

## Michigan Stationary (Point) Source Emission Trends 1974-2021

**Note:**

- 1) Estimating methodologies, emission factors, and data availability can vary year to year. Caution should be exercised when evaluating trends in emission estimations and should only be interpreted in a qualitative manner.
- 2) The criteria emissions estimate data presented here represents the data reported from the facilities and is subject to limited quality assurance efforts by EGLE to identify, verify, and correct outlier data.
- 3) 2020 shows a temporary emissions decline in response to COVID-19 shutdowns.

## Decreased in Estimated Emissions by Pollutant, 2000-2021

Note:

- 1) Estimating methodologies, emission factors, and data availability can vary year to year. Caution should be exercised when evaluating trends in emission estimations and should only be interpreted in a qualitative manner.
- 2) The criteria emissions estimate data presented here represents the data reported from the facilities and is subject to limited quality assurance efforts by EGLE to identify, verify, and correct outlier data.
- 3) 2020 shows a temporary emissions decline in response to COVID-19 shutdowns.
