Dear Brad Kischnick:

SUBJECT: Administrative Completeness Determination; Hazardous Waste
Management Facility Operating License Renewal Application;
Dow Silicones Corporation; Midland, Michigan, MID 000 809 632;
Waste Data System Number 392821

The Department of Environment, Great Lakes, and Energy (EGLE), Materials Management Division (MMD), has performed a completeness review of the Hazardous Waste Management Facility Operating License Renewal Application (Renewal Application) submitted by Dow Silicones Corporation (DSC), on March 30, 2022, and updated September 19, 2022. The Renewal Application was reviewed for compliance with Part 111, Hazardous Waste Management, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, and the administrative rules promulgated thereunder (Part 111 Rules).

Based on this review, the MMD has determined that the Renewal Application is administratively complete. The MMD will host a public informational meeting to discuss the contents of the Renewal Application and the licensing process. This meeting is tentatively scheduled for December 14, 2022. The MMD will then proceed with the technical review of the Renewal Application to determine if the facility satisfies the technical requirements of Part 111, the Part 111 Rules, and the federal Resource Conservation and Recovery Act of 1976. The MMD will provide DSC with a determination on the technical adequacy of the Renewal Application upon completion of the technical review. After the Renewal Application is determined to be technically adequate, the MMD will host another public informational meeting to discuss the technical aspects of the Renewal Application.

If you have any questions, please contact Daniel Dailey, Environmental Engineer Specialist, Engineering and Program Support Unit, Hazardous Waste Section, MMD, at 517-242-7261; DaileyD@Michigan.gov; or EGLE, P.O. Box 30241, Lansing, Michigan 48909-7741, or you may contact me.

Sincerely,
