

# WAYNE COUNTY

PROFILE | JUNE 2023

MICHIGAN DEPARTMENT OF  
ENVIRONMENT, GREAT LAKES, AND ENERGY

# OVERVIEW

Michigan Department of Environment, Great Lakes, and Energy (EGLE) has shifted their focus from disposal as the primary effort towards a circular economy where all waste materials find their highest and best use. Michigan took its first steps towards materials management a few years ago by securing funding to support an economy that reuses and recycles resources. An important component of that funding is for Solid Waste Management Planning – also referred to as Materials Management Planning. Materials management plans form the foundation of the changes the state is preparing to make.

To support this new era of materials management and future planning activities, EGLE initiated a massive data collection project to document and inventory the current state of materials management systems in all municipalities within Michigan's 83 counties. The primary objective of the Michigan Materials Management Infrastructure and Program project, also known as Mega Data, is to provide the baseline of data necessary for counties to develop future materials management plans and provide a roadmap for materials management moving forward. The data collected through the project would also be applied to the Benchmark Recycling Standard analysis developed by EGLE to help understand access to recycling services in the state, where gaps exist, and where EGLE may focus their support to improve access and infrastructure in the state.

EGLE contracted with Resource Recycling Systems (RRS) to support this large undertaking to gather, compile and analyze information from across the state.

## PURPOSE OF THE COUNTY PROFILE

The County Profile was developed for two purposes. First, the profiles provided the opportunity to summarize all the information collected for all 83 counties and their municipalities to date as a project milestone. Second, despite the extensive research and information collection, RRS acknowledges that the information presented here may be incomplete. The County Profiles offered the opportunity for each county to review, edit and add to their county's profile information before finalizing as a deliverable for the Mega Data project. Later in the process, EGLE added the review of the County Profile as a requirement of the Materials Management County Engagement Grants (MMCE).

## COUNTY PROFILE DEVELOPMENT

The County Profiles contain information that reflects research and outreach to understand programs and services available at the county and municipal levels. The information summarized here corresponds to information required in the state's Solid Waste Management Plan format and will assist counties and designated planning agencies with plan development. This profile focuses on residential programs and services. The information for the Profiles was collected from the following sources:

- Approved Solid Waste Management Plans
- EGLE's Waste Data System (WDS)
- EGLE's Recycle Search tool
- EGLE's Recycling Specialist staff
- Interviews with County program coordinators and designated planning agents
- County Run Measurement Program Survey via ReTRAC
- Municipal Measurement Program Survey via ReTRAC
- Information obtained through Freedom of Information Act requests
- Direct outreach through phone calls, emails, and letters to all target audiences and related groups or organizations with access to target audiences
- Web research
- Participation by Counties in the MMCE Grant Program

## DISCLAIMER

This information presented here was gathered and compiled over several years by RRS on behalf of EGLE for the Mega Data project. The profile was originally developed as a tool to summarize information collected and engage counties in review of the information

for finalization. The profile is not intended for use as a reference guide for residents or purposes other than to provide counties with information to support future materials management planning. Information, programs, and services can change frequently and therefore information presented here may be out of date. If information has been omitted or requires update, please contact RRS at [alynott@recycle.com](mailto:alynott@recycle.com).

# ACCESS AND COLLECTION

## COUNTY PROGRAM OVERVIEW

Wayne County offers annual household hazardous waste events for county residents several times per year through the Wayne County Department of Public Services.

## MUNICIPAL PROGRAM AND SERVICES OVERVIEW

Programs and services offered or provided by municipalities for their residents are summarized by material type and then in two tables. One table features curbside services, and the other table features drop-off services.

## TRASH

About 91% of the population has access to curbside trash collection through contracted haulers. The remainder of the county is most likely served by the open market where residents make their own arrangements for trash collection, also known as subscription services. Some local transfer stations, dumping sites, and departments of public works also provide residents with drop-off options for trash materials.

## RECYCLING

Similar to curbside trash collection, 91% of the county's population has access to curbside recycling services through contracted haulers. Recyclable materials accepted curbside include paper, glass, mixed plastics, metal cans and scrap. Many communities also provide recycling drop-off sites for residents.

## YARD WASTE

Common yard waste materials, such as brush and leaves, can be collected curbside in many communities by municipal or contracted haulers. Yard waste materials can also be dropped-off by residents of some communities at local collection sites.

## HOUSEHOLD HAZARDOUS WASTE

Wayne County Department of Public Services provides all county residents with access to drop-off collection events for household hazardous waste materials. These events accept automotive fluids, motor oil, anti-freeze, mercury, automotive batteries, oil-based paint, lawn chemicals, household cleaners, electronics, pharmaceuticals, and fluorescent bulbs.

## OTHER

No information obtained about Other programs.

## LIST OF ACTIVE HAULERS

- GFL Environmental
- Waste Management
- Republic Services
- Priority Waste Services
- City of Grosse Pointe
- City of Grosse Pointe Farms
- City of Harper Woods
- City of Livonia Sanitation
- City of Trenton
- Van Buren Charter Township
- City of Riverview
- Village of Grosse Pointe Shores Department of Public Works
- City of Taylor
- Wyandotte City
