

Weekly Summary, Michigan 2022

*Arboviruses are viruses transmitted by mosquitoes or other insects

Updated: September 29, 2022

Mosquito pools testing positive for arbovirus virus infection

Birds testing positive for West Nile virus infection

Horses testing positive for Eastern Equine encephalitis

Human cases of West Nile virus or other arboviruses reported

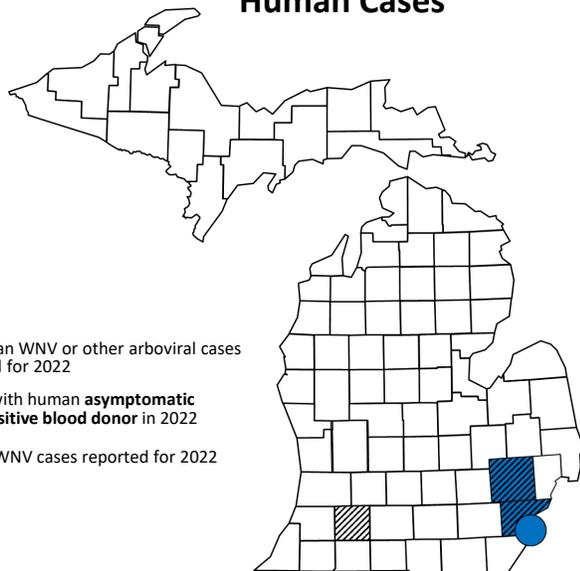

2022 Michigan Arbovirus Surveillance

Jamestown Canyon Virus Positive Mosquito Pools	8
West Nile Virus Positive Mosquito Pools	54
LaCrosse Encephalitis Virus Positive Mosquito pools	1
Total Number of Mosquito Pools Tested	2,672
Total Number of Mosquitoes Tested	42,636
Animal WNV cases	9
Animal EEE cases	3
Human Arbovirus cases	6
Human asymptomatic WNV-positive blood donors	3

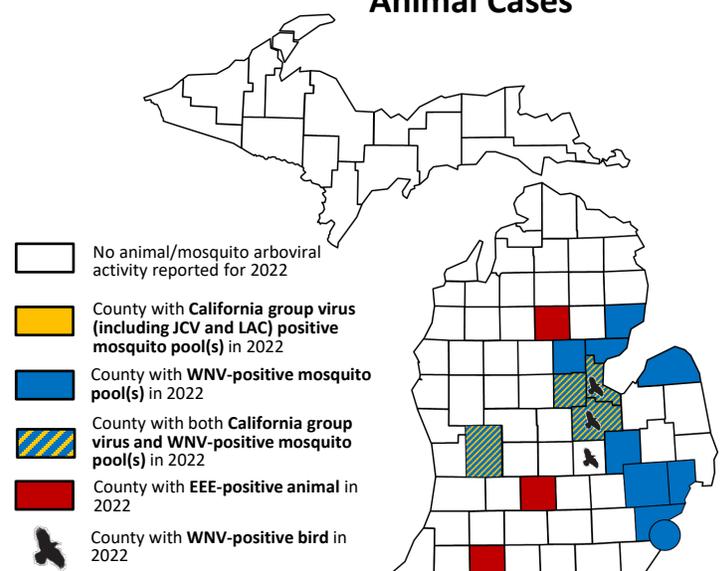

Highlights

- Three horses from Eaton, Roscommon and St. Joseph counties have died from Eastern Equine encephalitis (EEE).
- One Detroit resident, one Oakland County resident and four Wayne County residents have been sickened with West Nile Virus (WNV). Three asymptomatic blood donors from Kalamazoo, Oakland, and Wayne counties have also tested positive for WNV.
- Nine birds from Bay, Macomb, Saginaw, Shiawassee, and Wayne counties and 54 mosquito pools from Arenac, Bay, Genesee, Gladwin, Huron, Iosco, Kent, Macomb, Midland, Oakland, Saginaw, and Wayne counties have tested positive for WNV.
- One mosquito pool from Saginaw County has tested positive for LaCrosse (LAC) encephalitis virus, and eight mosquito pools from Bay, Midland, and Saginaw counties have tested positive for Jamestown Canyon virus (JCV).

Preventing Mosquito Bites and Arboviruses: Tips for Michigan Residents

The most effective way to avoid arboviruses is to prevent mosquito bites. Be aware of the West Nile virus and other arbovirus activity in your area and take action to protect yourself and your family.

Use Insect Repellent

Use Environmental Protection Agency (EPA)-registered insect repellents with one of the active ingredients below. When used as directed, EPA-registered insect repellents are proven safe and effective, even for pregnant and breastfeeding women.

- DEET
- Picaridin
- IR3535
- Oil of lemon eucalyptus (OLE) or para menthane-diol (PMD)
- 2-undecanone

Find the insect repellent that's right for you by using [EPA's search tool](#)

Tips for Babies & Children

- Always follow instructions when applying insect repellent to children.
- Do not use insect repellent on babies younger than 2 months old.
- Do not apply insect repellent onto a child's hands, eyes, mouth, and cut or irritated skin.
 - Adults: Spray insect repellent onto your hands and then apply to a child's face.
- Do not use products containing oil of lemon eucalyptus (OLE) or para-menthane-diol (PMD) on children under 3 years old.

Take steps to control mosquitoes inside and outside your home

- Use screens on windows and doors. Repair holes in screens to keep mosquitoes outside.
- Once a week, eliminate potential breeding areas for mosquitoes. Check inside and outside your home. Mosquitoes lay eggs on or near water:
 - Discard old tires, tin cans, ceramic pots or other containers that can hold water
 - Repair failed septic systems
 - Drill holes in the bottom of recycling containers left outdoors
 - Keep grass cut short and shrubbery trimmed
 - Clean clogged roof gutters, particularly if leaves tend to plug up the drains
 - Frequently replace the water in pet bowls
 - Flush ornamental fountains and birdbaths periodically; aerate ornamental pools, or stock them with predatory fish.
