House Appropriations Subcommittee on Environment, Great Lakes, and Energy Members
Jennifer Flood, Director, State Budget Office

FROM: Travis Boeskool, Deputy Director 

DATE: January 30, 2024

SUBJECT: Fiscal Year 2023, 4th Quarter Report on Active Cleanup Projects Funding

In accordance with Section 235 of Article 4, Part 2, of 2022 PA 166, attached is the Department of Environment, Great Lakes, and Energy's (EGLE) report on active cleanup projects funding for the 4th quarter of fiscal year 2023. This report includes a summary regarding the remediation and redevelopment efforts as of September 30, 2023, at sites approved for and currently utilizing state appropriations throughout Michigan.

EGLE is committed to continuing to address contaminated sites across the state, and the Remediation and Redevelopment Division (RRD) is charged with overseeing the cleanup of contaminated properties that pose a risk to human health and the environment. The remediation of these properties typically takes many years to complete and often requires ongoing operation and maintenance.

If you need further information, please contact Anastasia Lundy, Manager, Administration Section, RRD, at 517-614-1907; or you may contact me at 517-614-6873.

Michigan Department of Environment, Great Lakes, and Energy
Remediation and Redevelopment Division
Fiscal Year 2023, 4th Quarter - Active Cleanup Projects Funding Report
Executive Summary

The Michigan Department of Environment, Great Lakes, and Energy (EGLE), Remediation and Redevelopment Division, is charged with overseeing the cleanup of contaminated properties that pose a risk to human health and the environment. The remediation of contaminated properties typically takes many years to complete and often requires ongoing operation and maintenance.

In accordance with Section 235 of Article 4, Part 2, of 2022 PA 166, EGLE is directed to prepare a quarterly report providing various pieces of information related to remediation and redevelopment efforts at active sites in Michigan. To comply with this requirement, a summary of the projects prioritized for and currently utilizing state cleanup funding is attached. The list contains site-specific information, such as the type of site (Program), a brief description of how the issue will be addressed (Site Response Actions), expenditures incurred on the site during the previous fiscal year, and the amount and funding source allocated to the site for work in fiscal year (FY) 2023. Also included are crosswalks to define the acronyms used in the Program, Funding Source, and Site Response Actions columns. *Note: This report is intended to replace the annual Consolidated Report. For pre-FY 2021 expenditure information, please see the [FY 2020 Consolidated Report](#), as published on the EGLE website.*

Currently, there are more than 17,000 sites where EGLE knows hazardous substances have been released. In addition, there are more than 7,000 sites with underground storage tanks that have had more than 8,300 confirmed releases. Risks to human health and the environment from these releases are in various stages of evaluation and actions to address known risks, but at several locations, the risks are not completely known. Many of the sites with hazardous substances and underground storage tanks lack a party who is legally responsible for the cleanup actions necessary to address these risks. These sites are often left abandoned and blighted in our communities. Ensuring that sites have adequate funding to both complete the remedial activities and maintain a protective remedy is essential to both the protection of human health and the environment and the eventual safe reuse of these properties.

To address the environmental risks associated with these properties, the State of Michigan provides funding to remediate sites and remove environmental barriers that inhibit redevelopment.

It should be noted that the number of sites needing action far outweighs the available funding and staffing needed to address them. In FY 2023, EGLE has funded activities to investigate and mitigate risks at approximately 700 sites. It takes many years of incremental investigation to bring sites to a status where all risks are known and addressed. There are approximately 6,500 sites where risks are unknown, and funds are not available to begin any investigation.

EGLE is evaluating the level of effort necessary to assess the sites where risks have not been determined and is considering implementation of a strategy to assess a percentage of these sites on an annual basis if additional resources become available to do so. Michigan's 65 Superfund sites also pose a significant funding need. Superfund sites are some of the most significant and costly contaminated sites in the state. Although federal funds are available to

use for these sites, the state is responsible to provide a 10% match for remedial actions and cover 100% of the cost for operation and maintenance of the installed remedy. This obligation alone results in an estimated need of \$6 million of state funding annually.

While the redevelopment of contaminated properties creates jobs and economic investment in our communities, adequately addressing the contamination to make a site safe for the proposed reuse can often be cost prohibitive. Brownfield funding in the form of grants and loans can help cover those environmental costs and promote redevelopment. Demand for this funding is high, typically exceeding the \$10 million in available grant funding annually.

Brownfield loans are required to be repaid in full, providing a revolving source of loan funding. However, if a project is experiencing a financial hardship, the terms of the loan can be renegotiated to lower the interest rate, extend the duration of the payback period, or defer payments for a defined timeframe. Of the 112 brownfield loans that have been awarded over the history of the program, a total of 12 have been renegotiated to date.

Because there is far more demand than there is available funding, EGLE prioritizes funding sites that present the greatest environmental risk, have an installed remedy that needs to be maintained, and/or have a well-developed plan for the safe reuse of the property. This results in the indefinite delay of many projects, as well as the inability to evaluate numerous sites where the environmental risks are not fully known.

The total level of funding represents the accumulation of funds that has been authorized at the sites for this year and previous years and includes special grant funding recently appropriated by the Legislature. The level of funding allocated to each site is reviewed annually through EGLE's action plan process and adjustments are made accordingly. All funds are expected to be used in accordance with the timelines presented during the action plan process. This varies from site to site due to the size, nature, and complexity of the contamination being addressed. Most current site funding is planned to be spent in the next 1 to 3 years but many have a time frame of up to and exceeding 5 years for long-term operation, maintenance, and monitoring to manage risk. In addition, some portion of funding goes unused or is no longer necessary at a particular site. Those funds are reallocated to sites that have unmet funding needs based on EGLE's site prioritization process.

SITE RESPONSE ACTIONS ACRONYM CROSSWALK

Monitoring:	All state-funded response actions that the RRD planned to undertake have been completed, however, monitoring of groundwater or drinking water continues to occur to ensure continued compliance with criteria. These sites may need further actions if concentrations increase above applicable criteria.
Complete:	All state-funded cleanup activities that the RRD planned to undertake have been completed. Full Closure under the law may not have been sought because the additional State investment is not warranted based on the overall need to allocate a finite amount of resources among many facilities and sites. Generally, the RRD waits for final closeout documentation from contractors and abandonment of monitoring wells to complete contract closeout procedures.
Funding Hold:	Insufficient funding is available to complete work at many sites. These sites do not pose an immediate threat to the health of Michigan residents.
In Progress:	State-funded cleanup activities are in progress.
Operations & Maintenance (O&M):	Treatment, remediation, or new water supply systems have been constructed and the remaining cleanup activities consist largely of operations & maintenance of groundwater treatment systems.
Potentially Liable Party (PLP):	Other parties are conducting cleanup activities. State funds are not being expended at these sites.

PROGRAM ACRONYM CROSSWALK

201: Part 201, Environmental Cleanup and Redevelopment Program (ECR)
201 BRG: Part 201 related Brownfield Grants
201 BSA: Part 201 related Brownfield Site Assessment
201 BRL: Part 201 related Brownfield Loans
213: Part 213, Leaking Underground Storage Tank Program (LUST)
213 BRG: Part 213 related Brownfield Grants
213 BSA: Part 213 related Brownfield Site Assessment
