## APPENDIX A

Scope: The novel coronavirus (COVID-19) is a respiratory disease that can result in serious illness or death. With COVID-19 present world-wide, the Center for Disease Control and Prevention has developed guidelines to reduce the spread of COVID-19. Individuals are encouraged to wash their hands often to prevent the spread of the disease.

In Michigan, residents in some of the most highly impacted areas of the state do not have access to water due to previous water shutoffs at their homes. The Water Restart Grant Program will provide funding to local communities to support costs to reconnect homes to the water supply and other related COVID-19 response activities necessary to minimize public health risks.

The Michigan Department of Environment, Great Lakes, and Energy (EGLE) will provide limited grants to communities based on available funds. Grants will be provided to high risk areas.

Requirements for the grants will include the following.

- Communities must provide a preliminary spending plan, including the estimated number of homes to be hooked up and estimated average cost per home, prior to the grant being initiated.
- If lead lines are being replaced as part of the hookup, the entire line must be replaced.
- EGLE will reimburse up to \$5,000 for hookup, line replacement, and restoration per home. Exceptions to the cap can be requested for homes needing more extensive work. Exceptions must be authorized by EGLE.
- The community must assure that the plumbers conduct appropriate flushing and provide communication to residents on the importance of flushing and use of filters if needed.
- A 25 percent local match is required.

Grant funds will be provided on a reimbursement basis upon receipt of appropriate supporting documentation.
