

Michigan Flu Focus

Weekly Influenza Surveillance Report

April 12, 2024

Vol. 21; No. 27

Week Ending April 6, 2024 | WEEK 14

Editor: Sue Kim

Editor email: KimS2@michigan.gov

Data provided in this report are preliminary and will be updated as additional data are received

Updates of Interest

The U.S. Department of Agriculture, Food and Drug Administration, Centers for Disease Control and Prevention, and State veterinary and public health officials are investigating an illness among dairy cows. For the latest on HPAI and livestock, please visit the [USDA's Livestock Website](#).

For more information and current status of HPAI in Michigan, please visit the [MDARD Avian Flu Website](#).

Seasonal Flu Vaccination Coverage

Michigan's goal is to vaccinate **4 million** residents during the 2023-2024 flu season.

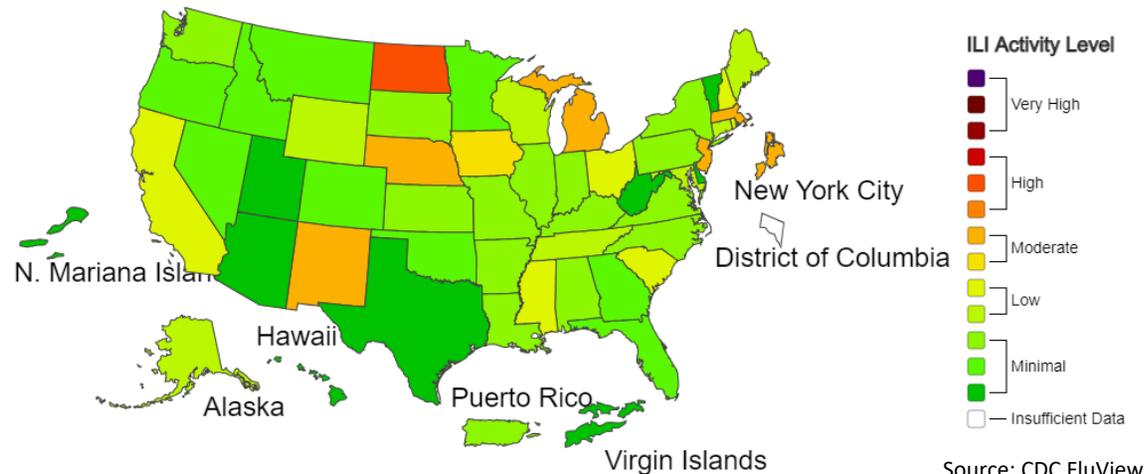

As of **April 6, 2024**, there have been **2,877,482** doses administered (**75.1%** towards goal) for the 2023-2024 flu season.

Please visit the Flu Vaccination Dashboard at www.michigan.gov/flu for more info.

Outpatient Respiratory Illness Activity Map Determined by Data Reported to ILINet

This system monitors visits for respiratory illness that includes fever plus a cough or sore throat, also referred to as ILI, not laboratory confirmed influenza and may capture patient visits due to other respiratory pathogens that cause similar symptoms.

2023-24 Influenza Season Week 14 ending Apr 06, 2024

Note: This map represents U.S. ILI activity levels reported to ILINet. The display used in past seasons showing Geographic spread of influenza has been suspended for the 2023-2024 influenza season

Influenza-associated Pediatric Mortality

Nationally, **138** influenza-associated pediatric death has been reported for the 2023-2024 flu season.

One (1) pediatric death (A/H1N1) has been confirmed by MDHHS for the 2023-2024 flu season to date.

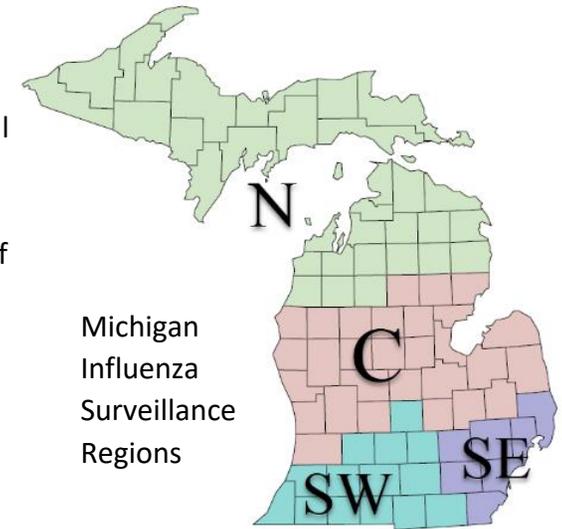

U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet)

