

GRETCHEN WHITMER
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF
ENVIRONMENT, GREAT LAKES, AND ENERGY
LANSING

LIESL EICHLER CLARK
DIRECTOR

VIA E-MAIL

TO: Senate Appropriations Subcommittee on Natural Resources and
Environment, Great Lakes, and Energy Members
House Appropriations Subcommittee on Environment, Great Lakes,
and Energy Members
Chris Harkins, Director, State Budget Office

FROM: Amy Epkey, Senior Deputy Director 

DATE: February 25, 2022

SUBJECT: Fiscal Year 2022, 1st Quarter Report on Active Cleanup Projects Funding

In accordance with Section 235 of Article 4, Part 2, of 2021 PA 87, attached is the Department of Environment, Great Lakes, and Energy's (EGLE) report on active cleanup projects funding for the 1st quarter of fiscal year 2022. This report includes a summary regarding the remediation and redevelopment efforts as of December 31, 2021, at sites approved for and currently utilizing state funds throughout Michigan.

EGLE is committed to continuing to address contaminated sites across the state, and the Remediation and Redevelopment Division (RRD) is charged with overseeing the cleanup of contaminated properties that pose a risk to human health and the environment. The remediation of these properties typically takes many years to complete and often requires ongoing operation and maintenance.

If you need further information, please contact Anastasia Lundy, Manager, Administration Section, RRD, at 517-614-1907; or you may contact me at 517-242-7407.

Active Cleanup Projects Funding Report

Report Period: Fiscal Year 2022, 1st Quarter

This report is provided in accordance with Section 235 of Article 4, Part 2, of 2021 PA 87.

Michigan Department of Environment, Great Lakes, and Energy
Remediation and Redevelopment Division
Fiscal Year 2022, 1st Quarter - Active Cleanup Projects Funding Report
Executive Summary

The Michigan Department of Environment, Great Lakes, and Energy (EGLE), Remediation and Redevelopment Division, is charged with overseeing the cleanup of contaminated properties that pose a risk to human health and the environment. The remediation of contaminated properties typically takes many years to complete and often requires ongoing operation and maintenance.

In accordance with Section 235 of Article 4, Part 2, of 2021 PA 87, EGLE is directed to prepare a quarterly report providing various pieces of information related to remediation and redevelopment efforts at active sites in Michigan. To comply with this requirement, a summary of the projects prioritized for and currently utilizing state cleanup funding is attached. The list contains site-specific information, such as the type of site (Program), a brief description of how the issue will be addressed (Site Response Actions), expenditures incurred on the site during the previous fiscal year, and the amount and funding source allocated to the site for work in Fiscal Year (FY) 2022. Also included are crosswalks to define the acronyms used in the Program, Funding Source, and Site Response Actions columns. *Note: This report is intended to replace the annual Consolidated Report. For pre-FY 2021 expenditure information, please see the [FY 2020 Consolidated Report](#), as published on the EGLE website.*

Currently, there are more than 16,000 sites where EGLE knows hazardous substances have been released. In addition, there are more than 6,800 sites with underground storage tanks that have had more than 8,700 confirmed releases. Risks to human health and the environment from these releases are in various stages of evaluation and actions to address known risks, but at several locations, the risks are not completely known. Many of the sites with hazardous substances and underground storage tanks lack a party who is legally responsible for the cleanup actions necessary to address these risks. These sites are often left abandoned and blighted in our communities. Ensuring that sites have adequate funding to both complete the remedial activities and maintain a protective remedy is essential to both the protection of human health and the environment and the eventual safe reuse of these properties.

To address the environmental risks associated with these properties, the State of Michigan provides funding to remediate sites and remove environmental barriers that inhibit redevelopment. It should be noted that the number of sites needing action far outweighs the available funding and staffing needed to address them. EGLE annually funds activities to investigate and mitigate risks at approximately 200 sites per year. It takes many years of incremental investigation to bring sites to a status where all risks are known and addressed. There are approximately 12,000 sites where risks are unknown, and funds are not available to begin any investigation.

