CHAPTER 1: Introduction

The Michigan Commission on Law Enforcement Standards (MCOLES) is mandated by statute to prepare and publish medical and non-medical standards for the selection, employment, training, licensing, and revocation of law enforcement officers in Michigan. The legislation that created MCOLES can be found in Public Act 203 of 1965, as amended, sections MCL 28.601-615 of the Michigan Compiled Laws (MCL). The statute also authorizes MCOLES to promulgate administrative rules that establish the criteria and processes for the enforcement of the standards, including rules governing in-service training.

As a state regulatory agency, and as a logical outgrowth of its statutory responsibilities, the MCOLES is required to establish and maintain the job-relatedness and relevance of all its standards. One way to demonstrate and support job relatedness and relevance is through a process called validation. The first step in any formal validation strategy includes a review of job information -- that is, a review of the tasks and activities performed on the job and the knowledges, skills, abilities, and other characteristics required for their successful performance. One of the most rigorous methods used to define job content is a job task analysis, where each and every task is described in terms of its frequency, and criticality or importance. The job task analysis approach was implemented in Michigan to ensure that the resulting job description would be comprehensive, complete, and useful for defining performance standards for entry into the profession as well as for continuing education.

In 1979, the MCOLES, then the Michigan Law Enforcement Officers Training Council (MLEOTC), in partnership with Personnel Research Consultants (PRC), Fair Oaks, California, conducted a job task analysis of the patrol officer position using a random sample of Michigan law enforcement agencies and officers. A sample pool of patrol officers and patrol supervisors were asked about the frequency and criticality of specified common job tasks. The results of the 1979 job task analysis were ultimately used by the MLEOTC to develop mandatory statewide selection standards and training curricula for entry-level patrol officers across the state.

In 1996, the MLEOTC contracted with Stanard & Associates, Inc. (S&A), Chicago, Illinois, to conduct an updated job task analysis to ensure that the mandated standards remained valid and reflected current law enforcement practices. As was done in 1979, MLEOTC queried patrol officers and patrol supervisors regarding a list of common job tasks as to their frequency and criticality.

In 2006, MCOLES again partnered with Stanard & Associates, Inc. to develop the job analysis survey and collect the survey data. The process, approach, and survey content largely mirrored those used in the 1996 study, with content updated to reflect the job as it existed in 2006, with a focus on changes in the job in the 21st century. They then contracted with Performance-Based Selection (PBS) to analyze the data and produce an overall report, as well as individual reports for each stratification represented in the database. Detailed information regarding the design and development of the 1979,1996, and 2006 job task analyses and the adherence of these efforts to professionally accepted guidelines can be found in the respective project reports (Personnel Research Consultants, 1979; Stanard & Associates, 1996; Performance-Based Selection, 2007).

Although the MCOLES routinely examines and evaluates its entry-level standards, training curriculum, and the licensing examination, it is important to ensure that the job analysis remains

contemporary and accurately describes the job as it exists today. Therefore, in late 2017 - 2018, the job task analysis was updated once again. The results of that project are summarized in this report.

The job task analysis is the tool used by the MCOLES to support the job-relatedness of the law enforcement standards for the position of patrol officer. It should be pointed out that other state standard-setting organizations across the nation use a very similar methodology. What the MCOLES has learned about the job tasks, through the job task analyses, is important to agencies statewide, and each and every officer across the state. Participating in the JTA was a unique opportunity for line officers to let the MCOLES know what type of person should be entering the law enforcement profession in Michigan.

The JTA is structured to capture the roles, responsibilities, and duties specifically of routine patrol officers, a category within the occupation of law enforcement officer. In completing the job task inventory, patrol officers were asked to indicate, on a scale of 1-5, how frequently they performed each task. Patrol supervisors were also asked to indicate, on a similar five-point scale, the relative importance of each patrol officer task. In addition, officers were asked about the types of equipment and sources of information that they use.

The survey was administered online, and officers were able to record their responses by "pointing and clicking." Since the JTA was web-based, officers and supervisors could access the survey at any time from any computer, phone, or tablet during the data collection or survey phase. The ability to work on the survey and then return to it at a later time contributed to the "user-friendly" nature of the process.

