### **Amendment Opportunity:**

After careful consideration, the Michigan Department of Education will allow amendments to Section 35m applications based on specific guidelines outlined below. Because Section 35m grant funding is formula-based, all funding must be distributed as a result of the initial application phase. Funding will be distributed after the application closes and budgets have been approved.

The department recognizes that some districts may need additional time to make a final selection of a literacy material or resource funded by 35m.

To be considered for an amendment, applicants must follow the guidelines outlined below:

- **All districts must complete an initial application by July 11, 2025, at 5:00 pm EST** and submit a budget by the required deadline. The budget deadline for budget submission is September 19, 2025. Distribution of funds is anticipated in the October State Aid payment.
- **Districts considering piloting programs or those that would need additional time to make a final selection decision will be allowed a one-time amendment of their selection.** Amendments will only be approved within the same category as the initial application and budget. Changes across categories (Tier 1, Intervention, and Professional Development) will not be eligible for an amendment.
- *For example, if a district selected a Tier 1 material in the initial approved application and budget, it may only change to a different Tier 1 material from the funded Section 35m lists during the amendment window.*
- **To ensure all funds are expended within the Section 35m grant timelines, all amendments must be received between January 31 - February 28, 2026.**
- **Please note:** All districts considering and/or applying for an amendment must not expend funds until a final selection is made.