EGLE is evaluating the level of effort necessary to assess the sites where risks have not been determined and is considering implementation of a strategy to assess a percentage of these sites on an annual basis if additional resources become available to do so.

Michigan's 64 Superfund sites also pose a significant funding need. Superfund sites are some of the most significant and costly contaminated sites in the state. Although federal funds are available to use for these sites, the state is responsible to provide a 10% match for remedial actions and cover 100% of the cost for operation and maintenance of the installed remedy. This obligation alone results in an estimated need of \$6 million of state funding annually.

While the redevelopment of contaminated properties creates jobs and economic investment in our communities, adequately addressing the contamination to make a site safe for the proposed reuse can often be cost prohibitive. Brownfield funding in the form of grants and loans can help cover those environmental costs and promote redevelopment. Demand for this funding is high, typically exceeding the \$10 million in available funding by at least \$5 million annually.

Because there is far more demand than there is available funding, EGLE prioritizes funding sites that present the greatest environmental risk, have an installed remedy that needs to be maintained, and/or have a well-developed plan for the safe reuse of the property. This results in the indefinite delay of many projects, as well as the inability to evaluate numerous sites where the environmental risks are not fully known.

201	Emergency	Wexford	Wexford Road Commission Surface Water Storage	M	N	9/30/2022	\$36.00	\$0.00
Totals							\$49,060,347.90	\$118,369,496.98

ABT: Abatement- Lead and/or asbestos abatement activities

ADM: Administration – These are administration costs.

AW: Alternate Water – Alternate water actions include the replacement of individual or municipal contaminated water supplies.

BEA: Baseline Environmental Assessment – To determine contamination at the site-

DEMO: Demolition – Buildings being removed to promote redevelopment.

Due Care: Cleanup activities must meet requirements to protect public health and the environment.

IR: Interim Response – Initial cleanup actions, such as removal of drums, Underground Storage Tanks (USTs) and contaminated soil.

LT – Long Term Remedial Action – Operating ground water treatment system for 10 years, EPA pays 90% of costs. State share is 10%

O&M: Operation and Maintenance – Actions to operate or maintain remediation systems, vapor mitigation systems, including ongoing monitoring.

MO: Monitoring – Ongoing groundwater monitoring (sometimes included in OM).

PC: Project Close-out - State funded work has been terminated.

RA: Remedial Action – Final cleanup actions, such as construction of groundwater or soil treatment systems.

RD: Remedial Design – This is the design phase to determine the course of action to mitigate the contamination.

RE: 5 Year review – Review of the protectiveness of the implemented remedy

RI: Remedial Investigation – Delineation of the types and/or extent of contamination at a site to determine needed cleanup actions.

SA: Site Assessment – Assessment and delineation extent of contamination at a site to determine needed cleanup actions.

PROGRAM ACRONYM CROSSWALK

201: Part 201, Environmental Cleanup and Redevelopment Program (ECRP)
201 BRG: Part 201 related Brownfield Grants
201 BRL: Part 201 related Brownfield Loans
213: Leaking Underground Storage Tank Program (LUST)
213 BRG: LUST related Brownfield Grants

FUND SOURCE ACRONYM CROSSWALK

Brownfield: Brownfield Grants
CEI: Clean Environment Initiative - General fund/General purpose
CMI: Clean Michigan Initiative Bond fund
ECP: Environmental Cleanup Program
Emergency: Cleanup and Redevelopment fund (unclaimed bottle deposits)
ESP: Environmental Special Projects
Grant: Federal grant funds
PFAS: Per- and Polyfluoroalkyl Substances - General Fund/General purpose
RMF: Renew Michigan fund
RPF: Refined Petroleum fund
SSCP: State Sites Cleanup Program fund
SWQIF: Surface Water Quality Initiatives Bond Fund
VI: Vapor Intrusion - General fund/General purpose
Zephyr: Site specific appropriation - General fund/General purpose
