Re: Marathon Petroleum Company – Air Permit to Install Application

Dear Mr. Drury:

Per our recent discussion, we are resubmitting APP-2023-0146 to correct administrative errors that were identified in the original application and to align with changes agreed to after the technical review. Specifically, red-lined ROP sections for EU70COKER-S1 and FGGROUP2-S1 were inadvertently omitted from the May 30, 2023 Permit to Install (PTI). The updated application also addresses changes that occurred during the technical review including:

- Extension of Perimeter Air Monitoring Program
- Proposed criteria pollutant emission caps equal to or within 5% of the Projected Actual Emissions and based on 12-Month rolling totals
- Alignment of conditions with more recent PTIs

The updated application will allow for ease of reference for the AQD as well as interested stakeholders. No changes to the Detroit Permitting Project are being proposed. Please do not hesitate to contact me at 616.560.1799 or bleahy@barr.com if you have any questions or require additional information.

Sincerely,

A handwritten signature in blue ink that reads "Brian Leahy".

Brian Leahy
Senior Meteorologist