Michigan participates in ILINet, a collaborative effort between the CDC, state and local health departments, and volunteer sentinel clinicians as part of Michigan’s influenza surveillance. ILINet provides data on the total number of outpatient visits to health care providers seen for any reason and the number of those patients with influenza-like illness (ILI[‡]). Participating Michigan emergency department and urgent care facilities send syndromic data voluntarily in near real-time to the Electronic Surveillance System for the Early Notification of Community Based Epidemics (ESSENCE). Discharge diagnosis and chief complaint data elements are used to determine whether visits meet the ILI case definition. Two hundred and thirty-one (231) Michigan facilities contributing data to ESSENCE have been validated and enrolled in ILINet.

[‡]ILI is defined as fever (>100°F) and a cough and/or a sore throat.

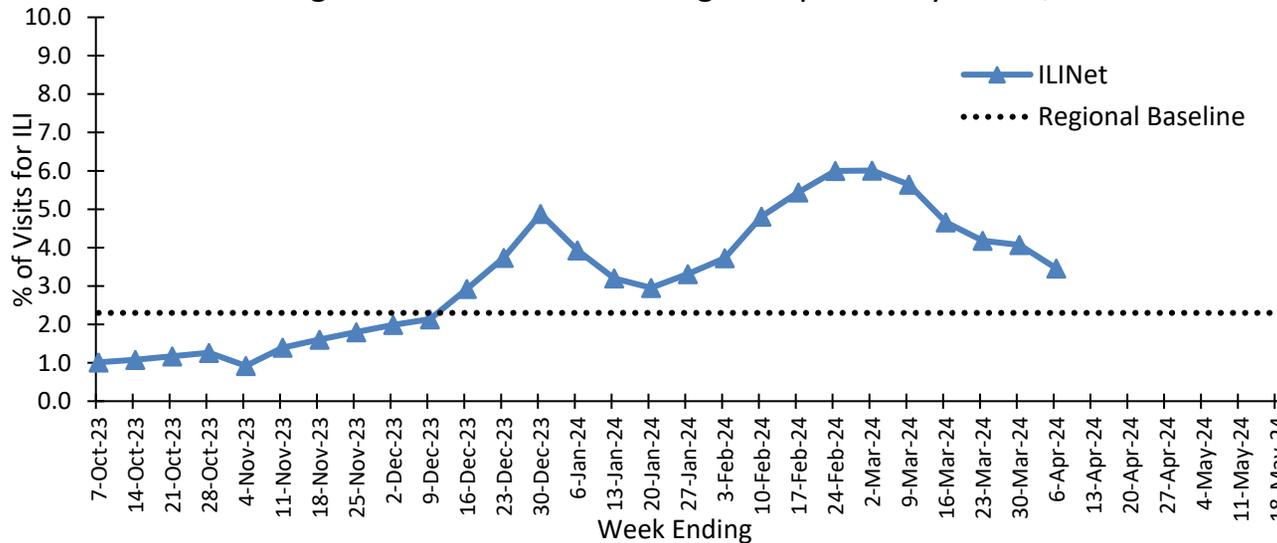

Number of Reports and ILI % by Region during this time period:

	C	N	SE	SW
No. of Reporters (285)	113	30	107	35
ILI %	2.4	5.6	4.4	3.2

Michigan Influenza Surveillance Regions

Percentage of Visits for ILI in Michigan Reported by ILINet, 2023-2024

Note: ILINet monitors visits for ILI (fever and cough and/or sore throat) and may capture patient visits due to other respiratory pathogens that cause similar symptoms.

Michigan ILI Activity: **3.5%** ↓

(Last week: **4.1%**)

Regional Baseline*: 2.3%

A total of **4,776** patient visits due to ILI were reported out of **138,117** outpatient visits.

*Regional baseline is determined by calculating the mean percentage of patient visits due to ILI during non-influenza weeks for the previous three seasons and adding two standard deviations.

