The supplier/wholesaler excise tax rate for mixed spirit drink products is 30 cents per liter.

*TTB Spirits Standards of Fill (27 CFR 5.203) do not allow distilled spirits products to be filled in kegs.

Not Mixed Spirit Drink

There are many products on the market that do not contain distilled spirits, but use the common names of drinks that traditionally contain distilled spirits. Many are marketed as ready-to-drink cocktails. These products contain either a neutral malt base that is brewed, or wine, and often come in single-serve cans or bottles like mixed spirit drink products.
