

FIFRA 24(c) Special Local Need

SLN No. MI-240003

Maestro[®] 2EC Herbicide

EPA Reg. No. 71368-29

FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF MICHIGAN

**FOR USE ONLY BY MICHIGAN CUT FLOWER GLADIOLA GROWERS
For Control of Emerged Weeds in Cut Flower Gladiola Plants**

**This label expires and must not be distributed or used in accordance
with this SLN registration after March 15, 2029.**

This label and the federal label for this product must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, and precautions on this SLN label and the label affixed to the product container. It is a violation of federal law to use this product in a manner inconsistent with its labeling.

ACTIVE INGREDIENT:

Octanoic acid ester of bromoxynil (3,5-dibromo-4-hydroxybenzonitrile)* 33.4%

OTHER INGREDIENTS: 66.6%

TOTAL: 100.0%

*Bromoxynil octanoate equivalent to 22.9% of bromoxynil or not less than 2.0 pounds of bromoxynil per gallon

DIRECTIONS FOR USE

For control of emerged weeds in cut flower gladiola plants:

Application Rate Pint/Acre (lb ai/acre)	Application Instructions
0.75 – 1 (0.1875 – 0.25)	Use the lower rates on coarse, sandy soils and the higher rates on silt and clays. See product label for more specific information on soil types. Apply this product to actively growing weed seedlings from crop emergence to the 2-leaf growth stage of the cut flower gladiola plants. To reduce the potential for temporary leaf burn, apply when crops are not stressed by excessively high, cool or cold evening temperatures, abrasive winds, or mechanical injury such as that caused by hail, sleet, or insect feeding. Make one application for control of broadleaf weeds. One additional application is permitted, if needed.

RESTRICTIONS AND PRECAUTIONS

- Do not exceed a total cumulative rate of 2 pints/acre (0.5 lb ai/acre) per season.
- Do not plant rotational crops until the following season.
- Do not incorporate.
- Post-emergence application after the 2-leaf growth stage may result in increased crop injury.
- Addition of a spray additive or mixing with a fertilizer may cause excessive crop leaf burn.

NOTICE

Read the "WARRANTY DISCLAIMER" and "LIMITATION OF LIABILITY" in the label booklet for this product before using this product. Those terms apply to this supplemental labeling and if those terms are not acceptable, return the product unopened at once.
