

**Recycle:** paper, metals, glass, plastics, cardboard, oils, solvents, and other recyclables from solid waste. Use canvas covers instead of shrink wrap to **reduce** plastics to landfills.

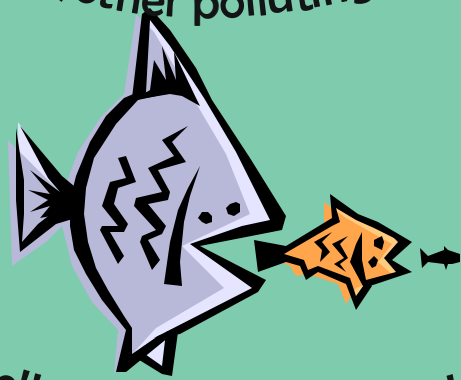

Use **nontoxic** and environmentally friendly bottom paints containing silicon, teflon, or **organic** ingredients such as cayenne pepper.

Use **environmentally friendly** cleaners that are nontoxic, surfactant-free, **phosphate-free**, and **biodegradable**.

Use a bilge pillow or **oil-absorbing** sponge to control oil/other polluting material from being pumped overboard. Use drip pans or trays when changing fluids or working on engines.

**Clean** plant debris & mud from your boat, trailer, propeller, live well, and anchors before leaving the boat launch. **Prevent** the **spread** of destructive & aggressive **exotic species** such as zebra mussels, ruffe, spiny water fleas, and Eurasian milfoil.

Use **pumpouts**; do not allow raw sewage to enter surface water.
