Fireground Resuscitation

Special considerations for victims with smoke inhalation injuries.

Available on YouTube and all podcast platforms

Featured guest
Dr. Robert Dunne

Description: In this episode, we welcome Dr. Robert Dunne, the EMS Medical Director for the Detroit Fire Department, and the Detroit East Medical Control Authority. Dr. Dunne is here to describe why fire departments and EMS agencies should be prepared to treat patients with smoke inhalation injuries. Specifically, Dr. Dunne is here to put a spotlight on the toxic twins, cyanide (CN) and carbon monoxide (CO), which are two major contributors to the injury and death of smoke inhalation patients.