A total of eight separate stratifications or agency types were sampled for this statewide study. As part of the job analysis study, separate reports were created for each stratification. The two largest law enforcement agencies in the state, the Detroit Police Department (DPD) and the Michigan State Police (MSP) were each included as separate stratifications. The remaining six stratifications were defined as follows:

- large city/village/township police departments (60+ officers)
- medium city/village/township police departments (20-59 officers)
- small city/village/township police departments (1-19 officers)
- large county sheriff departments (60+ officers)
- small county sheriff departments (1-59 officers)
- specialty police agencies

This agency report is intended to complement the statewide report, <u>Statewide Job Analysis of</u> <u>the Patrol Officer Position</u> (PSI Services LLC and MCOLES, 2018) which describes in detail the job task analysis including scope, methodology, analyses, and findings for the routine patrol officer position in Michigan. For additional, specific, and/or detailed information, please refer to the cited report.

Agency specific reports are intended to help by highlighting *the core tasks* for the patrol officer position, as practiced in each agency type. The more specific job task analysis data can be used to increase the efficiency and effectiveness of agency personnel management procedures and processes such as selection, training, compensation, performance evaluation, and promotion.

CHAPTER 2: Job Analysis Inventory Design and Administration

One goal of the current project was to reduce the number of ratings to be made. Prior surveys had taken several hours to complete; an impractical amount of time given the nature of the job, and the fact that respondents were volunteering their time.

To help to achieve this goal, the number of task statements to be rated was reduced. Specifically, task statements that had a strong history of being considered core were identified and reviewed with the intention that these tasks would not be rated as part of the current job task analysis. Because data were available from nearly three decades of job task analysis ratings, the project team chose to use these results to identify tasks that had been included on, and rated as core, across all three of the previous job task analyses (in 1979, 1996, and 2006). These statements would be identified and then reviewed by a group of incumbent MCOLES licensed patrol officers and patrol supervisors (that is, subject matter experts, or SMEs) from across the state. The group would be tasked with determining whether the identified tasks could still be considered core for a variety of agencies across the state.

Identification of Historically Core Tasks

As a first step in identifying the task statements to be included on the JTA survey, members of the PSI project team reviewed the results of the 1979, 1996, and 2006 JTA projects, and identified task statements which could be considered core across the 27- year span covered by these JTAs (e.g., "historically core"). To be considered historically core a task:

- had to have been included on, and rated as core, on all 3 of the previous JTAs, and;
- had to be substantially the same across all three previous surveys, with no, or only very minor, wording changes across time. An example of an acceptable minor wording statement is changing "traffic accident" to "traffic crash" to reflect more current verbiage.

The list of historically core tasks were then compiled into a separate document and reviewed by patrol officers and supervisor SMEs from the state of Michigan, during two separate meetings. This process resulted in a list of 192 task statements that were considered historically core; these tasks were, therefore, not rated in the 2018 JTA survey. A list of these 192 historically core tasks is contained in Appendix A.

JTA Survey

Information regarding the job of a patrol officer in Michigan was obtained by administering an online comprehensive Job Task Analysis (JTA) survey to patrol officers and first-line supervisors in the Michigan law enforcement community. The JTA includes four main sections: (1) a <u>background and training information section</u> which asks for information about the demographic characteristics of the respondents, as well as information regarding the type of department in which they work, their work shifts, and their attitude toward the basic and inservice training they received; (2) types of <u>equipment used</u> where respondents indicated which equipment on a predetermined list was used in the course of their duties; (3) <u>sources of information</u> which contained questions about written materials officers use on the job, and (4) tasks performed.

Patrol officers were asked to complete all four sections of the JTA, while the JTA for supervisors included only two of the four sections – background information and tasks performed. A copy of the patrol officer JTA is given in Appendix B.

The tasks performed are the foundation and focus of the JTA. A total of 244 job tasks that were believed to be performed by law enforcement officers in the State of Michigan were included. For each task, two rating scales were used – **frequency** and **criticality** (or consequences of inadequate performance). Each rating was made using a 5-point scale. The rating scales are given below.

Table 1 Rating Scales

| Frequency of Performance | | | | | |
|--|--------------------------------------|--------------------------|-------------------------|-------|--|
| 1 | 2 | 3 | 4 | 5 | |
| Have not done this in the past 12 months | A few times per year (or less) | A few times per month | A few times per week | Daily | |

| Criticality (Consequences of Inadequate Performance) | | | | | | |
|--|---------------------|---------|----------------------|--------------------------------------|--|--|
| 1 | 1 2 3 4 5 | | | | | |
| Minimal | Not very serious | Serious | Extremely Serious | Disastrous (e.g. loss of life) | | |

Patrol officers rated each task's frequency, while patrol supervisors rated the task's criticality.

