

## Executive Summary for January 01, 2025 to June 30, 2025 Data as of November 07, 2025

This report is generated by MDHHS to track blood lead level test results in Flint, Michigan.

### Background

- Blood lead level testing is an important part of efforts to identify people who have been harmed by lead in drinking water and other sources of lead exposure in the home. MDHHS recognizes that the full community of Flint must be the focus of the public health response.
- The CDC announced a change in the blood lead reference value (BLRV) from 5 µg/dL (micrograms lead per deciliter of blood) to 3.5 µg/dL in October 2021. MDHHS adopted the new reference value on May 1, 2022 (for more information see <https://www.michigan.gov/mdhhs/inside-mdhhs/newsroom/2022/04/29/mdhhs-updating-definition-of-elevated-blood-lead-levels>).
  - This report includes counts of BLLs above the BLRV of 3.5 µg/dL.

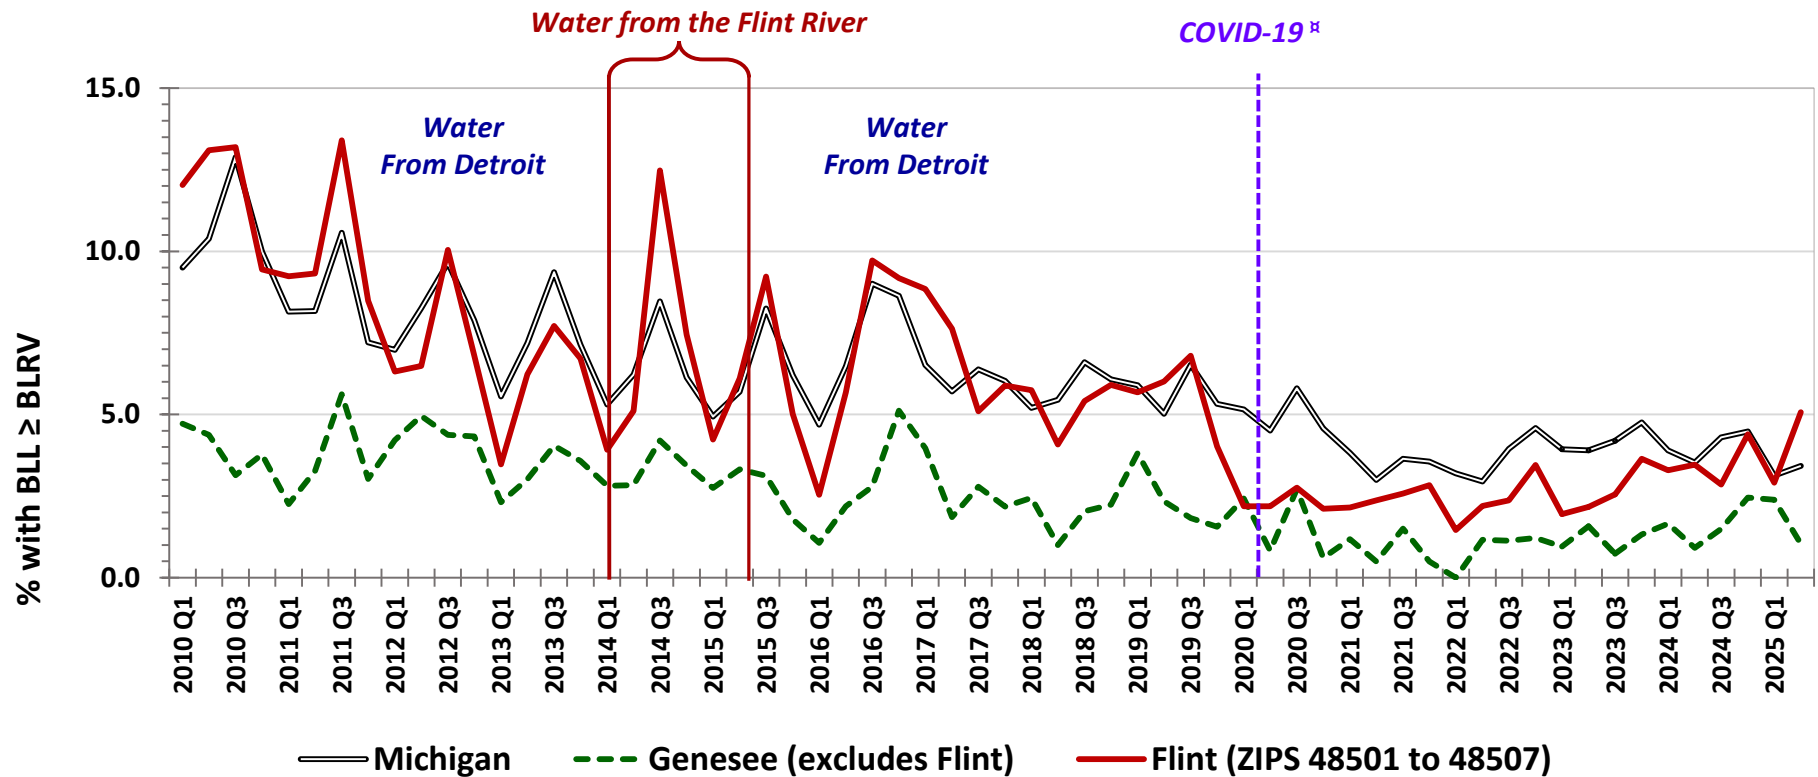

### Data Presentation

- Each person is included only once per time period in this table.
  - If a person had multiple tests in the time period, the highest blood lead level from a venous test was counted.
  - If no venous test was performed, the highest blood lead level from a capillary test was counted.

### Summary of Findings

- Between 10/1/2015 and 06/30/2025, 51,419 people had a blood lead test in the City of Flint in zip codes 48501-48507.
- Since 10/1/2015, 964 children under age 18 in Flint in zip codes 48501-48507 had BLLs greater than or equal to 3.5 µg/dL.
- Of the 17,477 children under age 6 tested for lead in Flint since 10/1/2015, 4.8% had BLLs greater than or equal to the BLRV of 3.5 µg/dL.

**Figure 1. Percentage of Children < 6 Years of Age<sup>A</sup> with Blood Lead Levels Greater Than or Equal to the Blood Lead Reference Value (3.5 µg/dL) by Quarter<sup>B</sup>, Michigan, January 2010 to June 2025**

\* Data source: MDHHS Data Warehouse, Data current as of November 07, 2025

<sup>A</sup> Counts on this chart include both capillary and venous blood tests.

<sup>B</sup> People who have had multiple tests are counted only once per year; if they are tested in more than one year, they will be counted once in each year they were tested.

⌘ Beginning of COVID-19 lockdowns and movement restrictions in Michigan.
