been pre-wetted has a loss rate of 4% on average.

## Components of a Pre-wet System

**Tanks** - Available in many different volumes and shapes. Poly tanks have integrally molded threads, baffles and slosh guards for the lid

**Pump** - Hydraulic or Electric  
Displacement is typically from 3-10 gallons per minute.

**Nozzles**

**Plumbing Fittings**

## Open Loop vs. Closed Loop

Closed Loop has a flow meter installed in the plumbing to measure flow. The flow meter emits electrical pulses that are received by a ground speed controller. The control monitors the amount of pulses relative to granular product dispensed.

Open Loop does not contain a flow meter. It may be driven off of the exhaust oil of the conveyor so that as the conveyor speeds up the pre-wet pump also increases. This keeps your ratio of granular to liquid equal.

\*Photo shows tank configuration of 940 total gallons (540 on body and 400 behind cab)

**Tailgate Mounted Pre-wet System**

75-180 gallons  
100 gallons shown in photo

**Behind the Cab Pre-wet System**

120-400 gallons  
240 gallons shown in photo

**1500 Gallon Insert Tanks**

**V-Box with Pre-wet System**

**In-Bed Tank Pre-Wet System**

526 or 960 gallons

**Fender Mounted Pre-wet System**

75-270 gallons per side  
150 gallons per side shown in photo  
Tanks are custom sized to fit body

# Liquid | Anti-Icing

- 200-5000 Gallon Baffled Tanks
- 20-60 Gallon per Lane Mile; 1-3 Lanes
- USA Made Glass Filled Poly Fittings with Manifold Style Connections
- Right Hand, Left Hand and/or Center Lane Applicators
- Stainless Steel Spray Bars
- Stainless Steel Filter Screen
- Directable Side Nozzles
- Quick Attach Nozzles
- Application Rates up to 55 MPH
- Dump Body Slip-In, Chassis Mounted, Trailer Mounted, or Hook Loader Units Offered
- Hook Loader Mounted Units Offered
- Self-Storing/Unloading Skid System (Optional)
- Reduce Overall Winter Operation Costs
- Use Less Rock Salt
- Get the Pre-Treating Advantage on Fighting a Storm
- Environmentally Friendly
- SHRP (Strategic Highway Research Program) Tested Technology

Flush & Dust Capable

Semi Trailer Anti-Ice

# Liquid | Roadside Vegetation

Equipped with 1 to 4  
Chemical Injection System

2700 Gallon Flusher System w/ Removable Rear Skid

## Features:

- Tanks:
- Carrier Tanks 500-3000 Gallon
- Chemical Tanks 30-85 Gallon
- Color Coded Chemical Lines
- Stainless or Cast 190GPM Chemical Pump
- 500-700GPM Flusher Pump
- Load Sensing Hydraulic System
- Raven 4600/4400 Control Console
- Closed Loop Flow Meters
- GPS/Radar Ground Speed
- Data Collection with Mapping Capabilities

1300 Gallon, 4 Product Injection System with Sign Board Option

1000 Gallon System w/ Removable Skid

2700 Gallon Unit

# ALL-SEASON SPREADERS

Designed to withstand the harshest winter conditions

SPREADER | RDS

SPREADER | FFDS

SPREADER | DVS

SPREADER | DTS

# Spreader | RDS (Radius Dump Spreader)

## Standard Features:

- 1. 3/16" Mildsteel Body; 36,000 Yield Strength
- 2. 1/4" Replaceable Floor with 3/16" Removable Chain Shields
- 3. Formed and Boxed Toprail
- 4. 1/4" A36 14" Deep Longsills
- 5. Formed Crossmembers
- 6. 8-Tooth Sprockets Keyed to 2" Drive and Idler Shafts
- 7. Rectangular Double Acting Boxed Perimeter Tailgate
- 8. Receiver Tube Mounted Rear Spinner Assembly
- 34" Wide Conveyor with (2) 6:1 Spur Gearboxes
- 108 Light Group with S/T/T Lights
- Front Telescopic Double Acting Nitrided Hoist Cylinder
- Heavy Duty Pintle Chain

*All RDS Bodies are Available in Mild Steel or Stainless Steel Construction.*

# RDS

Box Length	Capacity Rear Discharge	Capacity Front Discharge	CA Required	Hoist Capacity	Weight (lbs)
10' RDS (RDS-120)	7.19 Cu Yds.	7.11 Cu Yds.	84"	16 Ton Class 60	5,240
11' RDS (RDS-132)	8.00 Cu Yds.	7.92 Cu Yds.	96"	16 Ton Class 60	5,764

Standard: 87" Top Inside Width, 96" Outside Width, Overall 44" Side Height

## RDS Options

### Body Construction Options:

Corrosion Resistant Stainless Steel

### Discharge Options:

Dual Auger with Bottom Screens

Belt Over Chain

### Spinner Options:

Tip-Up Spinner

Front Cross Conveyor with Two Ply High-Temp Rubber Belting and Front Mounted Spinner

Optional Folding Berm Chute for Front Cross Conveyor

Side Spinner w/ Drop Chute

Tailgate Spreader with Dual Discharge

Salt Slurry Generator

### Front & Rear Grease Extension:

Remote Mounted Grease Extension with Each Grease Point Clearly Labeled. Available for Front and Rear

## Other Options:

Fold Up Ladder

3/8" Poly Sub Floor Kit

Stand Alone Cabshield

Rear Cross Conveyor

Top Screens

Fender Mounted Pre-Wet Tanks

Side Extensions

- Floor Covers
- Chain Oilers
- Air Tailgate
- Fenders (Chassis or Body Mounted)
- 12" Side Extensions
- Pipe Kits
- Patch Pan
- Series Parallel Valve
- Spill Guard
- Vibrator

Airfoil Kit

# Spreader | FFDS (Flat Floor Dump Spread)

# FFDS

Shown with optional spill shield, ladder, lights and tarp.

