DETERMINATION THAT PROGRAM IS NOT ON-THE-JOB OR PRODUCT-SPECIFIC TRAINING

Many employers/utilities offer on-the-job training so that employees will perform satisfactorily, as requested by the job position. Why are you offering this training and how does this training program differ from on-the-job training?

Many training programs are specific to certain product brands or equipment and are important only to individuals that own or use such products or equipment. How is this training program broadly applicable in nature and not specific to a product brand or equipment?
