State of Michigan Approved Docking Station Information Guide

As of 7/29/2026

The State of Michigan currently has six (6) docking stations available in SIGMA. For the purposes of this document, we define a dock as a piece of equipment that offers port replication and enhanced usability to a laptop or tablet. Here we will list the models that each dock can service, list the ports available for each dock, and list any adapters that may come with these models. (Sometimes a Docking Station is referred to as a Port Replicator. They are the same thing.)

NOTE: Numbers listed in this document (LXX and TXX) are SIGMA numbers.

How to decide which unit is best for you: Please remember that each dock is only compatible with certain models of computers, and some of the docks listed in this document have specialized usages, such as the Rugged Vehicle Dock.
