A measurement of how far the wealth or income distribution differs from being equal (Gini Coefficient).

COUNTY 0.40

мі — 0.50

perfect perfect equality inequality

(L)

The county measure of income inequality is **lower** than in Michigan.

FAMILIES LIVING IN POVERTY

% population living below 100% of the federal poverty level

COUNTY — 14.2%

MI ———— 14.4%

<u>n</u>

The county rate for poverty is **lower** than the poverty rate in Michigan.

CHILDREN EXPERIENCING POVERTY

% of children ages 0-17 who live below the poverty threshold

COUNTY 21.1%

MI — 19.3%

The county rate for children experiencing poverty is **higher** than Michigan's rate.

CHILDHOOD FOOD INSECURITY

% of children experiencing food insecurity (lack of access, at times, to enough food)

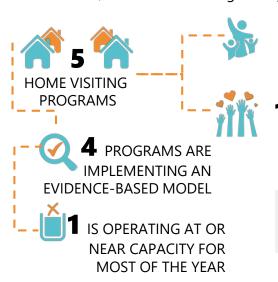

COUNTY 17.4%

MI — 15.9%

1 The county rate for childhood food insecurity is **higher** than Michigan's rate.

EXISTING HOME VISITING PROGRAMS

Home visiting programs sit at the intersection of families and communities. They provide critical linkages between families and community service systems. Missaukee County identified the reach and quality of services for families that partner with home visiting and identified strengths and gaps in the service network. Some patterns of reach and quality for home visiting clients and the service delivery network were noted during the assessment, and ideas for strengthening the service delivery network are described below.

78 FAMILIES ARE ENROLLED IN HOME VISITING PROGRAMS IN MISSAUKEE COUNTY

HOME VISITING SERVICES IN MISSAUKEE COUNTY

MISSAUKEE COUNTY
ARE RECEIVING
HOME VISITING
SERVICES

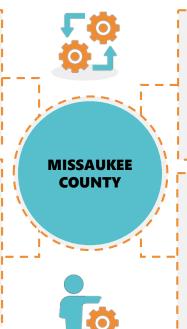

Most home visiting programs are available to children birth to three. Older children do not have as many options.

CONNECTED SERVICES

Great Start Collaboratives and the Local Leadership Group offer linkages to services throughout the region, including transportation, education, housing, food, and medical care.

MEETING NEEDS OF CLIENTS

The county faces challenges related to funding for programs for children and families, recruitment and retention of families and staff, and collaboration across systems that impact families. The county also faces gaps in the availability of substance use services.

GAPS IN THE SERVICE NETWORK

This rural county lacks prenatal and postnatal care for mothers and newborns. The lack of internet access compounds this challenge. Also, since home visiting is not universal, not all families who could benefit are eligible.

QUALITY OF SERVICES PROVIDED

Home visiting programs in the county are of high quality. Additionally, the Great Start Collaboratives, Local Leadership Groups, and Perinatal Collaboratives have produced strong partnerships and are making strides to address priority issues.

STRENGTHENING THE SERVICE DELIVERY NETWORK

The service delivery network in this county could be strengthened by expanding services to address mental health needs. Additionally, it would support system building and decision making to have greater participation by top leadership in key meetings. Finally, programs would benefit from higher reimbursement related to the rural nature of the counties and the time it takes to reach families who are spread out geographically.

COMMUNITY READINESS TO EXPAND HOME VISITING

New or expanded programs and services are most successful in communities that are clear about their readiness to provide a supportive context. Home Visiting partners were convened to discuss the five dimensions of readiness to expand home visiting and identified both community strengths and weaknesses. For each of these domains, the community partners scored each dimension as a 0 (no readiness), 1 (limited readiness), 2 (moderate readiness), 3 (significant readiness), or 4 (full readiness).

COMMUNITY KNOWLEDGE OF FAMILY NEEDS

MODERATE READINESS

Knowledge of family needs comes primarily from oneon-one check-ins with families receiving services, as well as through the work of the Great Start Collaboratives. However, family needs include economic development, and the community lacks economic development committees. The community also lacks ideas for special needs children.

COMMUNITY KNOWLEDGE OF HOME VISITING

MODERATE READINESS

Home visiting is a key connection point for families to other services. However, businesses and the general public often do not know about early childhood programs. The community could do a better job getting the word out, but not being able to offer programs to everyone makes awareness efforts complicated.

COMMUNITY CLIMATE

MODERATE READINESS

The community has taken steps to make services more accessible such as offering late clinic hours for working families and letting other caregivers take children to appointments. Also, some programs can pay better wages, and the health department has buy-in from its Board of Health. However, stigma is attached with home visiting and WIC programs, and the community sometimes discriminates against families on public assistance.

COMMUNITY PURSUIT OF EQUITY

MODERATE READINESS

The community is moving toward universal social determinants of health screenings in programs, hiring bilingual staff, working with tribal programs, and hiring people who are peers and live in the community. Wages make recruitment and retention challenging, and the community could better engage the LGBTQIA population.

COMMUNITY LEADERSHIP

SIGNIFICANT READINESS

The Perinatal Collaborative involves several traditional and non-traditional partners, and local leaders have supported priority issues in early childhood. However, hospital systems tend to operate from their own agenda, and some dental clinics are not as connected to home visiting.

COMMUNITY RESOURCES

MODERATE READINESS

Several groups have invested in home visiting in the community by providing training and making donations. However, home visiting is limited by restrictions on eligibility and is not universal. Additionally, the community has a gap in Infant Mental Health services. As a rural county, the area struggles with poor options for internet and telehealth.

NEED & CAPACITY TO EXPAND HOME VISITING

Missaukee County has need and capacity to expand evidence-based home visiting. Many vulnerable families living in poverty still need to be reached.

This process engaged families to participate as partners and leaders by seeking participation from current LLG parents during the process. The LLG recruited additional parents through collaborating with the local GSCs and gathered their input via focus groups.

Thank you to the parents and community partners who engaged in the assessment process.

Data collected by Health Department of Northwest Michigan/RR2 LLG with assistance from MPHI-CHC. For more information about this assessment, contact Health Department of Northwest Michigan/RR2 LLG.