**Standard Features:**

- Available in 9' to 16' Lengths
- 3/16" Mild Steel Sides & Ends
- 3/16" Formed Dirt Shedding Top Rail
- ¼" Long Sills, 14" in Height with Formed Cross Sills
- ¼" Replaceable Floor, Supported on 12" Center
- Dual 6:1 Gear Box Drives
- 2" Drive & Idler Shafts with 2" Heavy Duty Bearings
- 1½" Heavy Duty Chain Adjusters
- Case Hardened Sprockets to 40-48 Rockwell
- 34" Wide Conveyor with ½" x 1½" Bar Flights on
- 4½" Centers
- Heavy Duty Pintle Chain with a 26,000 Minimum Tensile Strength
- Telescopic Double Acting Nitrided Hoist Cylinder
- Full Opening Double Acting Tailgate

Box Length	Side Height	Cubic Yard Capacity	CA Required	Hoist Capacity	Weight (lbs)

# Spreader | DVS (Dump V-Box Spreader)

## DVS

### Standard Specifications:

- 3/16" Mild Steel Body
- 3/16" Formed Dirt Shedding Top Rail
- 3/16" Removable Chain Shields (For Ease of Maintenance)
- ¼" Long sills 14" in Height with Formed Cross sills
- ¼" Replaceable Floor, Supported on 12" centers
- 2" Drive and Idler Shafts with 2" Heavy Duty Bearings
- 1¼" Heavy Duty Chain Adjusters
- Case Hardened Sprockets to 40-48 Rockwell
- 34" Wide Conveyor with ½" x 1½" Bar Flights on 4½" Centers
- Heavy Duty Pintle Chain with a 26,000 Minimum Tensile Strength Rating
- Telescopic Double Acting Nitrated Hoist Cylinder
- Full Opening Double Acting Tailgate
- Receiver Tube Mounted Rear Spinner Assembly

### Options:

- Corrosion-Resistant Stainless Steel Construction
- High Temp Belt-Over-Chain Main Conveyor
- Bar Every Link, 2.25" Pitch
- Ladder in Mild or Stainless Steel
- Side Boards of Mild or Stainless Steel
- Optional Spinner Chutes
- Variety of Light Packages
- Variety of Cab Protectors
- Asphalt chute or Patch Pan
- Top Screens
- Grease Line Extension

# Spreader | DTS (Dump Tip Spread)

Dump

## Standard Features:

- 3/16" Structurally Engineered Body
- High Tensile Floor
- Cab Protector
- 6-Panel, Double-Acting Tailgate
- Dirt-shedding, Boxed Top Rails
- Overcenter Lock, Air Release
- Tailgate Latch
- Nitrated Telescopic Hoist Cylinder
- Two 4" Timed Tilt Cylinders
- Stainless Hinge Pins
- Grease Line Extensions
- Stainless Removable Conveyor
- 25:1 Drive System
- Adjustable Spinner / Berm Chute
- Adjustable Spinner with Poly Disc
- Sealed Light System
- Available in Various Materials
- 35 Degree Tilt Angle

Tip

Spread

Removable Conveyor

25:1 Drive System & Screw Adjustable Gate

Adjustable Spinner/Berm Chute

Bolt-On Hinges with Stainless Steel Pins

4" Tilt Cylinder

# Spreader | DTS Metro

## All Seasons Body | No CDL Required

Municipalities across the country rely on the DTS (Dump, Tilt, Spread) Metro to handle rigorous application without requiring a CDL driver. Don't sacrifice functionality for the ability to staff drivers. The DTS Metro accomplishes variety of tasks to help keep communities safe, clean and well maintained.

### FEATURES

Full Stainless Steel Understructure

Single Lever Release Double Acting Tailgate

Left Front Material Discharge

Low Center of Gravity

Integral Conveyor Cover

Left Fold Down Side

Trunnion Mounted Telescopic Hoist

### Dump

This live floor dump body offers efficient operation and quick changeover between materials and/or operations.

### Tilt

Allows operators to spread materials utilizing the tilt function while keeping the body in the lowered position maintaining a lower center of gravity.

### Spread

Positions materials in front of the rear tire for improved traction.

## Drive Options

### Chain Drive

- Drive uses #60 Chain with 2.6:1 ratio
- Drive Assembly is Protected by a One Piece Chain Guard that is easily removable without the use of tools
- Requires some maintenance

### Direct Drive

- Low Speed High Torque Hydraulic Motor directly coupled to the auger
- Provides higher performance
- Decreased maintenance costs

### Gearbox Drive

- Drive has 5:1 reduction with a direct attached motor coupled to the auger
- Better control at low spread rates for more efficient spreading
- Incorporated Thru-Shaft for convenient spread rate sensor mounting

*An innovative and inexpensive way to extend the life of your tailgate spreader spinner!*

The Seal Saver is designed to help eliminate the issue of sand, salt, or other granular products from migrating directly into the motor seal on spinner assemblies.

The complete Seal Saver System includes:

- Hydraulic motor with extended shaft
- Machined poly spacer with a grease groove and zerk installed

Installing the spacer and injecting grease on a regular basis with force undesired materials away from the motor seal.