National Surveillance

In the United States, **2.8%** of outpatient visits were due to ILI (Last week: **3.0%**)

This is **below** the national baseline of 2.9%

Influenza Hospitalization Surveillance Project (IHSP)

The CDC's Influenza Hospitalization Surveillance Network (FluSurv-NET) provides population-based rates of laboratory-confirmed influenza-associated hospitalizations from October 1st through April 30th each year. Michigan participates as an IHSP state in FluSurv-NET for Clinton, Eaton, Genesee, Ingham, and Washtenaw Counties.

of IHSP cases reported for the 2023-2024 season:

	Pediatric	Adult	Total
Week 14	4	37	41
Cumulative Cases	135	893	1028

IHSP Cases, 2018-2019 Through 2022-2023

Washtenaw County was added in the 2017-2018 season
 Note: Due to late season activity in 2022, IHSP was extended to Week 23 during the 2021-2022 season.

Influenza Sentinel Hospital Network (ISHN)

[ISHN](#) is a group of hospitals in Michigan that voluntarily report weekly aggregate counts of influenza hospitalizations by age group.

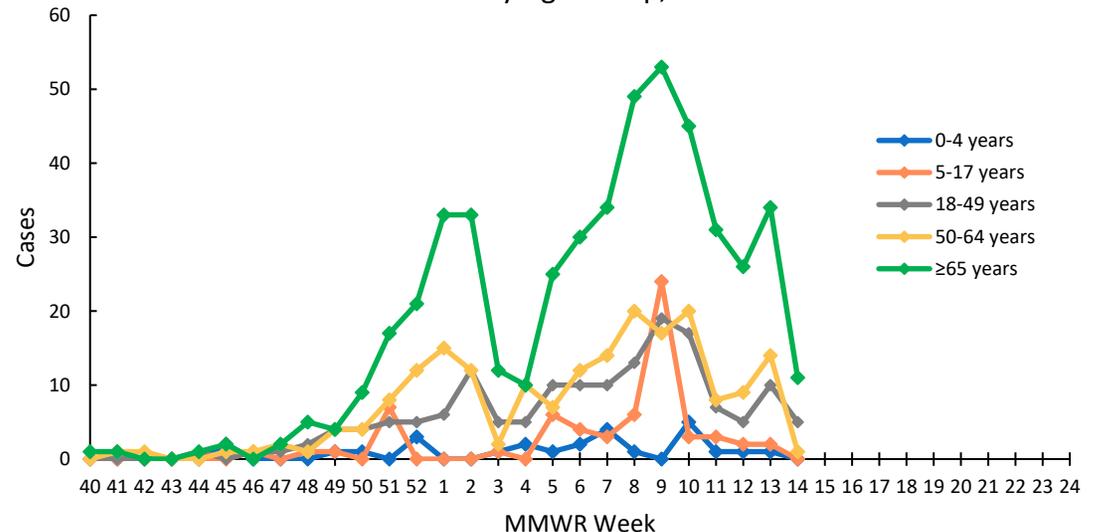

of Sites & Hospitalizations by Region during this time period:

Region	C	N	SE	SW	Total
Reporting Sites	4	2	1	2	9
Hospitalizations	3	2	4	8	17

of ISHN Hospitalizations reported by Region

Age Group	C	N	SE	SW	Total
0-4	0	0	0	26	26
5-17	0	1	0	63	64
18-49	10	10	20	117	157
50-64	26	23	28	119	196
65+	68	54	60	302	484
Total	104	88	108	627	927

ISHN Cases by Age Group, 2023-2024

If you'd like to join ISHN, please contact
 Val Tellez Nunez at telleznunezv@michigan.gov

