## JOSEPH R. BOLIN

### EXPERIENCE:

#### *Assistant Project Geologist, Materials Testing Consultants 2017 – Present*

Environmental Lead responsible for preparation of Phase I/II Environmental Site Assessments, Baseline Environmental Assessments (BEAs), Due Care Plans and other tasked environmental projects. Performs Ground Penetrating Radar (GPR) surveys for subsurface investigations related to the presence of UST systems and/or buried utilities. Also responsible for various geotechnical operations including fieldwork and associated reporting.

#### *Environmental Consultant, Jones Petrie Rafinski 2014 – 2017*

Responsible for providing a wide scope of environmental services including: environmental due diligence in support of real estate transfer/sale (Phase I/II Environmental Site Assessments), oversight of UST removal/closure projects, installation/abandonment of groundwater monitoring wells, soil and groundwater assessment for contamination, asbestos containing material (ACM) surveys, lead-based paint surveys, ground-penetrating radar investigations (GPR), wetland delineation and additional field operations.

### EDUCATION:

Western Michigan University BS Geology

### CERTIFICATES/CONTINUING EDUCATION:

40-Hour OSHA Hazwoper Certified  
8-Hour Hazwoper Refresher  
Licensed Asbestos Inspector (MI)  
Licensed Lead Based Paint Inspector (IN, IL)  
38-Hour Wetland Delineation

## **RICK DUNKIN, CPG**

### **EXPERIENCE:**

***Senior Environmental Project Manager, Materials Testing Consultants, Inc. 2014 - Present***

Project management and technical review of environmental projects including Phase I and II ESAs, brownfield redevelopment, oil and gas site investigation and remediation.

***President and Senior Technical Manager EcoRock Consulting, LLC 2009 – Present***

Responsible for contractual, financial and technical aspect of engineering, construction, and scientific projects, including legacy contamination issues, contaminant fate and transport assessment, and emergency responses for various clients. Prepares technical reports and provides QA/QC review of documents as well as performs field work and provides oversight of contractors. Focus on water resources specifically related to environmental contamination, mining, unconventional oil/gas plays, and the remediation of contaminated sediments.

***Principal Project Manager Weston Solutions, Inc., 2003 – 2009***

Responsible for office P&L and supervision for up to 17 staff as well as financial and technical aspect of engineering, construction, and scientific projects. Project sites involved investigation and remediation of industrial facilities, abandoned oil fields, impacted wetlands and contaminated sediments; brownfield redevelopment for commercial and industrial sites; hazardous and regulated materials management; area-wide metals contamination in an urban environment; construction of a landfill gas methane extraction system to protect nearby residential homes; hydrogeologic assessments and installation of a potable water supply well in an area of extensive soil and groundwater contamination.

### **PROJECT PARTICIPATION:**

Over 26 years of experience with environmental projects including Phase I and Phase II Environmental Site Assessments, BEAs, and Due Care Plans for brownfield redevelopment for commercial and industrial sites. Field investigations and corrective action activities for leaking underground storage tank sites including contaminant plume delineation, monitoring well installation, sampling, excavation and disposal of contaminated soils. Extensive experience with regulatory agencies including USEPA, Michigan DEQ, and municipal or local agencies.

### **EDUCATION:**

Walsh College of Business and Accountancy	M.B.A. Finance 2006
University of Toledo	M.S. Geology 1982
Susquehanna University	B.A. Geology 1979

### **PROFESSIONAL CERTIFICATIONS:**

Licensed Professional Geologist in the State of Indiana  
Certified Professional Geologist with AIPG  
Residential Builder's License with the State of Michigan