# Under Tailgate | MS886/MS966/MS969/MS964DA

## Features:

- Economical way to utilize existing dump body for maximum returns winter & summer
- Mildsteel Powdercoat
- Capable of spreading free flowing material from 4' to 40'
- Convenient chain hoist lifting slots placed at balance points for easy safe mounting and dismounting
- All welds are 100% continuously welded to prevent corrosion pockets

- Fully opening lid top with easy access
- Fully opening bottom trough for assisting with complete clean out of unit, and also allowing full access for servicing unit with center lift handle
- Anti-Flow Plate to restrict material from free flowing when unit is stopped

## Options:

- Centerline Chute
- Integral Speed Sensor
- Flow Control Valve
- Hose Kit
- Spinner Guards
- Gravity Leveled Spinner
- 304 Stainless Steel
- 5:1 Gearbox Drive
- Direct Drive

**Q) Why should I use a Monroe undertailgate auger-style spreader?**

**A) The Monroe auger-style undertailgate spreader allows you to dispense free-flowing granular material for the purpose of making roads, driveways, parking lots, and runway lots for safe travel. Because these spreaders can spread salt, sand, pea gravel, and even small sized road stone, they are an extremely versatile and inexpensive option when used in conjunction with a standard dump body.**

Monroe Quick Hitch Brackets

\*Dimension without Spinner attached.

Z-Latch

Optional Extended Side Shield

## Features:

- 7ga. Trough Assembly
- 1/4" One-Piece Endplates
- Full Top and Bottom Openings
- 4-1/2" O.D. Roller Assembly
- Roller has an adjustable Steel Wear Plate on the front side
- Four Independent Spring Loaded Anti-Flow Gates on the back side that are adjustable from a dusting of material to applying 3" deep material

## MS88RS

		BEARINGS:	2-BOLT
		SELF-ALIGNING:	YES

Optional Chip Attachment:  
Swing out chip spreader attachment for 11' chip coverage

### Q) Why should I use a Monroe undertailgate roll-style spreader?

A) The Monroe roll-style undertailgate spreader allows you to drop free-flowing material in an 88" or 96" wide path directly behind the truck. This is critical in areas where users don't want to broadcast material over a wider area, or they need to reclaim most of the spread material after the storm event. Also, for areas with environmental regulations, no other spreader has as much to offer. Finally, this spreader is ideal for chip spreading applications or seal-coating operations. The optional chip spreader re-distributes the material flow from 8" to 11" with no moving parts.

- Vertically-Mounted Spinner Assembly
- 10ga., 304 Stainless Steel Housing
- 2-Safety Bars constructed of 3/16", 304 Stainless Steel
- AR400 Impeller has Four Paddles
- Spinner Assembly Mounted with approx. 6" ground clearance
- The Impeller Drive Motor has low speed/high torque "Orbital-Type" Hydraulic Wheel Motor
- Spinner Assembly shall lift 6" by actuating remote in cab switch
- 45 degree rotation and left of center position by actuating remote in cab switch
- Used in conjunction with under tailgate, replacement tailgate or V-Box spreader in lieu of conventional spinners

# Replacement Tailgate | RT/RTS/ZDRT

RTS Spreader with built-in Pre-wet Tank and Twin Spinner

## Options:

- Spinner Guards
- Agitator Bar
- Open Center and Closed Center Flow Control Valves
- 3/16" Bolt-On Mild Steel Backing Plate
- Hose Kits
- Custom Paint
- 3, 6, & 9 Panel Reinforcement
- Stainless Steel
- Integral Pre-wet Tanks

1-Ton Replacement Tailgate Spreader Application shown with optional Receiver Hitch Mounted Spinner

## RTS Features:

- Tailgate is constructed of 3/16" Mild Steel Body with 1/4" Endplates
- 3" x 3" x 1/4" Minimum Tube Type Frame
- Full-Width Auger located below the dump body floor
- Auger has 3/8" flighting with a 4" pitch
- Agitator has ten, 3.5" x 3.5" x 1/4" interrupters angularly welded
- Both Auger and Agitator are direct driven by low speed high torque hydraulic motors
- Interior seams are 100% continuously welded
- Self-Leveling spinner assembly is equipped with an 18" spinner disc constructed of black polymer material
- Full Bottom Opening
- Powder Coat Paint

## RT Features:

- Full Width Auger eliminates corner build-up
- Easy installation and removal
- 7ga. construction
- 6" Auger with 4" pitch and 3/8" thickness
- Continuous welded interior
- Maximum ground to spinner height
- Spinner remains parallel to ground at various dump angles
- Low speed high torque motor gives dependable spreading control
- Adjustable spinner for various spreading patterns
- Slip-off drive assembly guard

### Q) Why should I use a Monroe full replacement style spreader?

A) The Monroe full replacement tailgate style spreader is designed to completely replace the original dump body tailgate. Each one is custom-built in our modern manufacturing facility here in Monroe, Wisconsin, by carefully trained welders and assemblers. By building each unit to the exact dimensions you provide from your existing dump body tailgate, we can help ensure a tight fit, no material leakage and excellent spinner clearance to the ground.

### Q) What limitations do I need to take into consideration when choosing a Monroe Full Replacement style spreader?

A) Monroe builds two distinct styles of full replacement spreaders. Our RT unit is designed for small trucks where spinner clearance is a particular issue. Because the bottom trough does not open and the spinner sits at the level of the dump body floor, an extra 8" of clearance is obtained.

