Class C Underground Storage Tank Operator

Site Specific Instructions

Emergency Response Procedures

The purpose of this form is to document that employees designated as Class C operators have completed training required by the Michigan Underground Storage Tank Regulations (MUSTR). Class C operators are responsible for responding to alarms or other indications of emergencies caused by spills, releases, or overfills associated with underground storage tank systems. Class C operators shall complete the following training items:

☐ Procedures for overfill protection during delivery of regulated substances.
☐ Procedures for controlling or monitoring the dispensing or sale of regulated substances.
☐ Operation and location of all emergency shutoff switches, breakers, and other controls necessary to completely control all pumps on the system.
☐ Training on the written emergency response procedures for this facility and their posted location.
☐ Response to all tank monitor alarm messages.
☐ Response to emergencies including fire, leaks, spills, and releases.
☐ Reporting of leaks, spills, and releases.
☐ Other Site-specific instructions: _____
