

Mutual Aid Tanker Shuttle

Date: April 8, 2023

Time: 8am to 5pm

Location: Suttons Bay-Bingham Fire & Rescue

201 S. St. Mary's St. Suttons Bay, MI 49682

The pump operator is the lifeline for interior firefighters and with it comes many challenges. Having the correct amount of water is needed to protect firefighters and quickly extinguish the fire. However what about those who rely on rural mobile water supply? They must also have the knowledge and troubleshooting skills necessary to provide a reliable water supply to support fireground operations without relying on a fire hydrant within 500 feet. Through classroom discussion and hands-on evolutions, students will also be presented with a many things to consider from design of apparatus to amount of water required for a given fire through a continuous pump evolution with a continuous rotation of apparatus to safely and efficiently provide water.
