

State of Michigan Employees For Your Benefit

A variety of timely information related
to your health care benefits and needs

Blue Cross to manage durable medical equipment benefits

Beginning October 12, 2014, the following benefits will no longer be managed through the SUPPORT program, and will be handled by Blue Cross Blue Shield of Michigan:

- Durable medical equipment
- Medical supplies
- Prosthetic and orthotic services
- Mail order equipment

When your doctor prescribes any of these items for you, be sure to go to a supplier that participates with Blue Cross Blue Shield to keep your out-of-pocket costs lower. To find a supplier in our network, use our provider search at bcbsm.com/find-a-doctor or call Customer Service.

If you already use durable medical equipment, prosthetics, orthotics, medical supplies or mail order equipment, check with your supplier to see if they participate with Blue Cross and Blue Shield plans. If not, the supplier can call us to find out how to join our network.

Monday through Friday,
excluding holidays.**

On the go? You're good to go with the virtual ID card.

Being registered on bcbsm.com has its benefits.

Have you ever walked up to the receptionist's desk right before a doctor's appointment, and realize you're missing your insurance card? Not having your ID card on you when you need it can be a real pain – especially if you're visiting a new doctor for the first time, or when you're on your way to urgent care.

That's why our virtual ID card is such a great feature.

If you've registered your account on bcbsm.com, you can whip out your mobile device to access your virtual ID card.

Lower your cancer risk by changing what you eat

Eating powerhouse foods can help

You may have heard certain fruits and vegetables referred to as a 'powerhouse.' But what does that term mean? And which foods are considered powerhouses?

Powerhouse fruits and vegetables are those most strongly linked to a lower risk of chronic illness. They're rich in vitamins B, C and K as well as folate, iron, niacin and riboflavin – nutrients that through phytochemicals seem to help protect cells from abnormalities and damaging components in food and the environment.

A recent study done by Jennifer Di Noia, Ph.D., associate professor at William Patterson University in Wayne, New Jersey, produced a list of powerhouse fruits and vegetables based on the concentration of the nutrients they contain.

Out of the 47 fruits and vegetables in the study, ten proved to be more powerful than the rest:

- | | | |
|---------------------------|------------------------|---------------------------|
| 1. Watercress | 5. Spinach | 8. Parsley |
| 2. Chinese cabbage | 6. Chicory | 9. Romaine lettuce |
| 3. Chard | 7. Leaf lettuce | 10. Collard greens |
| 4. Beet greens | | |

Although the six fruits and vegetables below are rich in nutrients, they did not have the nutrient density required to meet powerhouse criteria:

- | | |
|---------------------|---------------------|
| 1. Blueberry | 4. Onion |
| 2. Cranberry | 5. Raspberry |
| 3. Garlic | 6. Tangerine |

To check out the entire list, go to cdc.gov/pcd/issues/2014/13_0390.htm.

There are countless ways to incorporate more powerhouse elements and other nutrient-rich foods in to your diet. Check out the next page for a delicious recipe to get started.

Virtual ID, continued from page 1

Here's how to get to your virtual ID card:

- Using your smart phone, go to **bcbsm.com**.
- Tap the green *Member Login* button in the top right corner of the screen.
- Log in using your user name and password.
- Once your home page appears, tap on the ID card icon in the top left corner, and your Virtual ID Card will appear.

Of course, nothing replaces having the real thing – so if you've lost your card, make sure to request additional ones. To do that, you can call Customer Service during regular business hours. Or, you can log into your account online at **bcbsm.com** and click on the *Get an ID card* link under *Account Settings* in the upper right side of the screen.

Vegetarian Chili

Whether you're a full-time vegetarian or simply enjoy a meatless meal now and then, look for recipes that are full of flavor and low in fat.

Vegan meals avoid foods of animal origin including meat, poultry, fish, dairy products, and eggs — so they're cholesterol-free. While meatless recipes tend to be low in total fat, saturated fat and calories, this isn't always the case. Be sure to check nutrition details per serving.

Ingredients

- | | |
|------------------------------|--|
| 1 cup textured soy protein | 2 cloves garlic, minced |
| 7/8 cup boiling water | 1 28-oz. can diced tomatoes |
| 1 tablespoon olive oil | 1 19-oz. can black beans, rinsed and drained |
| 1 large onion, chopped | 2 tablespoons chili powder |
| 1 green bell pepper, chopped | 1 tablespoon cumin |

Directions

Mix textured soy protein with boiling water. Heat oil in large pot. Sauté onion and green pepper until soft, about five minutes. Add garlic and cook briefly. Add tomatoes, beans, chili powder, cumin and soy protein. Stir. Bring to a boil.

Reduce heat and let simmer for about 30 to 45 minutes, until chili thickens.

Nutrition facts

Makes four servings. Each serving contains 243 calories, 4 g fat, 0 mg cholesterol, 758 mg sodium, 40 g carbohydrates.
