

## COMPOSITE MESH-PAD SYSTEMS OR COMBINATION PACKED-BED SCRUBBER/COMPOSITE MESH-PAD SYSTEMS OPERATION AND MAINTENANCE RECORD

*This information is required by Article II, Part 55 (Air Pollution Control) of P.A. 451 of 1994, as amended, and the Federal Clean Air Act of 1990. Failure to provide this information may result in penalties and/or imprisonment.*

**Applicable Rule:** 40 CFR Part 63, Subpart N--National Emission Standards for Chromium Emissions from Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks.

**NOTE:** Affected facilities using the composite mesh-pad system or combination packed-bed scrubber/composite mesh-pad system to comply with the chromium emission limit must complete this form. Records must be maintained on file for five years and made available for inspection upon request by the Michigan Department of Environment, Great Lakes, and Energy.

7. INSPECTION/MAINTENANCE CHECKLIST (insert inspector's initials in boxes):			
<p>Inspections and maintenance of process tank(s), control devices and monitoring equipment should be conducted on a quarterly basis or per manufacturer's recommendations where noted. Visually inspect the composite mesh-pad system or combination packed-bed scrubber/composite mesh-pad system to ensure there is proper drainage, no chromic acid build up on the pads and no evidence of chemical attack on the structural integrity of the device. To ensure no breakthrough of chromic acid mist, visually inspect the back portion of the mesh-pad closest to the fan. Inspect the ductwork from the tank(s) to the control device to check for leaks. Perform washdown of the composite mesh-pads in accordance with manufacturer's recommendations.</p>
