

ENVIRONMENTAL RELEASE REPORTING

Release Notification Requirements in Michigan*

This document should be used as a tool to identify potential reporting requirements before a release occurs, and to identify required follow-up reporting based on the release and relevant regulations. It outlines what releases must be reported, when they must be reported, and to whom they must be reported. Refer to individual state and federal acts and regulations for specific information and requirements as this document is not a substitution for individual state and federal acts and regulations).

Always check your facility permits, licenses, registrations, pollution prevention plans, and local ordinances for additional release reporting requirements. In particular, all National Pollutant Discharge Elimination System (NPDES) permits, and most air permits, contain release reporting requirements that are not outlined in this document.

While diligent efforts have been made to assure that the information contained herein is accurate and complete, there is no guarantee that it covers all of the regulatory requirements for release notification and reporting in Michigan*.

This document was prepared by the Michigan Department of Environment, Great Lakes, and Energy (EGLE) - SARA Title III Program.

If the release is an
Immediate **THREAT TO HUMAN HEALTH or SAFETY**,
call 911 or your local fire department

*This table covers only those reporting requirements found in rules and regulations that apply in Michigan. **Releases might be reportable under multiple regulations.** Additional reporting requirements might be found in permits, licenses, registrations, contingency and pollution prevention plans, and local ordinances
