

Four Pillars of an Early Middle College

College-focused academic program:

Schools implement comprehensive, standards-based curricula that provide a bridge to postsecondary studies and incorporate both high school and college coursework.

Student academic and social/emotional support:

Supports are offered to all students to meet their academic, social, and emotional needs in high school and in the transition to college.

High school/college collaboration:

High schools and colleges take joint responsibility for students' educational success and establish structures that permit high school students to take college courses.

Culture of continuous improvement:

High schools and colleges engage in evidence-based discussions to continuously improve students' experiences and outcomes.
