Belleville, Michigan 48111-9998

Dear Kelly McInnis:

SUBJECT: Conditional Approval: *2025 Annual Radiological Environmental Summary Report - Revised*; Wayne Disposal, Inc.; MID 048 090 633; Waste Data System Number 395812

The Department of Environment, Great Lakes, and Energy (EGLE), Materials Management Division (MMD), has reviewed the June 11, 2026, Wayne Disposal Inc. (WDI), *2025 Annual Radiological Environmental Summary Report - Revised* (Report). The Report was reviewed for compliance with WDI's January 29, 2026, Hazardous Waste Management Facility Operating License issued pursuant to Part 111, Hazardous Waste Management, of the Natural Resources and Environmental Protection Act, of 1994 PA 451, as amended, and the administrative rules promulgated thereunder.

Based on our review, the Report is approved with the following conditions:

1. MMD does not agree with WDI's determination of Ra-226 detections at Monitoring Well (MW)-24 and MW-50 being associated with the surficial application of calcium chloride for deicing since all the impacted wells are screened below the regional clay. In future reports, MW-24 and MW-50 shall undergo a separate trend analysis to ensure that any future occurrence of elevated Ra-226 activity can be identified.

If you have any questions, please contact me at 517-930-7086; CianekB1@Michigan.gov or at EGLE-MMD-HWS@Michigan.gov.

Sincerely,

Brett Cianek