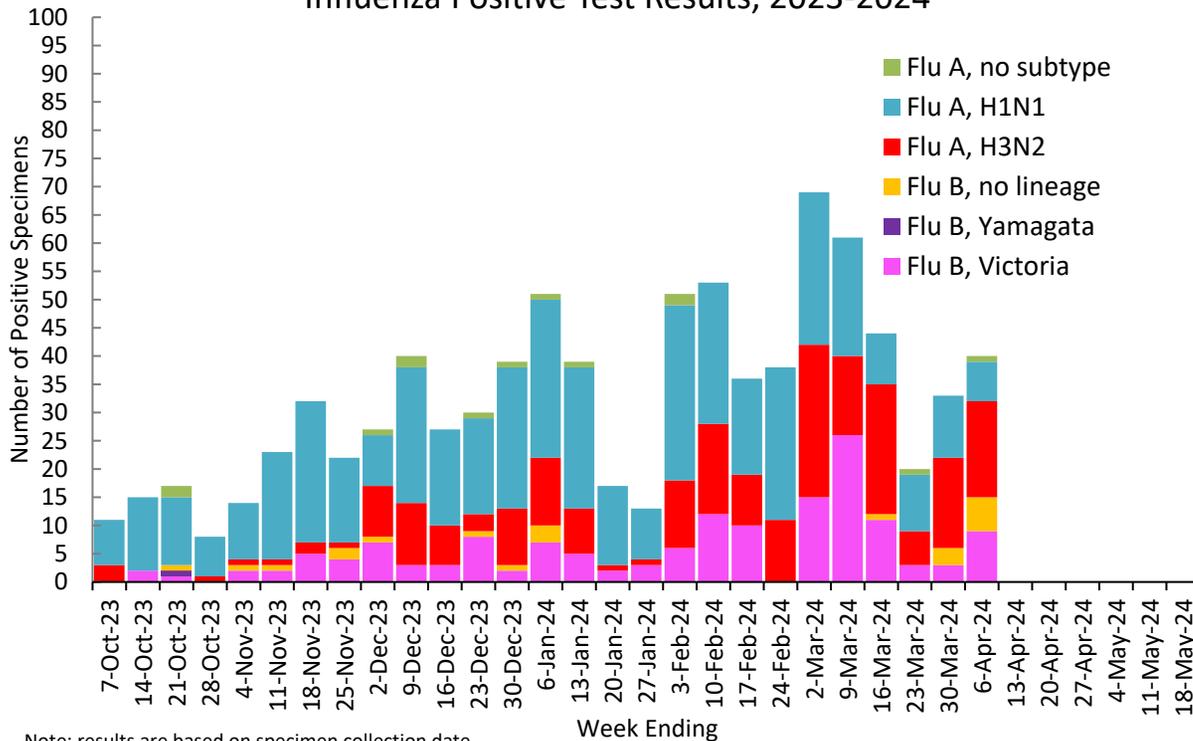

MDHHS BOL Virology Laboratory Data

There were **39** (8C, 0N, 22SE, 9SW) positive influenza results reported by the MDHHS Bureau of Laboratories (BOL) during this time period. Positive flu results for the 2023-2024 season are summarized below.

of Positive Influenza Virus Results by Region

	C	N	SE	SW	Total
H1N1	144	9	157	152	462
H3N2	62	7	66	87	222
Infl B	67	3	77	26	173
Total	273	19	300	265	857

Influenza Positive Test Results, 2023-2024

Note: results are based on specimen collection date
 Influenza B lineage data will be reported based on MDHHS BOL testing runs and will be backtracked into this graph
 Two influenza B/Yamagata results were detected and associated with the LAIV (live, attenuated influenza vaccine) or nasal spray

Michigan Sentinel Clinical Lab Network Respiratory Virus Data

Six (6) sentinel clinical labs (1SE, 2SW, 3C, 0N) reported for the week ending 4/6/24.

Southeast Region	
Influenza A:	Low - moderate
Influenza B:	Slightly Elevated
Parainfluenza:	Low - moderate
RSV:	Low
Adenovirus:	Low
hMPV:	Low - moderate
Central Region	
Influenza A:	Low - moderate
Influenza B:	Low - elevated
Parainfluenza:	Slightly Elevated
RSV:	Low - elevated
Adenovirus:	Low
hMPV:	Slightly Elevated
Southwest Region	
Influenza A:	Low - moderate
Influenza B:	Low - moderate
Parainfluenza:	Low
RSV:	Low
Adenovirus:	No activity
hMPV:	Low
North Region	
Influenza A:	No data available
Influenza B:	No data available
Parainfluenza:	No data available
RSV:	No data available
Adenovirus:	No data available
hMPV:	No data available