Conversely, the Monroe RTS unit has a full-opening bottom trough and the spreader is designed so the hopper sits below the level of the dump body floor. Typically used on larger trucks where spinner clearance isn't critical, the RTS may be up to 55" tall, depending on the provided tailgate dimensions.

Each of these two units allows the granular material to feed more evenly into the spreader since continuous load pressure can be maintained more easily than with an undertailgate spreader. Hinges and locking pins must be fitted by the installer.

# Rear Cross Conveyor | MS1031/MS10318

## MS10312

### GENERAL SPECIFICATIONS

WIDTH:	103"
DEPTH*:	28.46 OAL
HEIGHT*:	26.94 OAL
ENDPLATES:	1/4"

BELT THICKNESS:	3/8"

## MS10318

### GENERAL SPECIFICATIONS

WIDTH:	103"
DEPTH*:	34.46 OAL
HEIGHT*:	26.94 OAL
ENDPLATES:	1/4"

### CONVEYOR SPECIFICATIONS

ADJUSTABLE FEED GATE (x2):	10" x 16"
DISCHARGE:	LEFT AND/OR RIGHT
BELT WIDTH:	18"
BELT THICKNESS:	3/8"

Shown with Optional Spinner Assembly and Berm Chute

Optional 4' Extension with caged rollers

### Features:

- Spreads a wide variety of material which includes all types of aggregate and hot mix asphalt
- Performs shoulder maintenance, rut-filling, asphalt-patching and ice control
- Available in a 12" or 18" Conveyor width
- Bi-directional conveyor provides driver side or passenger side discharge
- Quick Attach/Detach, Self-leveling mounting hardware
- Hi-Temp straight belt with flexible stainless splicing
- Caged design drive and idler pulleys
- Poly support rollers with stainless steel shaft, which eliminates the need for bearings
- Heavy duty bearing and belt adjustment

### Options:

- 4' Extension with Belt to mount to Hydraulic Truck Conveyor
- Light Package - Stop, Turn & Tail Light with 3-light Cluster
- Sand Bag Attachment
- Corrosion-Resistant Stainless Steel
- Spinner Assembly
- Reversing Valve
- Berm Chute

### Q) Why should I use a Monroe Rear Cross Conveyor Spreader?

A) The Monroe Rear Cross Conveyor spreader is designed to spread all types of aggregate, hot mix and even soil when used in conjunction with a standard dump body. It is ideal for shoulder maintenance, edge rut filling, patching and ice control. Available from Monroe in either a 12" or 18" wide belt, these versatile units are low-maintenance, self-cleaning units that are great for the small municipal entity that needs to spread good abrasives in the winter, yet can't afford a separate shouldering machine for spring and summer work.

- Available in Manual or Hydraulic Actuation
- Bolt-On Replaceable 1/2" x 4" Skid Shoe Weldments
- 24" Wide Leveling Box
- Height Adjustable Leveling Blade
- Universal Left or Right Hand Mounts
- Can be raised up and out of the way for transport
- Unit slides on six heavy duty UHMW slider blocks for better support
- Powder Coat Black
- Available for Monroe MS10318 Rear Cross Conveyor
- 1/4" x 2 - 1/2" Slider Angles for support of leveling box

## Modular Design MCV V-Box

### Standard Features:

- 8'-17' Hopper Lengths
- 10 Gauge Hopper Shell with 45° Sloped Sides
- 7 Gauge Longitudinals
- Modular, Bolt-On, Replaceable Tail Section
- 8-Tooth Sprockets
- 2" Drive Shaft and a 2" Spring Loaded Idler Shaft
- 4-Bolt Flange Relubeable Bearings
- Front and Rear Wipers
- Bolt-In Chain Shields
- $\frac{3}{8}$ " Bar Flights
- $\frac{3}{16}$ " Replaceable Floor
- 50:1 Worm Drive Gearbox
- Self Locking Screw Jack for Rear Door Adjustment
- 4 Lift Loops

### Options:

- Corrosion Resistant Stainless Steel
- 1  $\frac{1}{2}$ " Drive & Idler Shafts
- Roller Chain
- Chain Bar Every Link
- Auger - Single or Dual
- Belt with Wipers
- 25:1 or 6:1 Gearbox
- Spinners:
  - » Tip-Up
  - » Bolt-On
  - » Spinner with Bottom Mounted Motor

Pin Assembly with Roller, Grease Fitting, & Machine Nut

### NOTE:

MTE roller pins for Husting-style hitches will not latch properly with angled hitch reinforcements. Plow-portion hitches must have a C-channel style reinforcement to prevent interference with the roller pins.

Older plow hitches must be updated with C-channel (Part #00137630) when used with MTE roller pins.

# PLOWWINGS

Designed to withstand the harshest winter conditions

WING | JUNIOR

WING | PATROL

WING | BENCHING

[municipal.monroetruck.com](http://municipal.monroetruck.com)

**MONROE**  
MUNICIPAL TRUCK EQUIPMENT

# Wing | Junior

Model #	Weight	Moldboard Length
MJW-6	960 lbs.	6'
MJW-7	995 lbs.	7'
MJW-8	1,030 lbs.	8'
MJW-9	1,065 lbs.	9'

## Standard Features:

- 27" Intake Height and 28" Discharge Height on Moldboard
- Two Double-Acting Cylinders for Direct Lift of Toe and Heel
- Direct-Lift Front Wing Slider Post, Options available for Mid-Mount Paraglide
- Wing Requires Two 4-Way Valves with 2100 PSI Relief for Heel Raise to Operate (Not included)
- Wing Provided with Under Frame Cross Tube Mounting and Hardware
- Moldboard is Shot Blasted and Powder Coat Painted Orange
- Mounting Hardware is Powder Coat Painted Black
- 10 Gauge Moldboard
- 3/8" One Piece, Tapered, Flame Cut Ribs

