**CHEMICALS APPROVED FOR USE UNDER
THE AQUATIC NUISANCE CONTROL GENERAL PERMIT FOR
CANALS AND MARINAS LOCATED ON
THE GREAT LAKES AND CONNECTING WATERS**

The following list of chemicals is approved for use under the Aquatic Nuisance Control General Permit for Canals and Marinas located on the Great Lakes and connecting waters **ANC96x0000**, as amended. In order to have authorization to chemically treat waters of the state under the General Permit for Canals and Marinas, the permittee must be issued a Certificate of Coverage (COC) by the Michigan Department of Environment, Great Lakes, and Energy (EGLE). Additional products may be approved in the future, pending registration with the U.S. Environmental Protection Agency and the Michigan Department of Agriculture and Rural Development and satisfactory review by EGLE.

¹ Certain herbicide labels require or strongly recommend the use of additives to aid herbicide uptake, improve effectiveness, and minimize non-target impacts.

² Certification requirements may apply. See the product label.

³ For Certificates of Coverage issued in 2019: Prior to each treatment with ProcellaCOR, the “ProcellaCOR Treatment Notification” Schedule of Compliance (SOC) must be submitted in the MiWaters permitting database no less than two (2) weeks before the anticipated treatment date. The notification form will require an updated treatment map delineating the ProcellaCOR treatment area and the prescribed application rate (in ounces per acre-foot). Approval of the SOC by EGLE is required prior to the treatment with ProcellaCOR.
