

STATE OF MICHIGAN

DEPARTMENT OF HEALTH AND HUMAN SERVICES
LANSING

GRETCHEN WHITMER
GOVERNOR

ELIZABETH HERTEL
DIRECTOR

MEMORANDUM

DATE: July 14, 2022

TO: Local and Intermediate School District Superintendents
Public School Academy Directors
Local Education Agency Principals
Nonpublic School Administrators

FROM: Elizabeth Hertel ^{EH}
Director, Michigan Department of Health and Human Services

Michael F. Rice, Ph.D. ^{MR}
State Superintendent, Michigan Department of Education

SUBJECT: **2022 Immunization Requirements for Children Entering Kindergarten and 7th Grade, or Enrolling in a New School District in Grades 1-12**

Immunizations are one of the most effective and scientifically proven measures to protect children from harmful diseases and death. Since 1978, Michigan law has required that each student have an up-to-date certificate of immunization at the time of registration (or no later than the first day of school) for entry into kindergarten and 7th grade, and for enrollment into a new school district, grades 1-12.

Michigan schools are required to report immunization information regardless of their mode of instruction. Any student who fails to meet the immunization requirements noted below shall not be admitted or participate in school classes.

For a student to attend school in Michigan, the Michigan Public Health Code requires parent(s)/legal guardian(s) to have one of the following on file with the school:

1. A valid, current immunization record.
[Note: *Provisional Status Vaccines*. In the event the child has received at least one dose of a required vaccine and the next dose is not yet due, the school is required to follow up with the child to ensure s/he has received the required follow-up doses of the vaccine and is up to date for all other required vaccines.]
2. A medical doctor's (M.D./D.O.) signed State of Michigan 2022 Medical Contraindication Form, which states the medical contraindication(s), the vaccines involved, and the time during which the child is not able to get the vaccines.
3. A current, certified State of Michigan 2022 Nonmedical Immunization Waiver Form required under Michigan Administrative Rules.
[Note: When a parent or legal guardian holds a religious or other objection that prevents a child from receiving vaccines, a 2022 Nonmedical Immunization Waiver Form is required to be completed, signed, and certified at the local health department. The local health department will provide education from a health professional on the risks of

vaccine-preventable diseases and the benefits/potential risks (risks consisting mostly of moderate side effects) of vaccination. Health professionals will address questions and concerns prior to signing the current State of Michigan 2022 Nonmedical Immunization Waiver Form.]

Proper maintenance of up-to-date immunization records, including waivers, is critical and required to be on file for all students. The Michigan Department of Health and Human Services or the local health department may conduct an audit in the event of an outbreak and/or cases of non-compliance.

The Michigan Care Improvement Registry/School Information Reporting System (MCIR/SIRS) links immunization records contained within the MCIR for students entered on the MCIR/SIRS school roster. All enrolled students in kindergarten and 7th grade, as well as any students newly enrolled to a school district, can be placed on the roster to meet school immunization reporting requirements. Consent is required to enter data into MCIR/SIRS or to share MCIR data maintained by the school.

The Family Educational Rights and Privacy Act (FERPA) "[Consent Form for Disclosure](#)" template can be modified to include your school information. The FERPA "Consent Form for Disclosure" template and additional guidance on immunization reporting can be found at <http://www.mcir.org> under School & Childcare, then click on Reporting to the Health Department.

Once the FERPA "Consent Form for Disclosure" is signed and returned to the attending school, data can be added to MCIR/SIRS in compliance with FERPA regulations. Without a "Consent Form for Disclosure," the school cannot enter immunization data into the MCIR/SIRS. Data include immunization records and waivers.

Students who are 18 years old or older are considered "eligible students" who may provide their own "Consent Form for Disclosure" of information from their education records. Please review the enclosed Frequently Asked Questions (FAQ) regarding "FERPA No Consent" Checkbox in MCIR/SIRS and Forms.

If FERPA "Consent Form for Disclosure" has not been received, or is not on file, for a student:

1. The "No FERPA" consent box in MCIR/SIRS must be checked.
2. Viewing existing immunization information in the MCIR/SIRS system does not violate FERPA, and children can remain on the school roster. Schools must be compliant with FERPA if the immunization data in MCIR becomes part of the school record or shared in any way.
3. If there is no FERPA consent on file, the provider-entered data indicate that the student has not completed the required school immunizations, additional immunization data should not be entered in the MCIR/SIRS and the immunization information should be reported to the local health department using the "Immunization Reporting Form for Students with No FERPA Consent" document.

The immunization status for a "No Consent Student" must still be reported to the local health department using the "Immunization Reporting Form for Students with No FERPA Consent." To protect student privacy, this form should only contain aggregate non-identifiable information for students who do not have a consent on file. **Those students being reported on this form should be removed from the student roster in MCIR/SIRS, so they are not reported twice.** The completed "Immunization Reporting Form for Students with No FERPA Consent" form must be submitted to the local health department each November and February when the MCIR/SIRS report is completed. The local health department will add aggregate data following school closure.

Local and Intermediate School District Superintendents, Public School Academy Directors, Local Education Agency Principals, Nonpublic School Administrators

Districts should contact their local health department for other means of school immunization reporting if MCIR/SIRS is not available.

To obtain technical assistance, or to enroll as a MCIR/SIRS user, districts may contact their local health department or the MCIR Help Desk at 1-888-243-6652. **Please see the enclosed handout, “Important School and Childcare Immunization and Resources,” for additional guidance about school immunization reporting.**

Thank you for your continued support and cooperation to ensure Michigan’s children are properly immunized to avoid the ongoing threat of illness associated with vaccine-preventable diseases.

Immunization guidance documents can be accessed at: <https://www.mcir.org/school-childcare/reporting-immunization-program-status-to-the-health-department/>.

Thank you for your assistance in this important matter.