## Options:

- Available with Monroe Para-Glide® Wing Post
- Right, Left or Dual Mount
- Mid or Rear Mount
- Cast Iron Moldboard Shoe to Extend Cutting Edge Wear
- Wrap Around Curb Guard to Prevent Moldboard Heel End Damage
- Carbide Cutting Edge for Longer Cutting Edge Life
- Two-Piece Torsion Spring Trip Cutting Edge
- Full Moldboard Trip
- Decell Heel Cylinder to Slow the Heel Lift Cylinder Function When Activating it to Stow the Wing, Thus Helping to Prevent Damage to the Chassis or Body

Shown with Full Trip Option

Shown with Trip Edge Option

## Reasons for Use:

- Takes up less room on truck frame, can be mounted behind the cab or to the rear of the chassis
- Folds tightly to truck for use in tight areas
- Dump box can be raised with moldboard in stow position (in most cases)
- Paraglide mid-mount post can be used in place of slider post to prevent hang-ups and moldboard toe from "digging in"
- Slider post offers 12" of lift
- Paraglide post offers 5" of lift
- Good visibility to operator from passenger side mirror

# Wing | Mid-Mount Extendable

Model #	Weight	Moldboard Length
8-MEW	1,275 lbs.	8'

Mid-Mount Extendable Wing

## Standard Features:

- 24" Height x 8' Length Moldboard
- 1/2", Tapered, One-Piece, Flamecut Ribs
- 5/8" x 8" AASHO Top Punched Cutting Edge
- Wing Provided with Under Frame Cross Tube Mounting and Hardware
- Wing Requires Two 4-Way Valves & One 3-Way Valve to Operate (Not included)
- Two Double-Acting Cylinders; One Extension Cylinder and One Heel Cylinder
- One Single Acting Cylinder for Toe
- Moldboard is Shot Blasted and Powder Coat Painted Orange
- Mounting Hardware is Powder Coat Painted Black
- Non-Trip Moldboard
- 10 Gauge Continuously Welded Moldboard

## Options:

- Cast Iron Moldboard Shoe
- Wrap Around Curb Guard
- Tapered Moldboard for Additional Snow Load Capacity
- Carbide Cutting Edge
- Special Paint/Colors

## Reasons for Use:

- Simple light duty design for widening the plowing swath
- Offers very light duty benching capabilities
- Small footprint on truck frame allows installation in areas other wings won't fit
- Extended hydraulically perpendicular to the truck frame with additional cylinders to operate the toe and heel
- Easily visible to the operator from the passenger side mirror
- Wing tucks up tightly to the dump body for easy maneuverability and storage

# Wing | Patrol

The perfect complement to your front plow or mid-mount underbody scraper, Monroe's Patrol Wing with advanced technology Paraglide trailing link post will increase your productivity by combining two plowing operations (front and widening) into a one-pass, one-operator trouble-free task. In addition, the Paraglide post reduces the risk of the moldboard toe digging into the ground to help prevent catastrophic damage when the moldboard slams into the passenger side cab door as can happen with conventional slider posts.

Model #	Weight	Moldboard Length

## Standard Features:

- 100% Welded Moldboard
- 1-Piece 1/2" Interlaced Moldboard Reinforcement Ribs
- Free Float to Follow Contour of Road to Shoulder
- Rear Push Mount Installed Above Frame for Increased Ground to Rear Mount Clearance (Other Mounts also available)
- 100% Powder Coat Finish

## Options:

- Two-Piece Torsion Trip Edge
- Left Side or Dual Mount
- Moldboard Wear Shoe to Extend Cutting Edge Wear
- Power and Manual Tilt Front Hitches
- Full Trip Moldboard
- Carbide Cutting Edge for Longer Cutting Edge Life
- Special Paint
- Dual Pusharms
- Power Heel Slide for On-the-Go Swath Widening from the Cab
- Curb Guard to Prevent Moldboard Heel End Damage
- Decell Cylinder to Slow the Heel Lift Cylinder Function when Activating it to Stow the Wing, Thus Helping to Prevent Damage to the Chassis or Body
- Marker Kit

# *Para-Glide* **WING POST**

U.S. Patent No. 8,596,376

U.S. Patent No. 8,596,376

## Standard Features:

- Full Floatation Reduces Road Shock and Vibration to the Vehicle
- Longer Service Life and Fewer Repairs with Increased Safety
- Faster Cycle Times
- Trailing Link Design Reduces the Risk of the Moldboard Toe End Digging into the Ground and Kicking Up into the Truck Cab
- 14" Full Float with 18" of Lift
- Front, Mid or Rear Mounts Available
- Primary Pivot Pins are Center Line Drilled from Each End and Have a Cross Hole for Greasing

*Para-Glide® Wing Post in Resting Position.*

*Para-Glide® Wing Post in Full Float Position.*

# Wing | Heavy Duty Benching

Model #	Weight	Moldboard Length
9HDBW	3,350 lbs.	9'
10HDBW	3,420 lbs.	10'
11HDBW	3,460 lbs.	11'
12HDBW	3,520 lbs.	12'