CHAPTER 3: Description of the Sample

All eight agency types were represented, with the final sample representative of Michigan's population of sworn officers. The number of patrol officers and supervisors sampled statewide by agency type is provided in Table 2, with the number of officers and supervisors for the Large Sheriff sample in bold and italics.

Patrol Officers' Ratings of Basic Training Curriculum and Training Priority

Patrol officers who had been licensed in the State of Michigan for less than 3 years (and so who had completed Basic Training relatively recently) were asked to indicate how well prepared they were to perform the important tasks associated with their job following Basic Training. For this summary, respondents who had been on the job for less than 6 months (who had been taken out of the overall sample) were included, as their perceptions and input are current and important. The majority (approximately 91%) indicated that they were "fairly well" or better ("quite well" or "very well") prepared. Results for those from a Large Sheriff department with less than 3 years of experience are given in Table 22.

Additional Information

Patrol officers from Large Sheriff departments indicated that they spent an average of 85% of their time working alone. Approximately 6% of the officers indicated that they work alone less than 10% of the time, while 70% indicated that they work alone at least 90% of the time.

CHAPTER 4: Data Analysis

The data were analyzed to describe the job of Patrol Officer in the State of Michigan as it exists in 2018. The analyses were designed to identify:

- core tasks
- core sources of information, and
- core equipment used.

Details of each analysis and findings follow.

Core Tasks

Core tasks are defined as those tasks with "statewide significance" (PRC and MLEOTC, 1979) and are determined using information from two rating scales: Criticality (consequences of inadequate performance or CIP) and Frequency, and from two perspectives: supervisors (who rated criticality) and officers (who rated frequency).

Three factors were considered in determining whether a task was core or non-core:

- <u>Composite Score</u> Data from the two rating scales (criticality and frequency) were combined to create a composite score for each agency type. The composite was created using the same methodology implemented in 1979 and used in both 1996 and 2006, with criticality receiving the majority weight (67%). The range for the composite was 1 to 5, and it was calculated by summing each agency type's weighted mean Criticality response (.67 x mean criticality) and weighted mean Frequency response (.33 x mean frequency).
- 2. <u>The mean frequency rating for each task across all agency types</u> Mean frequency plays a role in that regardless of a task's criticality rating, if a task is virtually never performed, it should not be a significant part of the job. Therefore, in identifying core tasks, a minimum average frequency rating was implemented.
- 3. <u>The mean CIP (criticality) rating for each task across all agency types</u> The average CIP rating for tasks across all respondents was also
- 4. considered when selecting core tasks. Regardless of a task's frequency rating, if the task is considered extremely serious, it should be considered significant.

Any task with a CIP rating of at least 4.0 is considered core, regardless of its frequency or criticality rating. In addition, a task is considered core if:

- the average frequency rating is at least 1.25; and
- the average composite score is at least 2.50

As a result of these selection criteria, 119 out of 244 tasks or 48.77 percent, were identified as core tasks. A list of the core tasks for Large Sheriff departments is provided in Appendix C, while non-core tasks are listed in Appendix D.

Sources of Information

Data were gathered on both the importance of each source of information, and the frequency of use of each source. The response scales are given below.

| Rating | Anchor |
|--------|--|
| 1 | Do not refer to this information source |
| 2 | Refer to this source a few times per year (or less frequently) |
| 3 | Refer to this source a few times per month |
| 4 | Refer to this source a few times per week |
| 5 | Refer to this source daily |

Table 23Sources of Information – Frequency Scale

Table 24Sources of Information – Importance Scale

| Rating | Anchor |
|--------|---------------------|
| 1 | Minimally Important |
| 2 | Not Very Important |
| 3 | Important |
| 4 | Very Important |
| 5 | Extremely Important |

A composite score was created in much the same manner used for task statements (i.e., giving Criticality or Importance twice the weight of Frequency). A cut off of a composite score of 2.50 or higher for Large Sheriff departments was used to identify core sources of information. Twenty-five of 38 sources of information (or 65.79 percent) were rated core. All 38 sources of information along with the composite scores for Large Sheriff departments are given in Appendix E.

Equipment

When rating the 99 different kinds of equipment and vehicles, respondents simply indicated if they used the equipment or not. If 50% or more of the respondents for the Large Sheriff departments indicated that they used the equipment, it was considered core. A total of 40 pieces of core equipment (or 39.6 percent) were identified. A list of the equipment along with the percentage of respondents using the equipment in Large Sheriff departments is given in Appendix F.

