SOMATIC CELL COUNT INVESTIGATIVE REPORT

(In accordance with Act 266, P.A. 2001, or Act 267, P.A. 2001)

Producer Name: _____

Address: _____

Phone Number: (_____) _____

Producer Status: **First Count** **Warning** **Shut Off**

Producer's Count Record:

DATE	SCC	BACTERIA	INHIBITOR

Herd Information

Number of Cows Milking		Daily Production	
Number of Cows Milking >10 Months		Number of Cows Being Treated	

Management Program:

Supervisory Veterinarian:			
Residue Control & Educational Program Completed?	YES	NO	Date:
DHIA SCC Program used?		Industry Field Person:	
Herd Test Date:		Herd Test Results:	
Milking Equipment Test Completed:			

Describe Milking Practices: Check the boxes that apply to how the producer is milking his cows.

- Individual paper or cloth towels used for prepping cows.
- Teats cleaned with a sanitizing udder wash or pre-dip.
- Teats massage for 20-30 seconds while prepping cow.
- Cows checked with a strip cup or CMT (California Mastitis Test)
- Teats wiped completely dry with a separate paper or cloth towel.
- Milking machine attached within 1 minute after teat preparation.
- Machine properly attached and adjusted to prevent liner slippage.
- Machine stripping avoided or kept to a minimum.
- Vacuum shut off prior to removal of milking unit. If automatic takeoffs, do they shut off vacuum before unit is removed?
- Teats dipped with a post dip immediately after milking machine is removed.
- What products are used for udder wash or pre & post dip? _____

Describe Cattle Housing System: Check the boxes that apply to how the producer houses his animals.

- Dry cows, heifers, and calves are housed separately from the lactating cows.
- Housing for all cattle is adequate. Producer has enough stalls for animals housed?
- Stalls are clean and dry and properly bedded. List type of bedding used _____
- Manure is removed from cow contact surfaces daily or more often as needed.
- Cow yard and lanes are clean, well drained, and free of mud and stagnant water.
- Maternity pens are provided and kept clean and well bedded.

Mastitis Treatment Program: Describe the Mastitis Program in place on the farm.

- Cows are checked for clinical and sub-clinical mastitis. What test is used? _____
- Are infected milking cows treated with FDA approved Rx, OTC, or "extra" labeled drugs.
- Treated cows are identified. List the methods used to ID treated cows _____
- Treatment records are kept and available for review.
- Treated cows are milked last or with separated equipment.
- All dry cows are treated.
- An on farm drug screening test is used. List the type of test used _____

Where are most of the clinical cases found?

- Dry cows.
- Fresh cows.
- First calf heifers.
- Heavy producers.
- Combination.
