

Completion of Training Affidavit

By signing this document, I am attesting to all of the following:

1. I have attended a Michigan Department of Agriculture & Rural Development (MDARD) approved training session for SLN Reg. No. MI-180001 (post-shuck split application of Bravo Weather Stick on tart cherries) or; I have completed the SLN Reg. No. MI-180001 training program on MDARD's website.
2. I understand that tart cherries treated with Bravo Weather Stik post-shuck split can only be mechanically harvested.
3. I understand that tart cherries treated post-shuck split with Bravo Weather Stik can only be used for processing purposes; no fresh uses are allowed.
4. I understand that tart cherries treated post-shuck split with Bravo Weather Stik must spend at least 2 hours on the cooling pad prior to leaving the farm. Flow rate on the cooling pad must be 8-10 gpm for the initial cool down period (until the temperature of the fruit is lowered to 60° F or less) and then 4-6 gpm for the remaining duration of the cooling period.
5. I understand that deviating from the SLN label could result in residues that exceed the established tolerances for chlorothalonil on tart cherries and as a result, the fruit would be considered adulterated and subject to destruction.
6. I understand that a signed copy of this document and the label for SLN Reg.No. MI-180001 must be in the possession of the applicator at the time of application.
7. I understand that I must maintain a signed copy of this document for a period of at least two years from the date of application.
8. I understand this training certification is only valid for one year from date of signature.