CHAPTER 5: Summary and Conclusions

The data from the 2018 statewide job task analysis was used to create specific job descriptions for each of the eight different agency types. As a result, the job of patrol officer in Large Sheriff departments has been defined in terms of activities and context. The description includes core job tasks, sources of information, and equipment. The methods, analyses and criteria used to create this detailed and focused job description are described in this report, with finding and results given in Appendices.

The agency type specific job description can be used to review, update, and support local employee selection programs, training curriculum, and/or performance appraisal processes. In addition, the updated job description helps to maintain compliance with State and Federal fair employment regulations and guidelines.

PATROL OFFICER JOB TASK ANALYSIS SURVEY

Background Information

You have been selected to complete this Job Task Analysis (JTA) survey. The JTA survey is used by MCOLES to identify the core job tasks, equipment, and sources of information used by patrol officers from across the state of Michigan. Over 3,000 officers will be taking this survey. Your responses will help ensure that MCOLES entry standards remain fair and valid.

We greatly appreciate you taking the time to complete the survey.

Please note that you do NOT have to complete the survey in one session. As soon as you enter your email address, a registration email will be sent from the survey company (PAN). You can ener and return to the survey, where you left off, by clicking the "start survey" link in the registration email. If you complete the survey in one session, it will take approximately one hour.

The survey contains the following 5 sections:

- 1. Background Information
- 2. Equipment Ratings
- 3. Sources of Information Frequency Ratings
- 4. Sources of Information Importance Ratings
- 5. Task Ratings

Be sure to complete all sections, reading the instructions for each before beginning. Base all your responses on experience from your current job at your agency.

Your responses will remain confidential and private. We ask background questions so we can obtain an accurate profile of policing across Michigan.

Thank you very much for the valuable contribution of your time and effort to this project.

Important Note: Please use the "Previous Page" and "Next Page" buttons to move backward and forward within the survey. Do NOT use the arrows at the top of the webpage.

Sources of Information – General Overview

You will be rating sources of information that assist patrol officers in performing their job. You will be providing two separate ratings for each information source. First, you will be asked to rate how FREQUENTLY you use each source of information, using a rating scale provided in that section. Then, in the next section, you will be asked to rate how IMPORTANT the source of information is in helping you perform your job. Note that the rating scale for importance is different than the one used to rate frequency – the specific scales, along with directions for use, are provided in each section.

Sources of Information – Frequency Ratings

Frequency Scale

How Frequently do you use this source of information?

- 1 = I do not refer to this source of information
- 2 = I refer to this source a few times per year (or less)
- 3 = I refer to this source a few times per month
- 4 = I refer to this source a few times per week
- 5 = I refer to this source daily

Tasks

Task Rating Information

This section focuses on tasks that are performed by patrol officers. We know that patrol officers perform a wide range of tasks, and you are being asked to rate how frequently you perform the listed tasks using a scale of 1-5. The tasks have been organized into major categories to help you along.

It may seem as if certain tasks are missing from the list, and that is true. As part of this JTA project, we identified certain Core Tasks that have been part of a patrol officer's job since our first JTA in 1979 (e.g., arrests, constitutional rights, etc.). A group of experts reviewed the list and confirmed the tasks remain common to policing over the years. We are NOT asking you to rate the common Core Tasks once again in 2018.

We have provided a list of these Core Tasks for your review. You are not required to look at this list of Core Tasks before making your ratings, the list is simply there if you would like to take a look at them.

If you wish, you can review the Core Tasksw now by clicking *here*. To return to this survey, xout of the list and then click CLOSE upon returning. The Core Task list will also be available for review after you have completed your ratings.

Task Rating Instructions

The following sections contain tasks that are performed by patrol officers. The tasks are organized according to <u>major job duties</u>. (Criminal Investigation, Traffic – Vehicle Stops). The major job duty is listed in red, at the top, left-hand side of each page, under the survey heading. Please rate how FREQUENTLY you have performed each of the tasks in the past 12 months, or since your employment as a patrol officer, if less than 12 months. Use the 5-point scale below to rate the frequency of task performance.

How often have you performed this task during the past 12 months (or less, if not employed for 12 months as a patrol officers)?

1 = Have not done this in the past 12 months
2 = A few times per year (or less)
3 = A few times per month
4 = A few times per week
5 = Daily
