

Blood Lead Level Test Results for Selected Flint Zip Codes, Genesee County, and the State of Michigan

Executive Summary for Quarter 2, Calendar Year 2021

Data as of January 25, 2022

This report is generated by MDHHS to track blood lead level test results in Flint, Michigan.

Background

- Blood lead level testing is an important part of efforts to identify people who have been harmed by drinking water that contained lead and from other sources of lead exposure in the home. MDHHS recognizes that the full community of Flint must be the focus of the public health response.
- The CDC announced a change in the blood lead reference value (BLRV) from 5 µg/dL (micrograms lead per deciliter of blood) to 3.5 µg/dL in October 2021. MDHHS adopted the new reference value on May 1, 2022 (for more information see <https://www.michigan.gov/mdhhs/inside-mdhhs/newsroom/2022/04/29/mdhhs-updating-definition-of-elevated-blood-lead-levels>). Reports beginning in Quarter 2 of 2022 will include counts of blood lead levels (BLL) above the BLRV using both 3.5 µg/dL and 5 µg/dL as the blood lead reference values.

Data Presentation

- Each person is included only once per time period in this table.
 - If a person had multiple tests in the time period, the highest blood lead level from a venous test was counted.
 - If no venous test was performed, the highest blood lead level from a capillary test was counted.
 - If the type of test was unknown, the highest blood lead level obtained from an unknown sample type was counted.

Summary of Findings

- Between 10/1/2015 and 06/30/2021, 45,610 people had a blood lead test in the City of Flint in zip codes 48501-48507.
- Since 10/1/2015, 389 children under age 18 in Flint in zip codes 48501-48507 had blood lead levels > BLRV: blood lead levels greater than or equal to 5 µg/dL (micrograms lead per deciliter of blood).
- Of the 13,429 children younger than 6 years old tested since 10/1/2015, 2.5% had blood lead levels greater than or equal to 5 µg/dL.

Percentage of Children < 6 Years of Age^A with Blood Lead Levels Greater Than or Equal to the Blood Lead Reference Value (5 µg/dL) by Quarter^B, Michigan, 2010 - 2021

* Data source: MDHHS Data Warehouse, Data current as of January 25, 2022

^A Counts on this chart include both capillary and venous blood tests.

^B People who have had multiple tests are counted only once per year; if they are tested in more than one year, they will be counted once in each year they were tested.

[⌘] Beginning of COVID-19 lockdowns and movement restrictions in Michigan

Table 1. Percentage of blood lead levels $\geq 5 \mu\text{g/dL}$ among Michigan Residents in the time periods before and after exposure to Flint River Water, 2014 – 2021*

			Michigan	Genesee County	Flint in ZIPs 48501-48507	
Children Less Than Six Years of Age	During Flint River Use	4/1/2014 to 9/30/2015	Total # of children tested for lead	197,445	9,246	4,151
			Children with test results $\geq 5 \mu\text{g/dL}$	6,964	251	167
			% of children with results $\geq 5 \mu\text{g/dL}$	3.5	2.7	4.0
	After Flint River Use	10/01/2015 to 06/30/2021	Total # of children tested for lead	561,365	28,302	13,429
			Children with test results $\geq 5 \mu\text{g/dL}$	16,505	461	340
			% of children with results $\geq 5 \mu\text{g/dL}$	2.9	1.6	2.5
Children Ages 6 to 17	During Flint River Use	4/1/2014 to 9/30/2015	Total # of children tested for lead	14,880	1,179	579
			Children with test results $\geq 5 \mu\text{g/dL}$	351	9	7
			% of children with results $\geq 5 \mu\text{g/dL}$	2.4	0.8	1.2
	After Flint River Use	10/01/2015 to 06/30/2021	Total # of children tested for lead	64,016	14,425	10,074
			Children with test results $\geq 5 \mu\text{g/dL}$	995	67	49
			% of children with results $\geq 5 \mu\text{g/dL}$	1.6	0.5	0.5
Adults 18 Years and Older	During Flint River Use	4/1/2014 to 9/30/2015	Total # of adults tested for lead	15,654	674	201
			Adults with test results $\geq 5 \mu\text{g/dL}$	1,540	56	14
			% of adults with results $\geq 5 \mu\text{g/dL}$	9.8	8.3	7.0
	After Flint River Use	10/01/2015 to 06/30/2021	Total # of adults tested for lead	96,090	32,352	22,107
			Adults with test results $\geq 5 \mu\text{g/dL}$	4,037	447	317
			% of adults with results $\geq 5 \mu\text{g/dL}$	4.2	1.4	1.4
Residents of All Ages	During Flint River Use	4/1/2014 to 9/30/2015	Total # of people tested for lead	227,979	11,099	4,931
			People with test results $\geq 5 \mu\text{g/dL}$	8,855	316	188
			% of people with results $\geq 5 \mu\text{g/dL}$	3.9	2.8	3.8
	After Flint River Use	10/01/2015 to 06/30/2021	Total # of people tested for lead	721,471	75,079	45,610
			People with test results $\geq 5 \mu\text{g/dL}$	21,537	975	706
			% of people with results $\geq 5 \mu\text{g/dL}$	3.0	1.3	1.5
