NAME EMAIL

ADDRESS CITY/STATE /ZIP PHONE #/FAX #

- Customers will be billed at the address given above.
If samples are for export purposes, an authorized MDARD or MSPA inspector must collect the sample for a valid USDA phytosanitary certificate.
Both PVY and bacteria testing can be done on the same tuber samples.
Bring samples to the address shown above.
Please complete this form and include with each sample or group of samples submitted for testing.
You may duplicate this form or request more as needed.
Results will be mailed as soon as they are available.

check all that apply

Table with columns: VARIETY NAME & FIELD YEAR (FY), CERTIFICATION #, NO. OF TUBERS, FOR EXPORT, SAMPLE BACT & VIRUS ON SAME TUBER, Bacterial Pathogens (10 tubers/acre OR a minimum sample size of 400 tubers/seed lot), Bacterial ring rot (BRR) Clavibacter michiganensis subsp. sepedonicus (Cms), Bacterial Blackleg Dickeya sp., Virus Pathogens (< 1/2 acre = 100 tubers, 1/2 to 1 acre = 200 tubers, 1 to 40 acres = 400 tubers, > 40 acre add'l 400 tuber samples for every 40 acres), Potato virus Y (PVY) (Dormant tuber testing).