There were **3** (2C, 0N, 1SE, 0SW) influenza outbreaks reported to MDHHS during this time period. Influenza outbreaks for the 2023-2024 season are summarized below.

of Influenza Outbreaks by Region

Facility Type	C	N	SE	SW	Total
Schools: K-12 & College	0	0	5	1	6
Long-term Care / Assisted Living Facility	26	10	15	18	69
Healthcare Facility	1	0	0	0	1
Daycare	0	0	0	0	0
Homeless Shelter	0	0	0	0	0
Correctional Facility	0	0	0	1	1
Other	0	0	0	0	0
Total	27	10	20	20	77

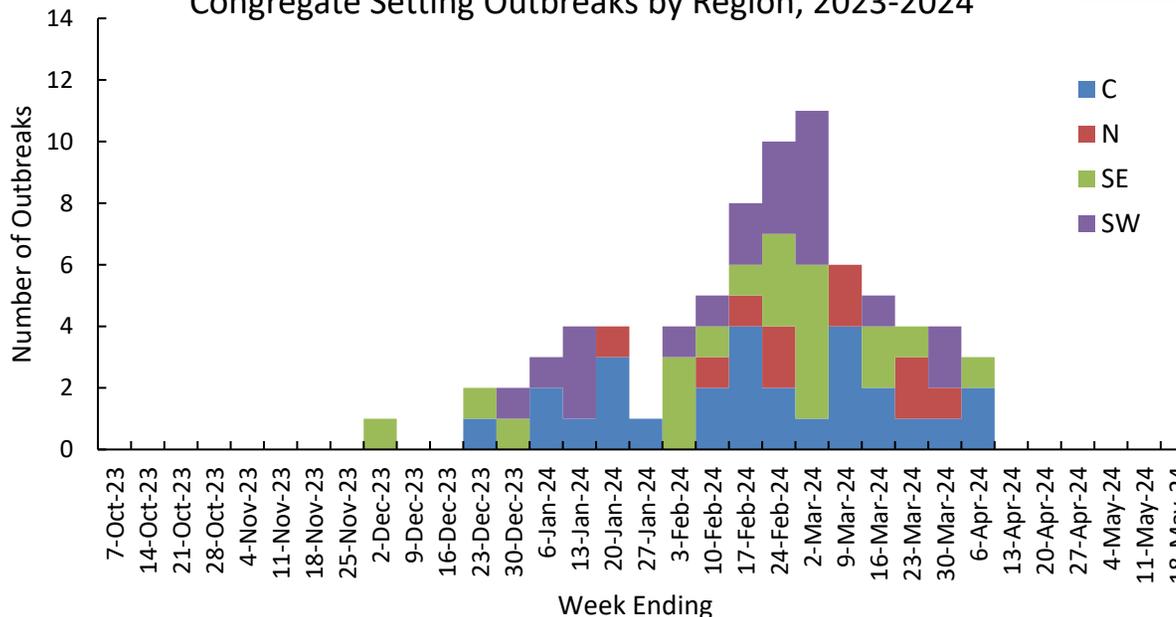

Did you know?

Congregate setting outbreaks of viral respiratory illness are required to be reported to your local health department? See:

- [Influenza Guidance for Healthcare Providers](#)
- [Guideline for influenza and Respiratory Virus Outbreaks in Long-Term Care Facilities](#)
- [Respiratory Virus Outbreaks in Nursing Homes Flow Diagram](#)

Note: Data are reported on laboratory confirmed influenza outbreaks. Non-flu, non-COVID outbreaks and ILI outbreaks without confirmatory flu testing are not reported in the table and graph. **Mixed outbreaks with confirmed flu (including COVID) will be included in the table and graph. There were 0 mixed outbreaks reported during this time period.**

2023-2024 Influenza Season Preliminary Burden Estimates

The Centers for Disease Control and Prevention (CDC) have released [preliminary in-season burden estimates](#) for the 2023-2024 flu season.

CDC estimates that, from **October 1, 2023 through April 6, 2024** there have been:

- **33 million – 60 million** flu illnesses
- **15 million – 28 million** flu medical visits
- **360,000 – 750,000** flu hospitalizations
- **23,000 – 66,000** flu deaths
