

Air Toxics Screening Level Justifications Open for Public Comment

The Michigan Department of Environment, Great Lakes, and Energy (EGLE), Air Quality Division (AQD) develops air toxics screening levels which are health-based ambient air concentrations that provide public health protection. These screening levels are developed according to Part 55, Air Pollution Control, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended. The screening levels are used in the implementation of Michigan’s air permitting rules that apply to new or modified sources that emit a toxic air contaminant and are required to obtain a Permit to Install. Under these rules, the emission of a toxic air contaminant cannot result in a maximum ambient air concentration that exceeds an applicable health-based screening level.

Historically, AQD toxicologists developed screening levels and posted them on the AQD web page, whereas the “justification” memos describing the bases for the screening levels were only available upon request. The public has always had the ability to comment to the AQD informally about the screening levels and how they were derived. Under rule revisions that went into effect on December 20, 2016, the AQD has formalized the comment process. The AQD will provide a 30-day formal public comment period on all health-based screening levels and their justifications.

A comment period is open and EGLE is receiving comments on the following chemicals:

The comment period for the following listed chemicals starts September 16, 2024, and ends October 16, 2024. The list of screening levels and justification documents undergoing comment is given below. Please click on the CAS number to view the justification.

CAS No.	Chemical Name	Screening Level*	Averaging Time	Public Comment: E-Mail AQD
65-85-0	Benzoic acid	5	8-hours	Send Comment
128-04-1	Sodium dimethyl dithiocarbamate	20	24-hours	Send Comment
335-67-1	Perfluorooctanoic acid	0.0001	24-hours	Send Comment
1047-16-1	Cinquasia red	PM _{2.5} NAAQS		Send Comment
1395-21-7	<i>Bacillus subtilis</i> BPN	0.0006	1-hour	Send Comment
1763-23-1	Perfluorooctanoic sulfonic acid	0.0004	24-hours	Send Comment

CAS No.	Chemical Name	Screening Level*	Averaging Time	Public Comment: E-Mail AQD
7783-28-0	Diammonium phosphate	PM NAAQS		Send Comment
9000-90-2	alpha-Amylase	0.0006	1-hour	Send Comment
9001-92-7	<i>Bacillus subtilis</i> neutral protease	0.0006	1-hour	Send Comment
9014-01-1	Subtilisins	0.0006	1-hour	Send Comment
37259-58-8	Serine proteinase	0.0006	1-hour	Send Comment

*micrograms per cubic meter ($\mu\text{g}/\text{m}^3$)

Within 60 days of the close of the public comment period, the AQD will respond to all substantive comments received. The AQD will also post on this website the paraphrased comments for each toxic air contaminant and the AQD's responses, including any changes to the screening levels resulting from addressing comments. As directed by the rules, all screening levels are in effect immediately once established by the AQD, notwithstanding the formal public comment process. This is to provide clarity to permit applicants and ensure that permitting will be timely.

A comment may also be submitted by:

- Going to the [Air Toxics Program web page](#), then looking under "Justifications."
- Click on the link for chemicals arranged by [Chemical Abstract Service \(CAS\) number](#) or by [chemical name](#). These provide the full list of more than 1,200 screening levels and show the chemicals available for formal public comment.
- For chemicals open for formal comment, click on the link under "Is Public Comment Now Open?", Click on "E-Mail AQD," then select the link for the chemical you wish to comment on and type your comments.
- Please be sure to include your contact information at the end of your comment so staff may reach you if any clarification is needed.
- If attaching files, please remember there is a 10 MB maximum.
- The following file types are *not* allowed as attachments: BAT, EXE, and Microsoft Access databases.