## Standard Features:

- 3/16" Formed Moldboards
- 4" x 4" x 3/4" Moldboard Bottom Angle
- 1/2" Moldboard Ribs
- Structural I-Beam, Direct-Lift Front Post with 3 1/2" x 62" Lift Cylinder
- Single Telescoping, Three-Position Adjustable, Spring Cushioned Pusharms with Shear Pins
- 100% Powder Coated Orange

## Options:

- Rubber Snow Deflector
- Custom Side Plates
- Cast iron Moldboard Shoe
- Wrap-Around Curb Guard to Prevent Moldboard Heel End Damage
- Cable Lift Front Post
- Carbide Cutting Edge for Longer Cutting Edge Life
- Rear Valve Cabinet & 40 Gallon Reservoir
- Left Side Mount
- Full Trip or Torsion Trip Moldboard
- Straight Moldboard
- Optional Front & Rear Posts
- 40" Benching Height

## Reasons for Use:

- Provides powerful widening and benching capabilities
- High-Lift front post allows operator to push back existing snow windrows into a "bench," getting snow out of the way of the road surface
- The answer for deep piled or drifting snow where brush, trees, ditches, and high banks prevent typical widening operations with a standard patrol wing

Lift System:	Built-In Level Lift

## Q) When would I use a full trip reversible straight blade plow?

A) This plow is used for municipal, commercial, airport and off road plowing. Our most versatile, general purpose snowplow. Full trip is when the cutting edge hits an immovable object no higher than the center of the moldboard hinge points and the whole moldboard moves forward until the cutting edge goes past center and slides over the object. The dual compression trip assemblies return the plow to plowing position once the obstacle is cleared.

Plow Model #	Overall Length	Height w/ 5/8" x 8" Cutting Edge	Approx. Weight (lbs)

## Plow | Deep C-Shaped

Deep C Full Trip Reversible

### Force Required to Trip Moldboard

#### Q) Why would I need a 35 degree attack angle plow?

A) This plow is typically for high speed rural use on paved roads. It handles heavy snow volumes better than most plows; however, because of the attack angle, the plow will not clean hard pack as well as a cutting edge that is almost perpendicular to the road. The ability to plow at higher speeds is possible because the attack angle keeps the plow from easily tripping. The deep moldboard curl helps prevent snow from blowing over the top of the plow back to your windshield.

### Deep C Slotted Trip Reversible

- \* Screw Adjustable Mushroom Shoes - Standard
- \* Dual Adjustable Telescopic Stabilizer Arms - Standard

#### Q) Where is the best application for a slotted trip reversible plow?

A) This plow is used primarily in rural applications. Because of the attack angle, this plow is designed to pick up the snow and discharge it at higher speeds with less restriction. The slotted trip allows the moldboard to slide up into the slots, clear the obstruction and return to the plowing position. Recommended for paved or frozen roads, this plow tends to dig in on soft roads.

# Plow | Torsion Trip Edge

MP51R12-ISTT	12'	51"	2,400

**Q) I have a lot of manhole covers and curbing in my city. Would the C-Style Torsion Trip Edge Plow be good choice?**

**A)** This plow is typically used in metropolitan areas on paved roads. This sectional trip allows you to pass over and immovable object without losing the snow load. Only the section hitting the immovable object will trip which would make it ideal in a city application. On the downside, if all sections trip at the same time the plow will jump when it resets to the plow position.

# Plow | J-Style Torsion Trip Edge

*J-Style (6) Adjustable 3/4\"*

**Q) How does the J-Style torsion trip edge plow compare to the C-Style torsion trip edge plow?**

**A)** This plow is also typically used in metropolitan areas on paved roads. However, because the snow is discharged rapidly to the ground rather than casting it away, it helps prevent damage from thrown snow and avoids covering sidewalks and driveways. The bottom edge trips when hitting an immovable object and may tend to jump when it resets to the plowing position. Shoes are recommended. Spring tension is adjustable on the J-style plow whereas it is not adjustable on the C-style torsion trip edge.

Moldboard Thickness:	3/8" Polymer, Seamless
Moldboard Top Angle:	2" x 2" x 1/4"
Bottom Moldboard Angle:	4" x 3" x 1/2"
Pivoting Rib Assemblies:	3/8" Thick x 3 1/2" Wide Steel Plate
Rib Pivot Cylinders:	3" x 5" DA with 1 1/2" Nitride Rods
Reversing Cylinders:	3" x 16" SA with 3" Nitride Rods
Reversing Limits (Left & Right):	35°
Plow to Table Hinge Points:	4
Cutting Edge:	3/4" x 6" C1090 Steel
Lift System:	2-Point Level Lift Chain

## Plow | Multi-Cast Flex

Right Discharge

Right or Left Discharge

Left Discharge

**Q) I need a power angling plow to work as both a straight blade patrol plow and also occasionally to cast snow either right or left as a tapered blade plow. Problem is, I can't afford three plows; what options does Monroe offer?**

**A)** Check out the Monroe Flex Plow! With the Flex Plow, you can change the moldboard profile on-the-fly from the truck cab to change your snow casting pattern as your plowing needs change. The Flex Plow can be operated straight across in most applications, full right taper for casting towards the passenger side or full left when casting snow from the left lane. You can even curl it down severely from both sides so fluffy snow doesn't spray back towards the operator. In addition, the all-polyurethane moldboard scours easily so the snow doesn't stick to it, plus the plow angles 35 degrees right or left for cleaning up intersections and clearing obstacles.

Dual compression trip spring assemblies for full moldboard trip.

