

Job Safety Analysis Made Easy

1 Who Should Attend . . .

This virtual instructor-led program is a must for anyone concerned about health and safety on the job including:

- ▶ Managers concerned about workers' compensation costs.
- ▶ Employees who want to learn proper techniques for protecting their safety and health at work.
- ▶ Business owners who want to learn about compliance with Michigan Occupational Safety and Health Administration (MIOSHA).

2 MIOSHA Training Institute

MIOSHA Consultation Education and Training (CET) Division and Macomb Community College (MCC) have developed the MIOSHA Training Institute (MTI) through a formal alliance. The MTI introduced an Assessment-Based Certificate program, effective October 1, 2007. The certificate program offers participants an opportunity to be recognized for their educational efforts and increased technical expertise. Courses are offered throughout the state in sponsorship with other M-TECSM facilities, community colleges, and safety and health organizations. To learn more about the certificate program, log on to the CET Division website at www.michigan.gov/mti.

3 What You'll Learn . . .

Job Safety Analysis (JSA) has been identified as a key component in an effective Safety and Health Management System. Training will provide attendees with the tools and knowledge required to prioritize, create, use, and review a JSA program to enhance their overall Safety and Health Management System. In addition, worksite analysis is one of the five required elements used to judge a company's readiness for inclusion in the prestigious Michigan Voluntary Protection STAR program. The JSA training will help participants justify the need for a hazard identification program to their upper management and create buy-in from production employees. **Virtual classroom with an in-person instructor. This training format can be taken from the office, home, or remotely.**

Agenda

We offer a flexible program agenda to emphasize the health and safety topics you want most.

- ▶ Describe what a Job Safety Analysis (JSA) is and the purpose.
- ▶ Introduce some basic skills in the recognition and control of occupational hazards.
- ▶ Introduce JSA techniques and create simple and effective JSA.
- ▶ Identify how to use a JSA within Safety and Health Systems.

Required Class for
Safety and Health
Management Systems
Level Two
MTI Certificate

People with disabilities requiring additional services (such as materials in alternative format) in order to participate in the meeting should call 517-284-7720 at least 30 days before the program. The Department of Labor and Economic Opportunity (LEO) is an equal opportunity employer/program.

Facilitator

Brenda Cani joined MIOSHA in 2010 as an Occupational Safety Consultant in the Consultation Education and Training Division. Her duties include consultation, training, workplace evaluation of OSHA compliances, and accident investigation. Brenda covers Macomb County.

Prior to joining MIOSHA, Brenda's experiences include over 20 years in human resources management, consultation, benefits administration, workers' compensation administration, safety training, and safety program development and management.

Brenda graduated with highest honors from Davenport University where she earned a Master's Degree in Management. She also earned a Bachelor's Degree in Business Administration from Franklin University. Brenda is also a Notary Public in the State of Michigan.
