

HIGHWAY CARGO TANK SPECIALTY TRAINING OPPORTUNITY

This three-day course is designed and intended for hazardous materials team members who respond to releases, or potential releases, of hazardous materials from cargo tank trucks for controlling the releases. This program provides the responder with the knowledge and skills necessary to analyze an incident involving a cargo tank truck, to plan a response within the capabilities and competencies of available personnel and equipment, and to implement the planned response to mitigate the hazardous incident. Responders will be given several scenarios in this class including both tabletop and hands-on exercises using real tank trucks.

Prerequisites: Hazardous Materials Technician

Session: May 22-24, 2023

City: Lansing

Registration: www.train.org/mi-train - Search Course ID 1034713

Cost: \$280 (includes lunches and eligible lodging)
Potentially FREE with approval from your local grant distributors