## Plow | 1-Way Full Trip

Moldboard Thickness:	10 Gauge
No. of 1/2" Vertical Ribs:	5
Moldboard Reinforcing:	1 piece, 1/2" Thermo Cut Ribs
Moldboard Top Angle:	2" x 3" x 3/8"
Adjustable Moldboard Pitch Settings:	5°, 10°, 20°
Bottom Moldboard Angle:	3/4" x 4" x 4"
Reversing Limits (Left & Right):	35°
Plow to Table Hinge Points:	4
Cutting Edge:	5/8" x 8" Top Punched
Pivot Pin:	1 1/2" Stopped
Lift System:	2 Chain Lift

Reversible pushframe available as an option.

Plow Model #	Overall Length	Height w/ 5/8"x8" CE High End	Height w/ 5/8"x8" CE Low End	Approx. Weight (lbs)
MPFA30-47-10	130"	46 1/2"	30"	1,280
MPFA39-52-10	130"	51 1/2"	39"	1,450

MPR30-60-12	170"	60"	30"	2,200

**Q) I plow a lot of rural highways. Is the one way full trip plow my best choice?**

**A)** Used in both rural and metropolitan areas, the long, tapered moldboard allows the plow to lift and curl the snow which saves fuel and helps discharge the snow easier. This is a one-way plow, which means it's either tapered to discharge to the right or left. Can also be set up with a reversing table to permit cleanup at intersections. Because of the attack angle this will clean better and will not throw snow great distances. Most are manufactured to discharge to the right, but left discharge is an option.

Force Required to Trip Moldboard

5° Light Trip  
10° Medium Trip  
20° Hard Trip

# Plow | MP311 & MP312

Moldboard Thickness:	10 Gauge
No. of ½" Vertical Ribs:	5
Moldboard Reinforcing:	1 piece, ½" Thermo Cut Ribs
Moldboard Top Angle:	2" x 3" x 3/8"
Adjustable Moldboard Pitch Settings:	9 Positions from 9° to 35°
Bottom Moldboard Angle:	¾" x 4" x 4"
Plow to Table Hinge Points:	4
Cutting Edge:	5/8" x 8" Top Punched
Pivot Pin:	1¼" Stopped

**Q) When should I choose Monroe's MP311 or MP312 plow?**

**A)** Used in rural areas and because of the attack angle and the deeper throat it will discharge large amounts of snow. The deeper the throat also helps prevent snow blowing over the top onto the truck's windshield.

Plow Model #	Overall Length	Intake Height at 9°/35°	Discharge Height at 9°/35°	Approx. Weight (lbs)
MP311	144"	27½"/27"	53"/56"	1,450
MP312	156"	26"/26"	54"/57"	1,785

# Plow | 1-Way High Speed Slotted Trip

Moldboard Thickness:	10 Gauge
No. of ½" Vertical Ribs:	7
Moldboard Reinforcing:	1 piece, ½" Thermo Cut Ribs
Moldboard Top Angle:	2" x 3" x 3/8"
Adjustable Moldboard Pitch Settings:	20° to 50°
Bottom Moldboard Angle:	4" x 6" x ½"
Plow to Table Hinge Points:	4
Cutting Edge:	5/8" x 8" Top Punched
Pivot Pin:	1¼" Stopped

**Q) I plow long runs of open rural highways. Should I choose Monroe's 1-Way High Speed Slotted Trip?**

**A)** This is a higher speed rural plow that will pick up the snow fast and discharge it fast. Designed for deep snow and high speed operation; minimum 15MPH. Higher speeds permit the snow to be cast away much further with this plow. The slotted trip assemblies protect the plow by allowing the cutting edge and moldboard to slide up in slots to clear an object, compressing the springs, then returning to the plowing position after clearing the obstruction. The pushframe has to be supported to make this work so skid shoes are standard. This is a very heavy, good cleaning snowplow.

Plow Model #	Overall Length	Moldboard Height Nose	Cutting Edge Height Discharge	Approx. Weight (lbs)
MPHS26-54-11-ISST	13'10"	26"	54"	2,250
MPHS35-64-11-ISST	14'4"	36"	64"	2,410
MPHS45-72-11-ISST	14'4"	45"	72"	2,450
MPHS26-56-12-ISST	14'9"	26"	56"	2,310
MPHS35-66-12-ISST	15'10"	35"	66"	2,470
MPHS45-72-12-ISST	15'10"	45"	72"	2,525
MPHS25-67-11-OWIS	13'6"	25"	67"	2,155
MPHS23-69-12-OWIS	14'7"	23"	69"	2,263
MPHS36-62-11-OWIS	14'3"	36"	62"	2,537
MPHS36-63-12-OWIS	15'4"	36"	63"	2,625

## Plow | Expressway Full Trip

Moldboard Thickness:	10 Gauge
No. of ½" Vertical Ribs:	7
Moldboard Reinforcing:	1 piece, ½" Thermo Cut Ribs
Moldboard Top Angle:	2" x 3" x 3/8"
Semi-Circle:	3½" x 3½" x ½"
Bottom Moldboard Angle:	4" x 4" x 3/8"
Reversing Cylinders:	(2) 3" x 10" Double Acting Cylinders
Reversing Limits (Left & Right):	37°
Plow to Table Hinge Points:	4
Cutting Edge:	5/8" x 8" Top Punched
Pivot Pin:	1¼" Stopped
Lift System:	Built-In Level Lift

**Q) I have wide-open mountain roads. Is the full trip expressway reversible plow for me?**

**A) Primarily used in rural areas, mountain passes, expressways and Interstate highways, this plow is designed to discharge the snow farther to the right or left depending on the angle of the plow. It has a high discharge on each end allowing the snow to be cast farther out and higher than a straight blade reversible.**

