

Quarantine Requirements

FEDERAL GYPSY MOTH QUARANTINE – 7 CFR 301.45

REGULATION SUMMARY:

The grower/shipper (establishment) accepts responsibility to ensure that all cut Christmas trees, being shipped out of the generally infested area are free from all spongy moth (*Lymantria dispar*) life stages and meet the following certification guidelines. The establishment shall provide a valid copy of its license/certificate and a Federal/State certificate, for each consignment, attesting to freedom from all life stages of spongy moth and that meet the following certification guidelines.

CERTIFICATION GUIDELINES:

1. The regulated articles must be eligible for unrestricted movement under all Federal and State domestic plant quarantines and regulations applicable to the regulated articles (e.g., must not be restricted by European Pine Shoot Moth or Cereal Leaf Beetle Quarantines).
2. Determination of freedom from all viable spongy moth life stages, performed by a representative of the U.S. Department of Agriculture (USDA) or MDARD, will be based upon visual survey and preventative treatments of the regulated articles, premises, and environs of the establishment. The establishment is responsible for applying any treatments.
3. The establishment will inspect regulated articles prior to shipping and thoroughly remove all spongy moth egg masses.
4. A regulatory treatment is a mandatory insecticide application required by the USDA and/or MDARD to assure proper control of spongy moth on the regulated articles, premises and environs of the establishment known to be infested or at risk of being infested by spongy moth. Regulatory treatments shall be applied at the correct time, during the spray window identified by MDARD via the MSU Enviroweather web site. A current list of USDA approved insecticides will be provided by MDARD each year.
5. When transporting regulated articles through generally infested areas the establishment must safeguard all certified regulated articles with a covering adequate to prevent access by any spongy moth life stage.
6. If receiving regulated articles from other establishments within the generally infested areas for shipment outside the generally infested area, the establishment will (1) only accept regulated articles accompanied by a valid Federal certificate or (2) immediately arrange to have regulated articles inspected by either a USDA or MDARD inspector.
7. Regulated articles and/or documentation will be presented to USDA or MDARD inspectors when requested.

RECORDKEEPING:

1. A uniquely numbered record of each shipment sent must be maintained by the establishment for a minimum of twelve months and furnished to a representative of the USDA or MDARD upon request for examination. This must include the consignee's name and address, the name, quantity of the regulated article shipped, date of shipment, and origin.
2. All treatment records involving additional certification, including the use of general-use pesticides, must be maintained for a minimum of twelve months and include the brand name or active ingredient, EPA registration number, application rate, applicator name, product treated, and date.
3. For nurseries with multiple fields or whenever regulated articles are purchased elsewhere, the statement of origin and the original certification that document that the regulated articles have met all necessary federal/state plant quarantines, must be maintained for a minimum of twelve months, and furnished to a representative of MDARD upon request.

Compliance Agreement for Cut Christmas Trees
Expiration Date: December 31, 2023

Agreement No.: _____ Firm Name: _____
Grower/Manager: _____ Address: _____
City: _____ Zip: _____ County: _____
Phone: _____ Email: _____

1. The firm/person named above hereby enters into an agreement with the Michigan Department of Agriculture and Rural Development (MDARD) and agrees to meet the quarantine and shipping requirements contained in this agreement. Based on the ability and willingness of the above to abide by the conditions and meet the requirements described in this agreement, MDARD agrees to provide the necessary certification to enable this firm/person to ship cut Christmas trees to interstate destinations.
2. The undersigned agrees that certificates in their possession will be protected from theft and unauthorized use.
3. The firm agrees to retain copies, for a period of 36 months, of all certificates utilized and any related shipping documents.
4. This compliance agreement may be immediately cancelled or revoked for non-compliance. The violation of federal or state regulations may result in criminal or civil penalty.