Plow Model #	Overall Length	Moldboard Height Center	Moldboard Height Discharge End	Approx. Weight (lbs)
MPFT36-60-11-EXP	13'8"	36"	60"	1,945
MPFT36-60-12-EXP	14'8"	36"	60"	2,100

## Plow | Expressway Slotted Trip

Moldboard Thickness:	10 Gauge
No. of ½" Vertical Ribs:	7
Moldboard Reinforcing:	1 piece, ½" Thermo Cut Ribs
Moldboard Top Angle:	2" x 3" x 3/8"
Semi-Circle:	3½" x 3½" x ½"
Bottom Moldboard Angle:	4" x 4" x ¾"
Reversing Cylinders:	(2) 3" x 10" Double Acting Cylinders
Reversing Limits (Left & Right):	37°
Plow to Table Hinge Points:	4
Cutting Edge:	5/8" x 8" Top Punched
Pivot Pin:	1¼" Stopped

**Q) When should I choose the slotted trip expressway reversible?**

**A) This is considered a higher speed plow because of the tapered design, attack angle and slotted trip. It will pick up snow and discharge it faster and farther. The plow is used primarily in rural areas, mountain passes, expressways and Interstate highways.**

Plow Model #	Overall Length	Moldboard Height Center	Moldboard Height Discharge End	Approx. Weight (lbs)
MPH40-58-11-EXP	13'3"	40"	58"	2,400
MPH48-66-11-EXP	14'3"	48"	66"	2,500
MPH40-58-12-EXP	14'3"	40"	58"	2,600
MPH48-66-12-EXP	15'4"	48"	66"	2,750

# Plow | Moldboard Options

Not all options are compatible with all models of plows.  
Please contact MTE for more details.

## Polymer Over Steel

3/8" UHMW Polyurethane Overlay

## Mailbox Trim with Rubber Snow Deflector

Provides Optimal Mailbox Obstacle Clearance

## Mouse Ear(s)

Improves Snow Casting Ability - Available on Right Side, Left Side or Dual Ears

## Air Foil

Prevents most of the light snow from blowing over the top of the moldboard onto the driver's windshield.

## Flexible Plastic Markers

42" Flexible Cable Markers

Not all options are compatible  
with all models of plows.

MUNICIPAL TRUCK EQUIPMENT

# Scraper | MS4500

Maximize Vehicle Efficiency with Year Round Maintenance Equipment

Capable of Plowing Snow at Various Speeds and Withstand Snow Pack and Ice

Spring/Summer/Fall Gravel Shoulder and Road Maintenance

## Standard Features

- 1" Thick Moldboard with Formed Offset for Cutting Edge
- Moldboard - Length: 10', 11' & 12' ; Height: 20" or 15"
- ½" x 6", AASHO Punch, Double Beveled Cutting Edge
- Reversible 45° Left and Right with Infinite Plow Positions
- (2) 4" x 12" Double Acting Reverse Cylinders with 2" Rods
- Socatri 1000 Cylinder Rods are Extremely Corrosion Resistant
- 5" Center Pin is Piloted into Hangerboard to Increase Effective Surface Area to Relieve Side Shear on the Pivot Bushing
- Contour Shaped Hold Down Blocks Match the Radius of the Circle for Increased Strength
- Bolt On Trunion Pins at Canister Pivot Points for Ease of Maintenance and Simpler Replacement

Shown with optional Side Plate

\*This model is just one representation of the Monroe 4500 series underbody scraper. Other moldboard heights and lengths will affect the measurements. Call your Monroe representative for more details.

# Scraper | FMB 3500

## Standard Features

- Moldboard - Length: 10', 11' & 12' ; Height: 20"
- Two Piece Moldboard:
  - » Upper Deflector is ½" x 10"
  - » Lower Deflector is ¾" x 9"
- 1" x 10" Hangerboard
- 1/2" x 6" AASHO Punch, Double Beveled Cutting Edge
- (2) 3" Actuating Cylinders
- 1" Solid Circle
- 5" Center Pin
- (2) 4" Power Reverse Cylinder
- (4) Heavy Duty Long Travel Spring Assemblies for Absorbing Road Shock
- Moldboard Angles up to 45°

# Scraper | MS4500 FX

## Standard Features

- 1" Thick Moldboard with Formed Offset for Cutting Edge
- Fixed Angle Moldboard: Length 10', 11' & 12' ; Height: 20" or 15"
- ½" x 6" AASHO Punch DBC Cutting Edge
- H.D. 1/2" Reinforced Hangerboard
- Dual Canister Trip
- H.D. Hinge Assembly
- 3/4" Hanger Plates

Shown with optional  
Adjustable Height  
Slotted Side Plates

# Scraper | MF5

## Standard Features

- 1" Thick Moldboard with Formed Offset for Cutting Edge
- Fixed Angle Moldboard: Length 10', 11' & 12' ; Height: 20"
- ½" x 6", AASHO Punch, Double Beveled Cutting Edge
- (1) 3" x 11.5" Actuating Cylinder - OPTIONAL Two Actuating Cylinders Available
- One Shock Absorber
- Fixed, Right or Left Discharge Angle 35° - 45° (Depending on Vehicle Wheelbase)

## Options

- Cutting Edges
- Curb Guards
- Side Mounting Plates
- Grease Line Kits
- Oscillating Side Plates
- Heavy Duty Springs
- Rolled Moldboard
- Special Paint
